Trustworthy 220-1201 Dumps & Exam 220-1201 Cost

Our 220-1201 free demo provides you with the free renewal in one year so that you can keep track of the latest points happening in the world. As the questions of exams of our 220-1201 exam torrent are more or less involved with heated issues and customers who prepare for the exams must haven't enough time to keep trace of exams all day long, our 220-1201 Practice Test can serve as a conducive tool for you make up for those hot points you have ignored. Therefore, you will have more confidence in passing the exam, which will certainly increase your rate to pass the 220-1201 exam.

CompTIA A+ Certification Exam: Core 1 Sample Questions (Q207-Q212):

NEW QUESTION # 207
Users are complaining that the audio from a presenter is choppy and unintelligible Which of the following is causing the issue?

- A. inverter
- B. Webcam
- C. Microphone
- D. Digitizer

Answer: C

Explanation:
Choppy or unintelligible audio is typically caused by issues with the microphone, such as poor quality, hardware defects, or misconfiguration.
Why Not A (Webcam): The webcam handles video, not audio.

Why Not B (Digitizer): A digitizer relates to touchscreens, not audio.
Why Not C (Inverter): Inverters manage power for displays, not audio.
CompTIA A+ Exam Reference: Core 1 (220-1201), Section 3.6, audio troubleshooting.

NEW QUESTION # 208
Which connector is used to uplink a new ISP cable modem to its wall jack?

- A. F-type
- B. Lightning
- C. LC
- D. RJ45

Answer: A

Explanation:
Cable modems supplied by ISPs connect to the coaxial wall outlet using an F-type connector. CompTIA A+ specifies that F-type connectors are threaded coaxial connectors used in broadband cable internet, cable TV, and some satellite systems. They attach to RG-6 or RG-59 coaxial cable and provide a secure, shielded connection to the cable provider's infrastructure.
The cable modem requires this coaxial uplink to receive downstream and upstream signals from the ISP before converting them into Ethernet on the LAN side.
LC (B) is for fiber optic connectors, not coaxial. RJ45 (C) is an Ethernet connector and is used on the LAN side of the modem-not on the wall uplink. Lightning (D) is an Apple connector and irrelevant to networking hardware.
Thus, the correct connector for the ISP cable modem uplink is F-type.

NEW QUESTION # 209
Which of the following networking devices is used to create a mesh network?

- A. Access point
- B. Modem
- C. DSL
- D. ONT

Answer: A

Explanation:
Mesh networks rely on multiple access points (or mesh nodes) to create a seamless, self-healing network.
Each access point communicates with others to extend coverage and improve reliability without requiring a wired backbone for each AP.
Reference:CompTIA A+ Certification Exam Core 1 Objectives - Domain 2.0 Networking - Objective 2.4:
Compare and contrast wireless networking protocols.

NEW QUESTION # 210
After troubleshooting a computer's connectivity, the network team determines there is a port-mapping issue.
After plugging the patch cable into a different port, the issue persists. Which of the following troubleshooting steps should a technician take next to resolve the issue?

- A. Replace the patch cable from the device to the wall.
- B. Verify the length of the patch cable meets current standards.
- C. Convert the patch cable to a crossover cable.
- D. Test the patch cable from the computer to the network closet.

Answer: D

Explanation:
When port issues persist after moving to a different switch port, the next logical troubleshooting step is to test the patch cable. Faulty or damaged cables are a common cause of network connectivity problems. Using a cable tester between the computer and the network closet verifies the integrity of the cable and rules out a physical layer issue.
From CompTIA A+ 220-1101 Official Study Guide, Objective 4.2 - Troubleshoot wired and wireless networks:

"If a device continues to experience connectivity issues after switching ports, test the cabling with a cable tester to check for continuity, shorts, or pinout issues before replacing hardware." Verified Source:
* CompTIA A+ Core 1 (220-1101) Official Study Guide, Chapter 4: Troubleshooting Network Connectivity
* CompTIA Exam Objectives 220-1101, Domain 4.2

NEW QUESTION # 211
A help desk technician inspects a laptop keyboard because a single key has stopped working. The technician checks the keyboard for debris. Which of the following actions should the technician do next to troubleshoot the issue cost-effectively?

- A. Replace the keycap
- B. Replace the key switch
- C. Replace the circuit board.
- D. Replace the keyboard.

Answer: A

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
If only one key is not functioning and debris has been checked, replacing the individual keycap is the most cost-effective next step. It's a simple, low-cost option before considering more extensive repairs like replacing the entire keyboard.
