

# Juniper JN0-481 Reliable Exam Tutorial - Exam JN0-481 Topic

DOWNLOAD the newest Prep4away JN0-481 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=14VgJBao4t6AycmAFCKOPGDi-F-K4HmPp>

Since it is obvious that different people have different preferences, we have prepared three kinds of different versions of our JN0-481 practice test, namely, PDF version, Online App version and software version. Last but not least, our customers can accumulate exam experience as well as improving their exam skills in the mock exam. There is no limitation on our software version of JN0-481 practice materials about how many computers our customers used to download it, but it can only be operated under the Windows operation system. I strongly believe that you can find the version you want in multiple choices of our JN0-481 practice test.

Our company is open-handed to offer benefits at intervals, with JN0-481 learning questions priced with reasonable prices. Almost all kinds of working staffs can afford our price, even the students. And we will give some discounts from time to time. Although our JN0-481 practice materials are reasonably available, their value is in-estimate. We offer hearty help for your wish of certificate of the JN0-481 exam.

## JN0-481 Reliable Exam Tutorial & Prep4away - Leader in Certification Exam Materials & Juniper Data Center, Specialist (JNCIS-DC)

There is a high demand for Data Center, Specialist (JNCIS-DC) certification, therefore there is an increase in the number of Juniper JN0-481 exam candidates. Many resources are available on the internet to prepare for the Data Center, Specialist (JNCIS-DC) exam. Prep4away is one of the best certification exam preparation material providers where you can find newly released Juniper JN0-481 Dumps for your exam preparation.

## Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q51-Q56):

### NEW QUESTION # 51

You have designed your fabric in Juniper Apstra prior to deploying the network devices. Which Apstra element in the Staged tab would be used to assist the team that is installing and cabling the devices?

- A. Connectivity Templates
- B. Virtual Networks table
- C. Links table
- D. Managed Devices list

**Answer: C**

Explanation:

The Links table in the Staged tab shows the physical connections between the devices in the fabric. It provides information such as the source and destination device names, hostnames, serial numbers, roles, interfaces, and link status. The Links table can be used to assist the team that is installing and cabling the devices by verifying that the devices are connected correctly and that the links are operational. The Links table can also be used to troubleshoot any connectivity issues that may arise during the installation process.

#### NEW QUESTION # 52

What does EVPN use to identify which remote leaf device advertised the EVPN route?

- A. a route target value
- B. a route distinguisher value
- C. a VRF target value
- D. a community tag

**Answer: B**

Explanation:

EVPN uses a route distinguisher (RD) value to identify which remote leaf device advertised the EVPN route. An RD is a 64-bit value that is prepended to the EVPN NLRI to create a unique VPNv4 or VPNv6 prefix. The RD value is usually derived from the IP address of the PE that originates the EVPN route. By comparing the RD values of different EVPN routes, a PE can determine which remote PE advertised the route and which VRF the route belongs to.

#### NEW QUESTION # 53

You want to keep virtual networks isolated from each other within the Juniper Apstra system. In this scenario, what are three ways to accomplish this task? (Choose three.)

- A. Use Connectivity Templates to block access within the same Routing Zone.
- B. Disable Route Target exports when creating the Routing Zones.
- C. Disable IPv4 connectivity when creating the virtual network within the same Routing Zone.
- D. Enable Security Policy for virtual networks in the same Routing Zone.
- E. Put each network in different Routing Zones.

**Answer: A,D,E**

Explanation:

To keep virtual networks isolated from each other within the Juniper Apstra system, you can use one or more of the following methods:

Enable Security Policy for virtual networks in the same Routing Zone. This allows you to define rules that control the traffic flow between different virtual networks within the same routing zone.

You can specify the source and destination virtual networks, the protocol, the port, and the action (allow or deny) for each rule. The security policy is applied on the ingress interface of the leaf devices.

Use Connectivity Templates to block access within the same Routing Zone. This allows you to customize the connectivity between different racks within the same routing zone. You can create templates that define the link type, the routing protocol, and the access control list (ACL) for each rack pair. The ACL can be used to filter the traffic based on the source and destination IP addresses, the protocol, and the port.

Put each network in different Routing Zones. This allows you to create logical boundaries between different virtual networks based on the route target (RT) values. A routing zone is a collection of virtual networks that share the same RT for importing and exporting routes. Virtual networks in different routing zones do not exchange routes with each other, unless you configure remote EVPN gateways to connect them.

#### NEW QUESTION # 54

Referring to the exhibit, how many rack types are used in the staged blueprint?

Filter selected by ☒ all ☐ selected only ☐ unselected only

<input type="checkbox"/>	Name	Rack Type
<input type="checkbox"/>	borderleaf_001	BorderLeaf
<input type="checkbox"/>	serverrack_001	ServerRack
<input type="checkbox"/>	serverrack_002	ServerRack
<input type="checkbox"/>	serverrack_003	ServerRack
<input type="checkbox"/>	serverrack_004	ServerRack
<input type="checkbox"/>	serverrack_005	ServerRack
<input type="checkbox"/>	serverrack_006	ServerRack

- A. seven
- **B. two**
- C. six
- D. three

**Answer: B**

Explanation:

Referring to the exhibit, the image shows the Racks table under the Staged menu in the Juniper Apstra UI. The Racks table displays the details of the racks that are used in the blueprint, such as the name, rack type, and date. The rack type is a resource that defines the type and number of leaf devices, access switches, and/or generic systems that are used in rack builds. The image shows seven racks in the table, but only two rack types: BorderLeaf and ServerRack.

#### NEW QUESTION # 55

You are adding a new switch to Juniper Apstra software. The Managed Devices page shows the "0 OS- Quarantined" status. What is the proper next step to make the device ready for use in a blueprint?

- A. Install the agent for the device.
- B. Take the device out of maintenance mode.
- C. Take the device out of drain state.
- **D. Acknowledge the device.**

**Answer: D**

Explanation:

When a new switch is added to Juniper Apstra software, it initially shows the "0 OS-Quarantined" status, which means that the device is not yet managed by Apstra and has not been assigned to any blueprint. The proper next step to make the device ready for use in a blueprint is to acknowledge the device, which is a manual action that confirms the device identity and ownership.

Acknowledging the device changes its status to "OOS-Ready", which means that the device is ready to be assigned to a blueprint and deployed.

## NEW QUESTION # 56

.....

Learning is like rowing upstream; not to advance is to fall back. People are a progressive social group. If you don't progress and surpass yourself, you will lose many opportunities to realize your life value. Our JN0-481 study materials goal is to help users to challenge the impossible, to break the bottleneck of their own. A lot of people can't do a thing because they don't have the ability, the fact is, they don't understand the meaning of persistence, and soon give up. Our JN0-481 Study Materials will help you overcome your laziness and make you a persistent person. Change needs determination, so choose our product quickly!

**Exam JN0-481 Topic:** <https://www.prep4away.com/Juniper-certification/braindumps.JN0-481.etc.file.html>

Juniper JN0-481 Reliable Exam Tutorial This helps improve errors and strengthen preparation, Environment you encounter during the practice test is similar to the real Juniper JN0-481 Exam, Juniper JN0-481 Reliable Exam Tutorial Since it is a portable format, it can be used on a smartphone, tablet, or any other smart device, If you use our products, I believe it will be very easy for you to successfully pass your JN0-481 exam.

Consuming existing OData feeds and exporting JN0-481 LightSwitch data sources as OData services is available out of the box, and no effort is needed from the developer, Scenarios are JN0-481 Reliable Exam Tutorial similar, in that they can be used to define how someone might use a software system.

## JN0-481 Dumps - Data Center, Specialist (JNCIS-DC) Exam Questions [2026]

This helps improve errors and strengthen preparation, JN0-481 Reliable Exam Tutorial Environment you encounter during the practice test is similar to the real Juniper JN0-481 Exam, Since it is a portable format, it can be used on a smartphone, tablet, or any other smart device.

If you use our products, I believe it will be very easy for you to successfully pass your JN0-481 exam, So your chance of getting success will be increased greatly by our JN0-481 exam questions.
