In addition, once you have used this type of OGBA-101 Exam Question online for one time, next time you can practice in an offline environment. It must be highest efficiently exam tool to help you pass the OGBA-101 exam.

## The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q31-Q36):

**NEW QUESTION # 31**
Which of the following Business Architecture concepts should the architect examine and search for when developing the Architecture Vision?

- A. Architecture Continuum, Architecture Repository
- B. Architecture Principles, Business Drivers
- C. Implementation Factor Catalog, Business Value Assessment Matrix
- D. Value Streams, Business Capabilities

**Answer: D**

Explanation:
When developing the Architecture Vision, it is essential for the architect to examine and search for Value Streams and Business Capabilities. Here's a detailed explanation:
Architecture Vision Phase (Phase A):
The Architecture Vision phase sets the overall direction and context for the architecture project. It defines the scope and vision for the future state architecture and establishes a shared understanding among stakeholders.
Value Streams:
Definition: Value streams represent the end-to-end set of activities that deliver value to customers or stakeholders. They provide a high-level view of how value is created and delivered within the organization.
Importance: Understanding value streams helps in aligning the architecture with business processes and ensuring that the architecture supports the delivery of value.
Business Capabilities:
Definition: Business capabilities define what an organization needs to be able to do to achieve its business objectives. They represent the core functions or abilities of the organization.
Importance: Identifying and understanding business capabilities is crucial for ensuring that the architecture addresses the critical functions of the business and supports its strategic goals.
TOGAF ADM Reference:
Phase A: Architecture Vision: In this phase, the architect examines value streams and business capabilities to understand the current state and define the desired future state. This helps in creating an architecture vision that is aligned with business objectives and supports value creation.
Strategic Planning: Value streams and business capabilities provide a foundation for strategic planning, ensuring that the architecture is designed to support key business activities and capabilities.
In summary, when developing the Architecture Vision, examining value streams and business capabilities is essential for understanding how the organization delivers value and ensuring that the architecture supports critical business functions and strategic objectives.

**NEW QUESTION # 32**
In what TOGAF ADM phase is the information map linked to other business blueprints?

- A. Phase A
- B. Phase E
- C. Preliminary Phase
- D. Phase B

**Answer: D**

Explanation:

In the TOGAF ADM (Architecture Development Method), Phase B is the Business Architecture phase.
During this phase, the information map, which represents the relationships and flow of information within the business, is linked to other business blueprints. This linkage is crucial to ensure that the business architecture is aligned with the data and information needs of the organization, providing a foundation for the development of subsequent architecture domains (Data, Application, and Technology Architectures).

## NEW QUESTION # 33

In what TOGAF ADM phase should the architect locate existing architecture descriptions to create an information map?

- A. Phase E
- B. Preliminary Phase
- C. Phase A
- D. Phase B

**Answer: C**

Explanation:
In the TOGAF ADM cycle, Phase A, the Architecture Vision phase, is where the architect would locate existing architecture descriptions to create an information map. This phase involves understanding the strategic context for the architecture work, defining the scope, identifying stakeholders, creating the Architecture Vision, and obtaining approvals to proceed with the work. Part of this involves reviewing existing documentation to understand the current state of the architecture and the information that is already available, which would be useful for creating an information map.

## NEW QUESTION # 34

Which of the following is the element of a value stream stage that describes the state change that triggers the value stream stage?

- A. Baseline state
- B. Gating stage
- C. Starting point
- D. Enhance criteria

**Answer: B**

Explanation:
In the context of value stream stages, a gating stage is the element that describes the specific state change which triggers the next stage of the value stream to begin. It acts as a checkpoint that ensures that certain criteria are met before the process can proceed to the next phase.

## NEW QUESTION # 35

Complete the sentence. The architecture domains that are considered by the TOGAF standard as subsets of an overall enterprise architecture are Business, Technology,

- A. Logical and Physical
- B. Information and Data
- C. Application and Data
- D. Capability and Segment

**Answer: C**

Explanation:
In the TOGAF framework, the architecture domains considered as subsets of an overall enterprise architecture are Business, Technology, Application, and Data. Here's a detailed explanation:
TOGAF Architecture Domains:
Business Architecture: Describes the business strategy, governance, organization, and key business processes.
Data Architecture: Defines the structure of an organization's logical and physical data assets and data management resources.
Application Architecture: Provides a blueprint for the individual applications to be deployed, their interactions, and their relationships to the core business processes of the organization.
Technology Architecture: Describes the logical software and hardware capabilities that are required to support the deployment of

business, data, and application services.

Importance of Each Domain:

Business Architecture: Aligns the architecture with the business strategy and goals.

Data Architecture: Ensures that data is structured and managed to support business processes and decisions.

Application Architecture: Ensures that applications are designed and integrated to support business processes.

Technology Architecture: Provides the technology infrastructure needed to support applications and data management.

TOGAF Reference:

Phase B: Business Architecture: Focuses on developing the Business Architecture.

Phase C: Information Systems Architectures: This phase includes both Data Architecture and Application Architecture.

Phase D: Technology Architecture: Focuses on developing the Technology Architecture.

In summary, the TOGAF standard considers Business, Technology, Application, and Data as the architecture domains that are subsets of an overall enterprise architecture.

**NEW QUESTION # 36**

......

People are very busy nowadays, so they want to make good use of their lunch time for preparing for their OGBA-101 exam.
