And our APP version of API-580 practice guide can be available with all kinds of eletronic devices.

API Risk Based Inspection Professional Sample Questions (Q13-Q18):

NEW QUESTION # 13
In RBI analysis, dividing process units into groups of equipment that have common characteristics is:

- A. useful only for common types of equipment.
- B. useful as a means of screening together and saving time.
- C. to be avoided because every equipment item is unique.
- D. not permitted unless equipment is in identical service.

Answer: B

Explanation:
API 580, Section 6.3.5 states:
"It is often advantageous to group equipment within a process unit into systems, loops, or circuits where common environmental operating conditions exist... By dividing a process unit into systems, the equipment can be screened together, saving time compared to treating each piece of equipment separately." Grouping allows for more efficient screening and risk prioritization without needing to analyze each item in isolation, provided the conditions are similar.
Reference: API 580, 2nd Edition (2016), Section 6.3.5

NEW QUESTION # 14
