## 2026 Study FCP\_FAZ\_AN-7.6 Demo | Valid Valid Dumps FCP\_FAZ\_AN-7.6 Questions: FCP - FortiAnalyzer 7.6 Analyst

We give customers the privileges to check the content of our FCP\_FAZ\_AN-7.6 real dumps before placing orders. Such high quality and low price traits of our FCP\_FAZ\_AN-7.6 guide materials make exam candidates reassured. The free demos of FCP\_FAZ\_AN-7.6 study quiz include a small part of the real questions and they exemplify the basic arrangement of our FCP\_FAZ\_AN-7.6 real test. They also convey an atmosphere of high quality and prudent attitude we make.

### Fortinet FCP - FortiAnalyzer 7.6 Analyst Sample Questions (Q31-Q36):

#### NEW QUESTION # 31

You need to move reports between two ADOMs.  
Which two statements are true? (Choose two.)

- A. The data and time will be appointed to the original report name to avoid conflicts.
- B. The ADOMs must be compatible types.
- C. You need to convert the reports into templates first.
- D. All charts and datasets associated with the report will be imported together.

Answer: B,D

## NEW QUESTION # 32

Exhibit.

**SQL query**

**SQL Schema**

Table "logs" has the following fields:

id, bid, dvid, itime, dtime, euid, epid, dsteuid, dstepid, logflag, logver, sfid, type, subtype, level, action, utnaction, policyid, sessionid, srcip, dstip, tranip, transip, srcport, dstport, transport, transport, transisp, duration, proto, vrf, slot, sentbyte, rcvbyte, sentdelta, rcvdelta, sentpkt, rcvpkt, logid, user, unauthuser, dstunauthuser, srcname, dstname, group, service, app, appcat, fctuid, srcintfrole, dstintfrole, srcserver, dstserver,

**Results**

Source IP	Destination Port
10.0.1.10	443
10.0.1.10	123
10.0.1.10	80
10.0.1.10	53
10.0.1.10	22

A FortiAnalyzer analyst is customizing a SQL query to use in a report. Which SQL query should the analyst run to get the expected results?

- A. 

```
SELECT srcip AS "Source IP", dstport AS "Destination Port"
FROM $log
WHERE $filter AND srcip = '10.0.1.10'
ORDER BY dstport
GROUP BY srcip, dstport DESC
```
- B. 

```
SELECT srcip AS "Source IP", dstport AS "Destination Port"
FROM $log
WHERE $filter AND srcip = '10.0.1.10'
GROUP BY srcip, dstport
ORDER BY dstport DESC
```
- C. 

```
SELECT srcip AS "Source IP", dstport AS "Destination Port"
FROM $log
WHERE $filter AND srcip = '10.0.1.10'
GROUP BY srcip, dstport
ORDER BY dstport, srcip
```
- D. 

```
SELECT srcip AS "Source IP", dstport AS "Destination Port"
ORDER BY dstport DESC
GROUP BY srcip, dstport
FROM $log
WHERE $filter AND srcip = '10.0.1.10'
```

Answer: A

Explanation:

The requirement here is to construct a SQL query that retrieves logs with specific fields, namely "Source IP" and "Destination Port," for entries where the source IP address matches 10.0.1.10. The correct syntax is essential for selecting, filtering, ordering, and grouping the results as shown in the expected outcome.

Analysis of the Options:

\* Option A Explanation:

\* SELECT srcip AS "Source IP", dstport AS "Destination Port": This syntax selects srcip and dstport, renaming them to "Source IP" and "Destination Port" respectively in the output.

\* FROM \$log: Specifies the log table as the data source.

\* WHERE \$filter AND srcip = '10.0.1.10': This line filters logs to only include entries with srcip equal to 10.0.1.10.

\* ORDER BY dstport DESC: Orders the results in descending order by dstport.

\* GROUP BY srcip, dstport: Groups results by srcip and dstport, which is valid SQL syntax.

This option meets all the requirements to get the expected results accurately.

\* Option B Explanation:

\* WHERE \$filter AND Source IP != '10.0.1.10': Uses != instead of=. This would exclude logs from the specified IP 10.0.1.10, which is contrary to the expected result.

\* Option C Explanation:

\* The ORDER BY clause appears before the FROM clause, which is incorrect syntax. SQL requires the FROM clause to follow the SELECT clause directly.

\* Option D Explanation:

\* The GROUP BY clause should follow the FROM clause. However, here, it's located after WHERE, making it syntactically incorrect.

Conclusion:

\* Correct Answer: A. Option A

\* This option aligns perfectly with standard SQL syntax and filters correctly for srcip = '10.0.1.10', while ordering and grouping as required.

### NEW QUESTION # 33

(Refer to the exhibit.

<input type="checkbox"/>	Event ↕	Event Status ↕	Event Type ↕	Severity ↕
<input type="checkbox"/>	bujuqtatbsd.findhere.org (1)	Mitigated	Web Filter	Low
<input type="checkbox"/>	Web request to suspicious destination from 10.0.3.20 blocked	Mitigated	Web Filter	Low

Which statement about the displayed event is correct? (Choose one answer))

- A. The security risk was blocked.
- B. The security risk was dropped.
- C. The security event risk is from an application control log.
- D. The risk source is isolated.

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of knowledge of FortiAnalyzer 7.6 Study guide documents:

The exhibit shows the event Event Status = Mitigated and Event Type = Web Filter, with the event message indicating the web request was blocked.

The study guide defines Mitigated events as follows: "Mitigated: The security risk is mitigated by being blocked or dropped." This means a mitigated status corresponds to enforcement that prevented the risk (block/drop), not a condition where the source is isolated.

It also distinguishes Contained events from mitigated ones: "Contained: The risk source is isolated." Since the exhibit clearly shows Mitigated (not Contained), option B is incorrect.

Additionally, the study guide notes: "Generally, you can acknowledge mitigated events because the related traffic was blocked by the firewall." This aligns directly with the exhibit's "blocked" wording and supports that the correct interpretation is that the security risk was blocked.

Finally, the event type displayed is Web Filter, not application control, so option D is incorrect.

Therefore, the correct statement is C. The security risk was blocked.

### NEW QUESTION # 34

Which log will generate an event with the status Contained?

- A. An IPS log with action=pass.
- **B. An AV log with action=quarantine.**
- C. An AppControl log with action=blocked.
- D. A WebFilter log with action=dropped.

**Answer: B**

#### NEW QUESTION # 35

Why must you wait for several minutes before you run a playbook that you just created?

- A. FortiAnalyzer needs that time to ensure there are no other playbooks running.
- **B. FortiAnalyzer needs that time to parse the new playbook.**
- C. FortiAnalyzer needs that time to debug the new playbook.
- D. FortiAnalyzer needs that time to back up the current playbooks.

**Answer: B**

#### NEW QUESTION # 36

.....

The FCP\_FAZ\_AN-7.6 prep torrent we provide will cost you less time and energy. You only need relatively little time to review and prepare. After all, many people who prepare for the FCP\_FAZ\_AN-7.6 exam, either the office workers or the students, are all busy. The office workers are both busy in their jobs and their family life and the students must learn or do other things. But the FCP\_FAZ\_AN-7.6 Test Prep we provide are compiled elaborately and it makes you use less time and energy to learn and provide the study materials of high quality and seizes the focus the exam. It lets you master the most information and costs you the least time and energy.
