Free PDF 2026 Useful Splunk Valid Test SPLK-2002 Tutorial

Users do not need to spend too much time on SPLK-2002 questions torrent, only need to use their time pieces for efficient learning, the cost is about 20 to 30 hours, users can easily master the test key and difficulties of questions and answers of SPLK-2002 prep guide, and in such a short time acquisition of accurate examination skills, better answer out of step, so as to realize high pass the qualification test, has obtained the corresponding qualification certificate. Differ as a result the SPLK-2002 Questions torrent geared to the needs of the user level, cultural level is uneven, have a plenty of college students in school, have a plenty of work for workers, and even some low education level of people laid off.

The Splunk Enterprise Certified Architect SPLK-2002 test has been formed to explore the skills of enterprise architects and validate them to ensure efficient work. The exam focuses on how well the professional can use the Splunk Deployment Methodology and assesses if one can make use of the best practices needed to plan and collect data as well as size it for a distributed placement. The candidate will also have to showcase his or her abilities in managing and troubleshooting a standard distribution deployment using an indexer along with search head clusters.

Splunk SPLK-2002: Splunk Enterprise Certified Architect Exam topics

Candidates must know the exam topics before they start preparation. Because it will help them in hitting the core. Our **splk-2002 exam dumps** will include the following topics:

Module 1 - Introduction

- Overview of Buttercup Games Inc.

Module 2 - What is Splunk?

- Getting data into Splunk
- Splunk components
- Installing Splunk

Module 3 - Introduction to Splunk's User Interface

- Learn basic navigation in Splunk
- Understand the uses of Splunk
- Customizing your user settings
- Define Splunk Apps

Module 4 - Basic Searching

- Control a search job
- Run basic searches
- Save search results
- Work with events
- Use autocomplete to help build a search
- Set the time range of a search

Module 5 - Using Fields in Searches

- Use fields in searches
- Understand fields
- Use the fields sidebar

Module 6 - Search Language Fundamentals

- Use autocomplete and syntax highlighting
- Specify indexes in searches
- Use SPL search commands to perform searches
- Examine the search pipeline
- Review basic search commands and general search practices

Module 7 - Using Basic Transforming Commands

- The stats command
- The rare command
- The top command

Module 8 - Creating Reports and Dashboards

- Edit reports
- Edit a dashboard
- Save a search as a report

Module 9 - Datasets and the Common Information Model

- What is the Common Information Model (CIM)?
- Naming conventions
- What are datasets?

Module 10 - Creating and Using Lookups

- Configure an automatic lookup
- Create a lookup file and create a lookup definition
- Describe lookups

Module 11 - Creating Scheduled Reports and Alerts

- Describe alerts
- Create alerts
- Configure scheduled reports
- View fired alerts
- Describe scheduled reports

Module 12 - Using Pivot

- Add a pivot report to a dashboard

- Describe Pivot
- Create a pivot report
- Select a data model object
- Understand the relationship between data models and pivot

Test SPLK-2002 Dumps Pdf, SPLK-2002 New Dumps Ppt

Of course, when we review a qualifying exam, we can't be closed-door. We should pay attention to the new policies and information related to the test SPLK-2002 certification. For the convenience of the users, the SPLK-2002 test materials will be updated on the homepage and timely update the information related to the qualification examination. As a result, the SPLK-2002 Test Prep can help users to spend the least time, know the test information directly, let users save time and used their time in learning the new hot spot concerning about the knowledge content.

Splunk Enterprise Certified Architect Sample Questions (Q11-Q16):

NEW QUESTION # 11
When adding or rejoining a member to a search head cluster, the following error is displayed:
Error pulling configurations from the search head cluster captain; consider performing a destructive configuration resync on this search head cluster member.
What corrective action should be taken?

- A. Run the splunk apply shcluster-bundle command from the deployer.
- B. Run the splunk resync shcluster-replicated-config command on this member.
- C. Restart the search head.
- D. Run the clean raft command on all members of the search head cluster.

Answer: B

Explanation:
Explanation
https://community.splunk.com/t5/Deployment-Architecture/How-to-resolve-error-quot-Error-pulling-configurati

NEW QUESTION # 12
A Splunk instance has the following settings in SPLUNK_HOME/etc/system/local/server.conf:
[clustering]
mode = master
replication_factor = 2
pass4SymmKey = password123
Which of the following statements describe this Splunk instance? (Select all that apply.)

- A. This Splunk instance needs to be restarted.
- B. This is a multi-site cluster.
- C. This cluster's search factor is 2.
- D. This instance is missing the master_uri attribute.

Answer: A,D

Explanation:
Explanation
The Splunk instance with the given settings in SPLUNK_HOME/etc/system/local/server.conf is missing the master_uri attribute and needs to be restarted. The master_uri attribute is required for the master node to communicate with the peer nodes and the search head cluster. The master_uri attribute specifies the host name and port number of the master node. Without this attribute, the master node cannot function properly. The Splunk instance also needs to be restarted for the changes in the server.conf file to take effect.
The replication_factor setting determines how many copies of each bucket are maintained across the peer nodes.
The search factor is a separate setting that determines how many searchable copies of each bucket are maintained across the peer nodes. The search factor is not specified in the given settings, so it defaults to the same value as the replication factor, which is 2.
This is not a multi-site cluster, because the site attribute is not specified in the clustering stanza. A multi-site cluster is a cluster that

spans multiple geographic locations, or sites, and has different replication and search factors for each site.

NEW QUESTION # 13

New data has been added to a monitor input file. However, searches only show older data.
Which splunkd. log channel would help troubleshoot this issue?

- A. ModularInputs
- B. TailingProcessor
- C. ChunkedLBProcessor
- D. ArchiveProcessor

Answer: B

Explanation:
The TailingProcessor channel in the splunkd.log file would help troubleshoot this issue, because it contains information about the files that Splunk monitors and indexes, such as the file path, size, modification time, and CRC checksum. It also logs any errors or warnings that occur during the file monitoring process, such as permission issues, file rotation, or file truncation. The TailingProcessor channel can help identify if Splunk is reading the new data from the monitor input file or not, and what might be causing the problem. Option B is the correct answer. Option A is incorrect because the ModularInputs channel logs information about the modular inputs that Splunk uses to collect data from external sources, such as scripts, APIs, or custom applications. It does not log information about the monitor input file. Option C is incorrect because the ChunkedLBProcessor channel logs information about the load balancing process that Splunk uses to distribute data among multiple indexers. It does not log information about the monitor input file. Option D is incorrect because the ArchiveProcessor channel logs information about the archive process that Splunk uses to move data from the hot/warm buckets to the cold/frozen buckets. It does not log information about the monitor input file12

NEW QUESTION # 14

Which of the following are client filters available in serverclass.conf? (Select all that apply.)

- A. IP address.
- B. Platform (machine type).
- C. DNS name.
- D. Splunk server role.

Answer: A,C

Explanation:
Explanation/Reference: https://docs.splunk.com/Documentation/Splunk/7.3.1/Updating/
Filterclients#Define_filters_through_serverclass.conf

NEW QUESTION # 15

What does setting site=site0 on all Search Head Cluster members do in a multi-site indexer cluster?

- A. Enables automatic search site affinity discovery.
- B. Disables search site affinity.
- C. Sets all members to dynamic captaincy.
- D. Enables multisite search artifact replication.

Answer: B

Explanation:
Explanation
Setting site=site0 on all Search Head Cluster members disables search site affinity. Search site affinity is a feature that allows search heads to preferentially search the peer nodes that are in the same site as the search head, to reduce network latency and bandwidth consumption. By setting site=site0, which is a special value that indicates no site, the search heads will search all peer nodes regardless of their site. Setting site=site0 does not set all members to dynamic captaincy, enable multisite search artifact replication,

or enable automatic search site affinity discovery. Dynamic captaincy is a feature that allows any member to become the captain, and it is enabled by default. Multisite search artifact replication is a feature that allows search artifacts to be replicated across sites, and it is enabled by setting site_replication_factor to a value greater than 1. Automatic search site affinity discovery is a feature that allows search heads to automatically determine their site based on the network latency to the peer nodes, and it is enabled by setting site=auto

NEW QUESTION # 16

......

Our SPLK-2002 preparation materials will be the good helper for your qualification certification. We are concentrating on providing high-quality authorized SPLK-2002 study guide all over the world so that you can clear SPLK-2002 exam one time. Our SPLK-2002 reliable exam bootcamp materials contain three formats: PDF version, Soft test engine and APP test engine so that our SPLK-2002 Exam Questions are enough to satisfy different candidates' habits and cover nearly full questions & answers of the SPLK-2002 real test.
