KoreaDumps의Salesforce인증 Plat-Admn-301덤프는 고객님의 IT인증자격증을 취득하는 소원을들어줍니다. IT업계에 금방 종사한 분은 자격증을 많이 취득하여 자신만의 가치를 업그레이드할수 있습니다. KoreaDumps의Salesforce인증 Plat-Admn-301덤프는 실제 시험문제에 대비하여 연구제작된 퍼펙트한 시험전 공부자료로서 시험이 더는 어렵지 않게 느끼도록 편하게 도와드립니다.

Salesforce Plat-Admn-301 시험요강:

주제	소개
주제 1	• Security and Access: This section of the exam measures the skills of Salesforce Administrator and covers how record-level access, field access, and sharing models impact data visibility across the system. It focuses on understanding controlled-by-parent relationships, territory management, role hierarchies, and access to reports, dashboards, and email folders. It also includes comparing custom profiles, permission sets, and delegated administration, along with evaluating different authentication methods. The section also addresses the structure of business models such as person accounts, standard accounts, contacts, and contact-to-multiple-account relationships.
주제 2	• Auditing and Monitoring: This section of the exam measures skills of a Salesforce Support Specialist and covers the tools used to monitor system behavior and review user activity. It includes understanding debug logs, setup audit trail, and methods for ensuring sensitive data is handled correctly in both production and sandbox environments. It also explains how to review and troubleshoot security settings, including recognizing pending updates that might affect system access.

주제 3	• Objects and Applications: This section of the exam measures the skills of a Salesforce Business Analyst and covers selecting appropriate object and application-level solutions to meet business needs. It focuses on identifying when to use master-detail relationships, lookups, junction objects, related lists, record types, Schema Builder, and Object Creator. The section also includes improving UI and user experience using App Manager, Lightning App Builder, Dynamic Forms, standard Lightning components, console apps, and tools like the Lightning page analyze button.
주제 4	• Data and Analytics Management: This section of the exam measures skills of Salesforce Data Analyst and covers data quality assessment, data enrichment, and duplicate management. It explains how to choose appropriate reporting and analytics tools for advanced requirements, including custom report types, snapshots, formulas, joined reports, and dashboard configurations. It also covers methods for connecting external data sources using big objects, external objects, data warehouses, data lakes, and Salesforce Connect. Finally, it describes the suitable tools and methods for importing data, including Data Loader, Data Import Wizard, and external IDs.

최신버전 Plat-Admn-301최고덤프데모 인증덤프는 Salesforce Certified Platform Administrator II 시험패스에 유효한 자료

성공을 위해 길을 찾고 실패를 위해 구실을 찾지 않는다는 말이 있습니다. Salesforce인증 Plat-Admn-301시험이 영어로 출제되어 시험패스가 너무 어렵다 혹은 회사다니느라 공부할 시간이 없다는 등등은 모두 공부하기 싫은 구실에 불과합니다. KoreaDumps의 Salesforce인증 Plat-Admn-301덤프만 마련하면 실패를 성공으로 바꿀수 있는 기적을 체험할 수 있습니다.제일 간단한 방법으로 가장 어려운 문제를 해결해드리는것이KoreaDumps의 취지입니다.

최신 Salesforce Administrator Plat-Admn-301 무료샘플문제 (Q123-Q128):

질문 # 123

A request was made to import a spreadsheet of new Campaign Members. The system administrator started Data Import Wizard but the Campaign Members object was unavailable as a choice. What is causing this occur?

- A. The Salesforce ID field is required and was missing from the file.
- B. The marketing user feature license assignment is missing on the admin's user record.
- C. Import Wizard is only available for the Standard objects Accounts, Contacts, and Leads.
- D. The Campaign Member option is only available for Update.

정답: D

설명:

The Campaign Member option is only available for Update when using Data Import Wizard. This means that you can use Data Import Wizard to update existing campaign members with new or modified information, but you cannot use it to create new campaign members from a spreadsheet. To create new campaign members from a spreadsheet, you need to use other tools such as Data Loader, Import Wizard for Leads and Contacts, or Manage Members button on the campaign page. References:

질문 # 124

At Cloud Kicks, the distributor account information is sensitive information. The administrator needs to make sure this information is unavailable to testers in the full sandbox.

What should the administrator recommend?

- A. Delete the sensitive information.
- B. Refresh the sandbox.
- C. Assign the users a new permission set.

- D. Use the data masking tool.

정답: D

설명:

The data masking tool is a tool that allows you to mask sensitive data in your full sandbox by replacing it with fictitious data. This can help you protect your data privacy and comply with regulations while testing in a realistic environment. You can use the data masking tool to mask data for standard and custom objects, including person accounts, and choose from different masking formats and options. References: https://help.salesforce.com/s/articleView?id=sf.data_mask.htm&type=5

질문 # 125

A user accidentally created a duplicate opportunity and is unable to delete the duplicate record. What should an administrator do to troubleshoot this issue?

- A. Change the user's profile to System Administrator so they have full permissions to delete object records.
- B. Run a report of all opportunities to identify other possible duplicates.
- C. Check the user profile permissions on the Opportunity object to see if they have permission to delete.
- D. Advise the user to mark the duplicate opportunity Closed Lost and keep it in the system.

정답: C

설명:

The user profile permissions on the Opportunity object is the item that the administrator should review to find out why the user is unable to delete the duplicate record. The user profile permissions determine what users can do with records and objects in Salesforce, such as creating, editing, deleting, viewing, or sharing. In this case, the administrator should check if the user has the Delete permission on the Opportunity object, which allows them to delete opportunity records that they own or have access to. If not, the administrator can either grant them this permission or delete the record for them. References: https://help.salesforce.com/s/articleView?id=sf.admin_general_permissions.htm&type=5 https://help.salesforce.com/s/articleView?id=sf.admin_object_permissions.htm&type=5

질문 # 126

Cloud Kicks needs to create 10 separate environments for various projects. A developer sandbox has been created with the necessary configuration and data. The administrator needs to create 10 new environments with the same metadata and data for each user.

What should the administrator do to meet the requirements?

- A. Use clone a sandbox option from the existing sandbox.
- B. Use a scratch org definition to copy sandbox.
- C. Use the existing sandbox as a sandbox template.
- D. Use refresh sandbox without Auto Activate.

정답: A

설명:

Cloning a sandbox creates a duplicate copy of an existing sandbox with the same type, name, description, configuration, and license type as the original sandbox. Cloning a sandbox is useful when you need to create multiple sandboxes with the same metadata and data for testing or development purposes. References: https://help.salesforce.com/s/articleView?id=sf.data_sandbox_clone.htm&type=5

질문 # 127

Cloud Kicks has two record-triggered flows on the same object. One flow creates a child record when criteria are met. The second record-triggered flow is based on criteria to check if the child record exists and updates a field. The field on the child record that needs to be updated is still null after the second record trigger.

What should the administrator do to resolve this issue?

- A. Have the record-triggered flows fire on create or edit to update the field.
- B. Make a new record-triggered flow on the child object to update the field on the parent record.

- [illegible]
