P.S. Free 2026 HP HPE7-A03 dumps are available on Google Drive shared by PracticeMaterial: [https://drive.google.com/open?id=1d\\_ZQo15uQzMF8fyG4v9ISyXOInNOKPCb](https://drive.google.com/open?id=1d_ZQo15uQzMF8fyG4v9ISyXOInNOKPCb)

You may attend many certificate exams but you unfortunately always fail in or the certificates you get can't play the rules you want and help you a lot. So what certificate exam should you attend and what method should you use to let the certificate play its due role? You should choose the test HP certification and buy our HPE7-A03 learning file to solve the problem. Passing the test HPE7-A03 certification can help you increase your wage and be promoted easily and buying our HPE7-A03 prep guide dump can help you pass the test smoothly. Our HPE7-A03 Certification material is closely linked with the test and the popular trend among the industries and provides all the information about the test. The answers and questions seize the vital points and are verified by the industry experts. Diversified functions can help you get an all-around preparation for the test. Our online customer service replies the clients' questions about our HPE7-A03 certification material at any time.

## HP HPE7-A03 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Propose the Solution: The focal point of this topic is creating the design documentation and the final design. Moreover, the topic also focuses on presenting the solution.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Analyze Requirements: It focuses on determining possible high-level solutions. The topic also discusses mapping the needs into technical solutions and evaluating the proposed solution against project objectives and dependencies. Moreover, it also focuses on documenting assumptions.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• Architect the Solution: It measures your knowledge about identifying the solution options, designing high-level topologies, selecting the correct products, and determining the suitable overlay and underlay design. Additionally, the topic discusses how to verify that the design meets the original requirements.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Discover Requirements: This topic defines the goals and identifies the current environment and the objectives. Lastly, it also focuses on collecting information.</li> </ul>

The PDF file of HPE7-A03 real exam questions is easy to use on laptops, tablets, and smartphones. We have added all the HP HPE7-A03 questions, which have a chance to appear in the HP HPE7-A03 real test. Our Aruba Certified Campus Access Architect Exam (HPE7-A03) dumps PDF exam questions are beneficial to prepare for the test in less time.

## HP Aruba Certified Campus Access Architect Exam Sample Questions (Q19-Q24):

### NEW QUESTION # 19

A customer wants to have the ability to show network usage. Which product would allow them to have this visibility?

- A. Central
- B. Aruba OS 8.X
- C. ClearPass
- D. UXI

**Answer: A**

Explanation:

Aruba Central provides a cloud-based management platform for managing and monitoring Aruba Instant APs, switches, and branch gateways. It offers a comprehensive dashboard that gives insights into network usage, health, and performance metrics. Central allows network administrators to have visibility over their entire network infrastructure from a single pane of glass, including detailed usage statistics, which can be broken down by device, application, and time.

This visibility into network usage is crucial for optimizing network performance, planning capacity, and understanding user behavior. Aruba Central's analytics and reporting capabilities enable customers to track and analyze network usage, making it the appropriate product choice for customers wanting to monitor their network usage closely.

### NEW QUESTION # 20

It has been identified that the client's existing network is having to retransmit packets due to possible hardware or configuration issues. A review of hardware configuration and transport reliability will need to be assessed prior to completing the new design. What should this phenomenon be classified as?

- A. 
- B. 
- C. 

**Answer: A**

Explanation:

The phenomenon where packets have to be retransmitted due to possible hardware or configuration issues is classified as "Loss," depicted in Option B. Packet loss occurs when one or more packets of data traveling across a network fail to reach their destination, which can be caused by errors in data transmission, typically resulting from network congestion, hardware failure, or configuration errors. When packet loss occurs, protocols like TCP ensure that the data is retransmitted so that the integrity of the communication is maintained. In a network design, ensuring the reliability of hardware and proper configuration is critical to minimize packet loss.

### NEW QUESTION # 21

A global cruise line company needs to refresh its current fleet. They will refresh the insides of the ship to be cost-effective and increase their sustainability. They will replace the complete WLAN/LAN hardware of the ship. In this refresh, the company will not refresh its current security requirements. The CIO also wants to limit the number of unused ports in the switches. Future expansion will always mean a refresh of hardware.

They start with the smallest ship with a maximum of 800 guests

Each ship has a LAN infrastructure consisting of two core switches, up to 10 redundant distribution switches, and up to 500 access switches (400 cabins, 100 technical rooms). The Core switches are located in the MDF of the ship and the distribution switches are located in the IDFs of the ship. Each cabin and technical room gets one single access switch.

The cabling structure of the ship will not be refreshed. Each IDF is connected to the MDF by SMF, of which two pairs are available for the interconnect between the core and distribution. The length of SM fiber between MDF and IDF is less than 300 meters (930 ft) and the type used is OS1. Each cabin is connected by a single

OM2 pair to the IDF, the maximum length is 60 meters (200 ft). Each technical room is connected by a single

OM2 pair to the IDF, with lengths between 100 and 150 meters (320 and 500 ft).

For each cabin/technical room the customer is looking to replace their current fan-less 2530/2540 without changing the requirements, except they need to upgrade the uplink to distribution switch to 10GbE to handle the increased network traffic, and the technical rooms need redundant power.

The WLAN infrastructure will be 1:1 refreshed without new cabling or new AP locations. Their WLAN Infrastructure is based on the 200/300 series Indoor and outdoor APs running InstantOS (less than 300 APs).

The customer has no change in WLAN requirements.

The cruise line company will replace its current Internet connection before the LAN/WLAN refresh. The new Internet connection will provide a 99.8% uptime, which is needed to ensure the paid guest Wi-Fi is always operational. With this new Internet connection, the CIO of the cruise line wants to base the design on the ESP architecture from Aruba because Internet connection is guaranteed.

Based on best practices, what should you recommend as the correct optic type for the connection between the IDF and the technical rooms?

- A. Aruba 10G SFP+ LC SR 300 m MMF Transceiver
- B. Aruba 10G LC BID! 40 km-0 1330/1270 XCVR
- C. Aruba 10GBASE-T SFP- RJ-45 30 m Cat6A Transceiver
- D. Aruba 10G SFP- LC LRM 220 m MMF Transceiver

**Answer: A**

Explanation:

For the connection between the IDF and the technical rooms, which requires support for lengths between 100 and 150 meters (320 and 500 ft), the Aruba 10G SFP+ LC SR 300 m MMF Transceiver is the recommended optic type. This transceiver is designed for short-range multimode fiber connections and can support distances up to 300 meters, making it suitable for the specified lengths within the technical rooms on the cruise ship. The SR (Short Range) designation ensures that this transceiver is optimized for the distances involved in connecting the IDFs to the technical rooms, providing high-speed 10GbE connectivity to meet the increased network traffic demands. This choice aligns with the cruise line company's requirements for a sustainable and cost-effective network refresh that accommodates future expansion without extensive unused capacities.

### NEW QUESTION # 22

XYZ Regional Hospital is an integrated healthcare system of hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 4x neighborhood health centers and 125 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced.

XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management that can provide uninterrupted availability of all systems.

Locations:

- XYZ Regional Hospital is located in New York City
- Dila Health Center is located in City A
- Mount Health Center is located in City B
- Rock Health Center is located in City C
- Branch clinics are located at different locations across the United States Requirements:
- Provide, via management software, one single pane of glass to manage wired and wireless LANs, and VPNs across campus, branch, and remote via web/cloud architecture providing near real-time insight, troubleshooting tools, and Service Level performance reporting.
- Seamless integration across wired, wireless, WAN, SD-Branch, IoT
- Provide secure wireless access to all the employees of the Regional Hospital and partners, as well as provide wireless Internet access to medical citizens when they visit our facilities.
- All-access points must support the following features and specifications: 802.11.ax (Wi-Fi 6E Certified)
- Security options including WP2/WPA3, 802.1X with RADIUS secure authentication
- Identify and authenticate every wireless and wired device
- End-to-end role-based security
- Seamless mobility across the hospital for medical teams, patients, and visitors
- Cuts Wi-Fi deployment times from days to hours and enables Zero-Touch deployments across the site
- Establishes a resilient, future-ready network infrastructure with the intelligence, scalability, and intuitive toolsets to meet emerging needs
- Fully redundant branch solution with dynamic path selection to the hospital A Regional Hospital will be implementing RADIUS authentication across all their switches. They are looking for a solution wherein they can use HPE Aruba Networking ClearPass Policy Manager to allow staff members from five different teams (AV team, security team, desktop/printer team, voice team, network & security team) to register these types of devices and control access to them to a specific team. This registration, visibility, and access control to devices must be self-service. In addition, device registration needs to be removable on a scheduled basis.

What is the most appropriate solution for the hospital's requirements?

- A. HPE Aruba Networking ClearPass Device Insight
- **B. HPE Aruba Networking ClearPass Device Registration**
- C. HPE Aruba Networking ClearPass Endpoint Repository
- D. HPE Aruba Networking ClearPass Device Profiler

**Answer: B**

Explanation:

ClearPass Device Registration provides self-service onboarding for non-802.1X devices, allows role-based ownership by different teams, and supports scheduled removal. This directly matches the hospital's requirement to let multiple staff groups register and control their own device types with automated lifecycle management.

#### NEW QUESTION # 23

A large financial institution is planning a network upgrade to support growing transaction volumes.

The company operates under strict regulatory compliance requirements and has a distributed office environment. What key considerations should be prioritized in the discovery phase?

- A. Implementing a Bring-Your-Own-Device (BYOD) policy
- B. Selecting the most affordable network hardware
- C. Prioritizing aesthetics in the network rack layout
- **D. Identifying compliance requirements and performance needs**

**Answer: D**

#### NEW QUESTION # 24

.....

If you ask how we can be so confident with our HPE7-A03 exam software, we will tell you that first our PracticeMaterial is an experienced IT software team; second we have more customers who have pass HPE7-A03 exam with the help of our products. HPE7-A03 Exam Certification is international recognized, and do you want this authority certificate? Then, you will easily get the certification with the help of our HPE7-A03 exam software.
