### SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q57-Q62):

#### NEW QUESTION # 57

Which of the following are captured in a completed Digital Discovery Assessment? Note: There are 2 correct answers to this question.

- A. SAP Fiori application extensions
- B. Known integration requirements
- C. Target customer go-live date
- D. Business role permission requirements

Answer: B,D

#### NEW QUESTION # 58

Which of the following actions does the lead configuration expert carry out during the content deployment phase in the SAP S/4HANA Cloud starter system? Note: There are 3 correct answers to this question.

- A. Define the scope
- B. Confirm primary finance settings
- C. Confirm primary logistics settings
- D. Create two projects
- E. Confirm primary HCM settings

Answer: A,C,D

Explanation:

For implementing SAP S/4HANA Cloud Public Edition for a customer, the following systems are commonly used:

\* Sandbox system: This system is used in the very early stages of the project for exploration and trying out different configurations without affecting the development or production environments. It's a safe space for experimentation.

\* Development system: This system is where the initial setup and customizations are made. Configuration changes, custom development, and extensions are carried out here before being moved to the test system for further testing.

\* Test system: After configurations and developments are done in the development system, they are transported to the test system.

This environment is used for rigorous testing to ensure that everything works as expected and to identify any issues before moving to the production environment.

These systems play crucial roles in the implementation process, allowing for a structured and phased approach to setting up, customizing, testing, and finally deploying SAP S/4HANA Cloud Public Edition.

#### NEW QUESTION # 59

An SAP Fiori app isn't displaying on the SAP Fiori Launchpad even though the business role granting permission to the app is correctly assigned to the user.

How would you troubleshoot? Note: There are 3 correct answers to this question

- A. Check the restrictions for the role.
- B. Check the business catalogues assigned to the role.
- C. Check the business role template.
- D. Check the Role Maintenance app.
- E. Check the space and page(s) assigned to the role.

**Answer: A,B,E**

Explanation:

When an SAP Fiori app isn't displaying on the SAP Fiori Launchpad despite the user having the correct business role, several aspects need to be checked to troubleshoot the issue effectively:

\* Check the restrictions for the role: It's essential to verify if there are any restrictions applied to the role that might prevent the app from being displayed. Restrictions can be based on various factors such as geographic location, department, or specific user attributes.

\* Check the business catalogues assigned to the role: Business catalogues in SAP Fiori contain groups of apps related to specific business functions. If the necessary business catalogue is not assigned to the role, the app will not appear on the SAP Fiori Launchpad. Ensuring the correct assignment of catalogues is crucial for app visibility.

\* Check the space and page(s) assigned to the role: With the introduction of spaces and pages in the SAP Fiori Launchpad, it's vital to ensure that the relevant space and page that should display the app are correctly assigned to the user's role. Spaces are higher-level groupings, while pages within those spaces contain the actual apps.

#### NEW QUESTION # 60

Through which component do you access your assigned process tasks from the SAP Activate Roadmap of SAP S/4HANA Cloud Public Edition (3-system landscape)?

- A. SAP Central Business Configuration
- B. SAP Cloud ALM for Service
- C. SAP Cloud ALM for Implementation
- D. SAP Cloud ALM for Operations

**Answer: C**

Explanation:

SAP Cloud ALM for Implementation is the component that provides access to the SAP Activate Roadmap of SAP S/4HANA Cloud Public Edition (3-system landscape). The SAP Activate Roadmap is a tool that guides the implementation project team through the phases, deliverables, tasks, and accelerators related to the SAP Activate methodology. The SAP Activate Roadmap is updated frequently to reflect the latest scope, processes, and best practices for SAP S/4HANA Cloud Public Edition. The SAP Cloud ALM for Implementation component also enables the project team to monitor the progress, status, and quality of the implementation project.
