Implement Power Virtual Agent Chatbots: 10-15%

- Creating Chatbots: the students are required to demonstrate that they are proficient in assigning chatbots to environments; diagnosing and monitoring bot performance, topic usage, and usage; publishing & sharing chatbots.
- Configuring Entities: this section covers expertise in implementing entities in conversations as well as variables for storing data.
- Configuring Topics: this domain requires your skills in creating questions, conditions, and messages; defining conversation triggers for topics; extracting topics from web pages.

Microsoft PL-200 exam is a proctored, online exam that comprises 40-60 multiple-choice questions. The time limit for the exam is two hours, and the minimum passing score is 700. Candidates can take the exam online or at a Pearson VUE testing center. Additionally, candidates can prepare for the exam through instructor-led training courses, Microsoft's online resources, and exam preparation guides. Once the candidate passes the exam, they become a certified Microsoft Power Platform functional consultant, which demonstrates their capability to solve business problems using the tools and functionalities of the platform.

Microsoft PL-200 (Microsoft Power Platform Functional Consultant) Exam is a certification that is designed for individuals who want to prove their skills and knowledge in working with the Microsoft Power Platform. PL-200 exam validates the ability of the candidate to perform functional tasks in creating and managing solutions that leverage the Power Platform. PL-200 exam is intended for individuals with a background in business analysis, solution architecture, and project management.

We can assure you that you will get the latest version of our PL-200 Training Materials for free from our company in the whole year after payment.

Microsoft Power Platform Functional Consultant Sample Questions (Q245-Q250):

NEW QUESTION # 245

A company creates a canvas app.

The app requires users to enter their social security number. The app should only display the last four digits when the user tabs to a different column.

You need to configure the app.

Which option should you use?

- A. Power BI DAX
- B. Business rule
- C. Business process flow
- D. Power Fx

Answer: C

NEW QUESTION # 246

You are using a development environment to add a new column to a system table. You plan to move the changes to a test environment they are complete.

The changes must meet the following requirements:

- * Must be clearly identified so that they are not confused with system components and components from other solutions.
- * Must not affect any existing components in the test environment.

You need to prepare a solution for deployment to the test environment.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Answer area

Create a new publisher.

Create a new unmanaged solution and select the correct publisher.

Add the table to the solution and add the new column.

Run the solution checker on the solution.

Step 1: Create a new publisher

Solution publisher

Every app and other solution components such as entities you create or any customization you make is part of a solution. Because every solution has a publisher, you should create your own publisher rather than use the default. You specify the publisher when you create a solution.

Step 2: Create a new unmanaged solution and select the correct publisher unmanaged solution Unmanaged solutions are used in development environments while you make changes to your application.

Unmanaged solutions can be exported either as unmanaged or managed. Exported unmanaged versions of your solutions should be checked into your source control system. Unmanaged solutions should be considered your source for Microsoft Power Platform assets. When an unmanaged solution is deleted, only the solution container of any customizations included in it is deleted. All the unmanaged customizations remain in effect and belong to the default solution.

Step 3: Add the table top the solution and add the new column.

Step 4: Run the solution checker on the solution

Use solution checker to validate your model-driven apps in Power Apps.

NEW QUESTION # 247

You need to create a Power Automate desktop flow.

What are two possible ways to create the flow? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create models by using Microsoft Visio.
- B. Configure a pre-built template.
- C. Record mouse and keyboard events.
- D. Use pre-built actions.

Answer: C,D

Explanation:

C: Desktop flows are used to automate tasks on the Web or the desktop. Using Power Automate you can automate tasks on the desktop as well as the Web.

A: Alternatively, you can use the two legacy methods of creating desktop flows: Windows recorder (V1) and Selenium ID. With these you record mouse and keyboard events.

NEW QUESTION # 248

You create a JavaScript web resource named MyBusinessLogic. The code it contains uses functionality from a third-party JavaScript library.

You notice that an independent software vendor (ISV) solution uses the same third-party library in their managed solution.

You plan to deploy your solution to other environments by using a managed solution. The ISV solution might not be installed in the other environments.

You need to package the solution for deployment

What are two ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create a new JavaScript web resource by using the code from the third-party library. Add the new JavaScript web resource along with MyBusinessLogic to the solution.
- B. Add only the third-party JavaScript web resource to the solution.
- C. Add the code from the third-party JavaScript library to MyBusinessLogic. Add MyBusinessLogic to the solution.
- D. Add a copy of the JavaScript library from the ISV to the solution along with MyBusinessLogic.

Answer: C,D

Explanation:

Web resources in model-driven apps.

Web resources are virtual files that are stored in the Microsoft Dataverse database and that you can retrieve by using a unique URL address.

Capabilities of web resources.

Web resources represent files that can be used to extend the Dataverse web application such as html files, JavaScript, and CSS, and several image formats.

NEW QUESTION # 249

Your organization does not permit the use of custom code for solutions.

You need to create a view that can be viewed by all users in an organization.

Where should you create the view?

- A. Microsoft Visual Studio
- B. List view of the entity
- C. Templates area
- D. Maker portal

Answer: D

Explanation:

If you create the view from the List view of the entity then it is a personal view, it will not automatically be available to all users in the organization.

If you create the view from the maker portal and add it to each Model Driven App users are using.

Before Model Driven apps all system views were automatically available to all users in the organization.
