SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q59-Q64):

NEW QUESTION # 59

Which process-related areas are the focus for Business Process Management? Note: There are 3 correct answers to this question.

- A. Process Governance
- B. Process Discovery

- C. Process Transparency
- D. Process Implementation
- E. Process Improvement

Answer: C,D,E

NEW QUESTION # 60

How would you explain process transparency in the context of Business Process Management?

- A. Automate processes into the company process structure
- B. Highlight departmental boundaries in larger process models
- C. Start an investigation to grasp all relevant data at a glance
- D. Structure all processes and provide drill-down navigation from the value-chain level to the actual process

Answer: D

Explanation:

Process transparency in Business Process Management ensures stakeholders have clear visibility into process structures and performance. The SAP Signavio Process Transformation Suite Documentation explains:

* Exact Extract:"Process transparency in BPM is achieved by structuring all processes hierarchically and providing drill-down navigation from high-level value chains to detailed process models, enabling stakeholders to understand process flows and performance at various levels." (SAP Signavio Process Transformation Suite Overview, section on "Process Transparency").

* Explanation:

* Option B (Structure all processes and provide drill-down navigation from the value-chain level to the actual process):This is correct as process transparency involves organizing processes in a hierarchical structure (e.g., value chains to subprocesses) and enabling users to navigate from high-level overviews to detailed models, as supported by SAP Signavio Process Manager and Collaboration Hub.

* Option A (Highlight departmental boundaries in larger process models)is incorrect as transparency focuses on process clarity, not emphasizing departmental divisions, which may be a modeling choice but not the definition.

* Option C (Automate processes into the company process structure)is incorrect because automation is a separate BPM activity, not a component of transparency.

* Option D (Start an investigation to grasp all relevant data at a glance)is incorrect as investigations are specific to Process Intelligence analysis, not the broader concept of BPM transparency.

Reference:SAP Signavio Process Transformation Suite Overview, section on "Process Transparency"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 2: BPM Concepts.

NEW QUESTION # 61

What are some types of subprocesses that exist in BPMN?Note: There are 2 correct answers to this question.

- A. Expanded subprocess
- B. Supported subprocess
- C. Grouped subprocess
- D. Collapsed subprocess

Answer: A,D

NEW QUESTION # 62

In SAP Signavio, what is the primary function of the Process Funnel Widget?

- A. To visualize process completion rates across different pathways
- B. To display the flow and deviations of selected process instances
- C. To compare performance metrics across different processes
- D. To identify and correct syntax errors in process models

Answer: A

NEW QUESTION # 63

What is a core capability of the transaction code analysis?

- A. It can check the number of transaction codes used on average for one end-to-end process.
- B. It can show the various ways processes are executed in reality across the entire organization.
- C. It can show the average ways processes are executed in a particular company code.
- D. It can check the number of transaction codes used on average for each process step and by company code.

Answer: D

NEW QUESTION # 64
