We have been staying and growing in the market for a long time, and we will be here all the time, because our excellent quality and high pass rate of 156-536 exam questions can meet your requirement. As for the high-effective 156-536 training guide, there are thousands of candidates are willing to choose our 156-536 study question, why don't you have a try for our 156-536 study materials, we will never let you down!

CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q96-Q101):

NEW QUESTION # 96

Which command in a CLI session is used to check installed licenses on the Harmony Endpoint Management Server?

- A. cplic print -x
- B. show licenses all
- C. cplic add <license filename="">
 D. cplic print +x</license>

Answer: A

Explanation:

To check installed licenses on the Harmony Endpoint Management Server via the command-line interface (CLI), the correct command is cplic print -x. This is a standard Check Point command for displaying detailed license information, as referenced in the CP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdf on page 58 under "Getting Licenses." While the document does not list the command explicitly in a step-by-step format, it discusses license management and implies the use of standard Check Point CLI tools. The cplic print -x command is widely recognized in Check Point environments to output license details, including expiration dates and features, making it the appropriate choice for troubleshooting license status on the server.

Option B ("show licenses all") is not a valid Check Point CLI command; it resembles syntax from other systems but not Check Point's. Option C ("cplic add <license filename="">") is for adding a license, not checking existing ones (page 58 mentions applying licenses, not viewing them). Option D ("cplic print +x") contains a syntax error; the correct flag is <code>-x</code>, not <code>+x</code>. Thus, option A is the verified answer based on Check Point's CLI conventions and the guide's context.

</license> References:

CP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdf, Page 58: Getting Licenses (discusses license management, implying standard CLI usage).

NEW QUESTION # 97

How many Endpoint Security Client Package types exist?

- A. There is only the initial package.
- B. There are two packages. One for Windows and one for MacOS
- C. The administrator has to download all the appropriate packages from the UserCenter.
