L5M9題庫資料 - L5M9證照考試

從專門的考試角度來看，有必要教你關於考試的技巧，你需要智取，不要給你的未來失敗的機會，VCESoft培訓資源是個很了不起的資源網站，包括了CIPS的L5M9考試材料，研究材料，技術材料。認證培訓和詳細的解釋和答案。考古題網站在近幾年激增，這可能是導致你準備CIPS的L5M9考試認證毫無頭緒。VCESoft CIPS的L5M9考試培訓資料是一些專業人士和通過了的考生用實踐證明了的有效的培訓資料，它可以幫助你通過考試認證。

最新的 CIPS Level 5 Advanced Diploma in Procurement and Supply L5M9 免費考試真題 (Q67-Q72):

問題 #67

When conducting a Failure Mode and Effective Analysis (FMEA) which system could be used to show risks to a business's operations? Select TWO

- A. Colour Code
- B. ABC Analysis
- C. RAG System
- D. Scale 1-10

答案: C,D

解題說明:

an FMEA is very similar to a risk assessment- it looks at potential failures and the likelihood and severity that these have on an organisation. In order to figure out which failures would have the biggest impact on a business, you'd give the failure a score for likelihood and a score for severity. This would be on a scale 1-10. You can then go one step further and use a RAG system (Red Amber Green) to denote which of the failures are severe (Red e.g. scores over 8) and which are not severe (Green e.g. scores under 2). The textbook does mention scales but doesn't mention the RAG system. However RAG is mentioned in other modules and should be a concept you're familiar with. The other two answers are clearly wrong- ABC Analysis is about categorising

inventory and colour coding is not a recognised system and would be different for each organisation. P.99

問題 #68

Little Joy Ltd is a large company with several functional departments. Below are details of four departments. For each, you must decide which functional area of the business the department is, as well as the SERVQUAL Gap that each Department Lead is concerned with.

Department 1: This department is concerned with the creation of products. The products are created in line with BS EN 716-1 and undergo vigorous tests before they leave the factory. Many customers are unaware of the additional costs of testing to BS EN 716-1 and complain about the price of this product line.

Department 2: Other departments of the business are internal customers of this functional area and approach the Department Lead when they require something to be bought. Often the internal customers have unrealistic expectations of the timescales involved in the process and the Department Lead spends a lot of time explaining lead times and logistics.

Department 3: This functional area creates the budgets for the company and emails these to the Department Leads at the beginning of every quarter. Due to the complexity of the documents, other functional areas of the business often don't understand the information provided.

Department 4: This area of the business is concerned with revenue, which has recently slumped. The Department Lead is conducting market surveys to find out the reason for this.

Complete the table below by listing the Functional Area of the business, and the corresponding SERVQUAL Gap. Each response should only be used once: procurement, finance, sales, production, satisfaction gap, delivery gap, standards gap, communication gap.

Which of the following will you put into box 5?

- A. standards gap
- B. satisfaction gap
- C. delivery gap
- D. communication gap

答案: A

解題說明:

The correct answers are as follows:

問題 #69

In order to keep processing costs down, which of the following should a company opt for in terms of operating processes?

- A. low volume, high variety
- B. high variation, low visibility
- C. low variation, high visibility
- D. high volume, low variety

答案: D

解題說明:

2 is the correct response. This is the only response where both characteristics given keeps costs down. High volume means a lower unit cost and higher profits. Low variety keeps costs down as you don't need to produce many different products. In the other three options high variety, high variation and high visibility all lead to increased costs. P. 50

問題 #70

Little Joy Ltd is a large company with several functional departments. Below are details of four departments. For each, you must decide which functional area of the business the department is, as well as the SERVQUAL Gap that each Department Lead is concerned with.

Department 1: This department is concerned with the creation of products. The products are created in line with BS EN 716-1 and undergo vigorous tests before they leave the factory. Many customers are unaware of the additional costs of testing to BS EN 716-1 and complain about the price of this product line.

Department 2: Other departments of the business are internal customers of this functional area and approach the Department Lead when they require something to be bought. Often the internal customers have unrealistic expectations of the timescales involved in the process and the Department Lead spends a lot of time explaining lead times and logistics.

Department 3: This functional area creates the budgets for the company and emails these to the Department Leads at the beginning of every quarter. Due to the complexity of the documents, other functional areas of the business often don't understand the information provided.

Department 4: This area of the business is concerned with revenue, which has recently slumped. The Department Lead is conducting market surveys to find out the reason for this.

Complete the table below by listing the Functional Area of the business, and the corresponding SERVQUAL Gap. Each response should only be used once: procurement, finance, sales, production, satisfaction gap, delivery gap, standards gap, communication gap.

Which of the following will you put into box 7?

- A. satisfaction gap
- B. delivery gap
- C. standards gap
- **D. communication gap**

答案：D

解題說明：

The correct answers are as follows:

問題 #71

Below are details of 4 local manufacturing companies. For each company you must decide what the main objective is for the organisation and what layout their manufacturing plant has.

Company 1: This company creates large, delicate products which are hard to move. The main aim of the company is to stand out from competitors due to the superior level of materials used and by using the latest forms of technology to create the items.

Company 2: This company produces 72 different items and has designated zones within its premises for the creation of each item. The zones are organised based on the technology used and some products may be passed between different zones to be completed. The company creates many different items in response to changing customer demands, with many product lines only lasting a single season.

Company 3: Company 3 creates one product which flows along a single production line, with staff members adding to the product on four different occasions. The company must produce a high volume of this singular product in order to break even. Therefore, there is always a steady flow of items through the plant and it is important there is no stoppage in production.

Company 4: This company produces small batches of products, as and when they are ordered by customers. Due to uncertainty in demand, a high profit margin is added to the cost of each item. Teams in the factory are grouped into different areas depending on the technological process they are using.

Complete the table below by listing the objective criteria and plant layout for each company. Each response should only be used once: flexibility, speed, quality, cost, functional layout, cell layout, product layout, fixed-position layout

Which of the following will you put into box 6?

- A. fixed-position layout
- B. functional layout
- **C. cell layout**
- D. product layout

答案：C

解題說明：

The correct answers are as follows:
