Reliable CloudSec-Pro Test Sims & Reliable CloudSec-Pro Exam Braindumps

The desktop software Palo Alto Networks Cloud Security Professional (CloudSec-Pro) practice exam format can be used easily used on your Windows system. Customers can use it without the internet. ActualCollection have made all of the different formats so

the students won't face any extra issues and crack Palo Alto Networks Cloud Security Professional (CloudSec-Pro) certification exams for the betterment of their futures.

Palo Alto Networks Cloud Security Professional Sample Questions (Q57-Q62):

NEW QUESTION # 57
Where can a user submit an external new feature request?

- A. Aha
- B. Support Portal
- C. Feature Request
- D. Help Center

Answer: A

Explanation:
https://prismacloud.ideas.aha.io/ideas
To submit an external new feature request for Prisma Cloud, users can utilize the Aha platform. By accessing the Palo Alto Networks Aha portal, users can submit their feature requests, suggest enhancements, and contribute to shaping the future of Prisma Cloud. Aha provides a structured way to collect and prioritize customer feedback, ensuring that valuable insights reach the product development teams.
For those seeking to propose new features or improvements, visiting the Aha portal and submitting their ideas is the recommended approach. It allows users to participate in the ongoing evolution of Prisma Cloud by sharing their requirements and vision for the platform

NEW QUESTION # 58
Which intensity setting for anomaly alerts is used for the measurement of 100 events over 30 days?

- A. Medium
- B. Very High
- C. Low
- D. High

Answer: A

Explanation:
In the context of setting anomaly alert intensities in Prisma Cloud, an intensity setting of "Medium" could be used for the measurement of 100 events over 30 days. This setting indicates a moderate level of anomaly detection sensitivity, which is suitable for environments where there is a need to balance between detecting potential security issues and minimizing false positives.

NEW QUESTION # 59
Which three types of classifications are available in the Data Security module? (Choose three.)

- A. Compliance standard
- B. Malicious IP
- C. Malware
- D. Financial information
- E. Personally identifiable information

Answer: C,D,E

Explanation:
Palo Alto Networks' Enterprise DLP service and provides data classification that includes built-in data profiles with data patterns that match sensitive information such as PII, health care, financial information and Intellectual Property. In addition to protecting your

confidential and sensitive data, your data is also protected against threats-known and unknown (zero-day) malware-using the Palo Alto Networks' WildFire service.

NEW QUESTION # 60
Which statement is true about obtaining Console images for Prisma Cloud Compute Edition?

- A. To retrieve Prisma Cloud Console images using URL auth:1.Access registry-auth.twistlock.com, and authenticate using the user certificate.2.Retrieve the Prisma Cloud Console images using 'docker pull'.
- B. To retrieve Prisma Cloud Console images using basic auth:1.Access registry.twistlock.com, and authenticate using 'docker login'.2.Retrieve the Prisma Cloud Console images using 'docker pull'.
- C. To retrieve Prisma Cloud Console images using URL auth:1.Access registry-url-auth.twistlock.com, and authenticate using the user certificate.2.Retrieve the Prisma Cloud Console images using 'docker pull'.
- D. To retrieve Prisma Cloud Console images using basic auth:1.Access registry.paloaltonetworks.com, and authenticate using 'docker login'.2.Retrieve the Prisma Cloud Console images using 'docker pull'.

Answer: B

Explanation:
Retrieving Prisma Cloud Console images involves accessing a specific registry provided by Palo Alto Networks and authenticating using basic authentication with 'docker login'. Once authenticated, the user can pull the Prisma Cloud Console images using the 'docker pull' command. This process is part of the initial setup for deploying Prisma Cloud Console in an environment, allowing users to obtain the necessary images to run the Console, which serves as the central management interface for Prisma Cloud. The detailed steps, including the specific registry URL and authentication method, are typically provided in the Prisma Cloud documentation, ensuring that users have the information needed to successfully retrieve and deploy Console images.

NEW QUESTION # 61
An administrator of Prisma Cloud wants to enable role-based access control for Docker engine.
Which configuration step is needed first to accomplish this task?

- A. Set Docker's listener type to TCP.
- B. Configure Defender's authentication sequence to first use an identity provider and then Console.
- C. Set Defender's listener type to TCP.
- D. Configure Docker's authentication sequence to first use an identity provider and then Console.

Answer: C

Explanation:
