The clients can use the practice software to test if they have mastered the PEGACPSA24V1 Test Guide and use the function of stimulating the test to improve their performances in the real test. So our products are absolutely your first choice to prepare for the test PEGACPSA24V1 certification.

Pegasystems Certified Pega System Architect 24 Sample Questions (Q272-Q277):

NEW QUESTION # 272

Which feature in Pega enables real-time analysis of case data?

- A. Work Queues
- B. Data Pages
- C. SLA Rules
- **D. Insights**

Answer: D

Explanation:

Insights provide real-time data analysis by allowing users to create interactive reports and visualizations.

They enable quick decision-making by displaying trends, case statuses, and performance metrics. This improves business intelligence

and case management efficiency. Insights ensure data-driven decision- making.

NEW QUESTION # 273

Which tool in Pega allows viewing and managing class structures?

- A. SLA Dashboard
- B. Work Queue Monitor
- C. Class Explorer
- D. Case Dependency Tracker

Answer: C

Explanation:

The Class Explorer provides a visual representation of class hierarchies, helping developers understand inheritance and rule organization. This makes troubleshooting and debugging easier and more structured. SLA dashboards, work queues, and case dependencies do not manage class structures.

NEW QUESTION # 274

Which component allows a Pega application to connect to an external SOAP service?

- A. Connect-SOAP
- B. Data Transform
- C. SLA Rule
- D. Case Dependency

Answer: A

Explanation:

A Connect-SOAP Rule enables data exchange with external SOAP-based web services. This is useful for legacy system integrations, financial transactions, and enterprise applications. SOAP services support structured XML-based communication. This ensures secure and reliable interactions with external data sources.

NEW QUESTION # 275

How does Pega handle potential duplicate cases when a match is found?

- A. The system automatically deletes the duplicate case
- B. The system notifies the user to take action
- C. The duplicate case is merged with the existing case
- D. The system marks both cases as resolved

Answer: B

Explanation:

When a potential duplicate case is detected, Pega notifies the user to take action. The user can review and decide whether to proceed, merge, or close the duplicate. This prevents unintentional duplicate processing while maintaining data integrity. Automatic deletion is not performed to avoid data loss.

NEW QUESTION # 276

Which two visibility settings allow dynamically displaying UI elements? (Choose Two)

- A. Work Queue Filtering
- B. When Condition
- C. Visibility Condition
- D. SLA Processing

Answer: B,C

Explanation:

When Conditions and Visibility Conditions control when a UI element is displayed, hidden, or disabled based on business logic. These ensure a clean and relevant user experience by hiding unnecessary fields. SLA processing and work queue filtering are unrelated to UI visibility.

NEW QUESTION # 277

.....
