2 Humans as Organisms	6 Chemical Changes	10 Waves
3 Plants & Ecosystems	7 The Earth & Atmosphere	11 Electricity & Magnetism
4 Inheritance, Variation & Survival	8 Energy & Matter	12 The Earth & Beyond

Answers No matter how good your grades were, you can always do better. When reading the question, make sure you read it properly. Re-read it, and make sure you've understood it. Pick out the key words and take a moment to think about your answer and make sure it is actually answering the question.

In low scoring questions, worth 1 mark, you are expected to write a brief answer, if one word will do use it; if it needs a sentence write a *short* sentence. With medium scoring questions (2 to 4 marks) you need to give your answer making one valid point per mark (so for a 3 mark Q you must make 3 good statements etc). For questions worth more than 4 marks you need to be writing in complex sentences. You should be making a valid point and expanding (developing) or explaining that point using evidence.

When you have written your answer STOP! Go back and re-read the question and ask yourself, "does my answer actually answer all of that question?"

If your answer is yes then you need to start Channel Partner Program 156-561 test preparation with CheckPoint 156-561 PDF Questions and practice tests.
