

Real 300-740 Exams & 300-740 Pass4sure

DOWNLOAD the newest ValidTorrent 300-740 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1XzoJ-NsogEr1RenZN9Z1RZA7kky-TVL>

300-740 also offers free demos, allowing users to test the quality and suitability of the 300-740 exam dumps before purchasing. The demo provides access to a limited portion of the material, providing users with a better understanding of the content. Additionally, 300-740 provides three months of free updates to ensure that candidates have access to the latest questions.

Cisco 300-740 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Network and Cloud Security: This section of the exam measures skills of Network Security Engineers and covers policy design for secure access to cloud and SaaS applications. It outlines techniques like URL filtering, app control, blocking specific protocols, and using firewalls and reverse proxies. The section also addresses security controls for remote users, including VPN-based and application-based access methods, as well as policy enforcement at the network edge.
Topic 2	<ul style="list-style-type: none">• Cloud Security Architecture: This section of the exam measures the skills of Cloud Security Architects and covers the fundamental components of the Cisco Security Reference Architecture. It introduces the role of threat intelligence in identifying and mitigating risks, the use of security operations tools for monitoring and response, and the mechanisms of user and device protection. It also includes strategies for securing cloud and on-premise networks, as well as safeguarding applications, workloads, and data across environments.
Topic 3	<ul style="list-style-type: none">• Visibility and Assurance: This section of the exam measures skills of Security Operations Center (SOC) Analysts and focuses on monitoring, diagnostics, and compliance. It explains the Cisco XDR solution, discusses visibility automation, and describes tools for traffic analysis and log management. The section also involves diagnosing application access issues, validating telemetry for behavior analysis, and verifying user access with tools like firewall logs, Duo, and Cisco Secure Workload.
Topic 4	<ul style="list-style-type: none">• User and Device Security: This section of the exam measures skills of Identity and Access Management Engineers and deals with authentication and access control for users and devices. It covers how to use identity certificates, enforce multifactor authentication, define endpoint posture policies, and configure single sign-on (SSO) and OIDC protocols. The section also includes the use of SAML to establish trust between devices and applications.
Topic 5	<ul style="list-style-type: none">• SAFE Architectural Framework: This section of the exam measures skills of Security Architects and explains the Cisco SAFE framework, a structured model for building secure networks. It emphasizes the importance of aligning business goals with architectural decisions to enhance protection across the enterprise.
Topic 6	<ul style="list-style-type: none">• Industry Security Frameworks: This section of the exam measures the skills of Cybersecurity Governance Professionals and introduces major industry frameworks such as NIST, CISA, and DISA. These frameworks guide best practices and compliance in designing secure systems and managing cloud environments responsibly.

Topic 7	<ul style="list-style-type: none"> Threat Response: This section of the exam measures skills of Incident Response Engineers and focuses on responding to threats through automation and data analysis. It covers how to act based on telemetry and audit reports, manage user or application compromises, and implement response steps such as containment, reporting, remediation, and reinstating services securely.
Topic 8	<ul style="list-style-type: none"> Application and Data Security This section of the exam measures skills of Cloud Security Analysts and explores how to defend applications and data from cyber threats. It introduces the MITRE ATT&CK framework, explains cloud attack patterns, and discusses mitigation strategies. Additionally, it covers web application firewall functions, lateral movement prevention, microsegmentation, and creating policies for secure application connectivity in multicloud environments.

Cisco 300-740 Exam Practice Test Questions Available In Three User-Friendly Formats

It is never too late to learn. You still have the chance to obtain the 300-740 certificate as long as you want. What is more, many people have harvest happiness and success after passing the 300-740 exam. Then you are available for various high salary jobs. You also can become lucky as long as you never give up hopes. Let us make it together. We will be your best friend on your way to get the 300-740 Certification with our excellent learning braindumps.

Cisco Designing and Implementing Secure Cloud Access for Users and Endpoints Sample Questions (Q157-Q162):

NEW QUESTION # 157

In the context of threat response, "restantiate" primarily means:

- A. Maintaining the compromised state for forensic analysis
- B. Restoring services or applications to their operational state after a security incident
- C. Ignoring the incident after containment
- D. Permanently disabling compromised accounts

Answer: B

NEW QUESTION # 158

Refer to the exhibit. An engineer configured a default segmentation policy in Cisco Secure Workload to block SMTP traffic. During testing, it is observed that the SMTP traffic is still allowed. Which action must the engineer take to complete the configuration?

- A. Add "port": [25, 25] to _rootScope
- B. Add _SMTPScope to provider_filter_ref
- C. Add "port": [25, 25] to _params
- D. Change consumer_filter_ref to: _SMTPScope

Answer: C

Explanation:

The JSON configuration shown is missing a specific Layer 4 parameter definition for port 25 (SMTP).

Although the protocol (proto: 6, which is TCP) is defined, without specifying the actual port in the l4_params array, traffic filtering will not trigger on SMTP. Therefore, the engineer must add "port": [25, 25] to the l4_params section to ensure traffic on port 25 is blocked.

Reference: Designing and Implementing Secure Cloud Access for Users and Endpoints (SCAZT), Section 5:

Visibility and Assurance, Pages 97-100.

NEW QUESTION # 159

Which of the following is a feature of multifactor authentication (MFA)?

- A. Requires multiple forms of identification before granting access
- B. Can only be used on mobile devices
- C. Is less secure than single-factor authentication
- D. Only requires a password

Answer: A

NEW QUESTION # 160

The main benefit of integrating threat intelligence into cloud security is:

- A. Increasing the complexity of security architectures
- B. Enhancing the ability to identify and respond to emerging threats
- C. Reducing the effectiveness of security operations
- D. Decreasing the need for secure domains

Answer: B

NEW QUESTION # 161

A Web Application Firewall (WAF) is primarily used for:

- A. Filtering email spam
- B. Managing website content
- C. Protecting web applications from attacks such as SQL injection and XSS
- D. Accelerating website performance

Answer: C

NEW QUESTION # 162

.....

In order to meet the needs of all customers that pass their exam and get related certification, the experts of our company have designed the updating system for all customers. Our 300-740 exam question will be constantly updated every day. The IT experts of our company will be responsible for checking whether our 300-740 Exam Prep is updated or not. Once our 300-740 test questions are updated, our system will send the message to our customers immediately. If you use our 300-740 exam prep, you will have the opportunity to enjoy our updating system and pass the 300-740 exam.
