

# New C-AIG-2412 Test Registration, C-AIG-2412 Question Explanations

BTW, DOWNLOAD part of Dumpleader C-AIG-2412 dumps from Cloud Storage: <https://drive.google.com/open?id=1nxxFApY64GQpE2lCmYiJNxlytWZpYIse>

To maintain relevancy and top standard of SAP C-AIG-2412 exam questions, the Dumpleader has hired a team of experienced and qualified SAP C-AIG-2412 exam trainers. They work together and check every C-AIG-2412 exam practice test question thoroughly and ensure the top standard of C-AIG-2412 Exam Questions all the time. So you do not need to worry about the relevancy and top standard of SAP C-AIG-2412 exam practice test questions.

## SAP C-AIG-2412 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers SAP's Generative AI Hub, which acts as the central layer for designing and managing generative AI solutions. The exam tests knowledge of building, deploying, and connecting AI models to business scenarios through the Hub. Emphasis is placed on leveraging the Hub to streamline workflows and ensure scalable solutions that align with organizational needs.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Advanced AI Techniques with SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers advanced techniques available through SAP's Generative AI Hub. Candidates are assessed on their ability to design, optimize, and scale generative AI solutions that go beyond basic implementations. The focus includes applying sophisticated strategies to integrate advanced models, manage performance, and align AI-driven outcomes with complex enterprise goals.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>SAP AI Core: This section of the exam measures the skills of AI Developers and covers the fundamental components of SAP AI Core. Candidates are assessed on their ability to work with the core services that allow machine learning models to be deployed and managed within SAP environments. The focus is on understanding how AI Core fits into SAP's ecosystem and ensures smooth integration with enterprise applications.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Large Language Models (LLMs): This section of the exam measures the skills of AI Developers and covers the practical use of large language models in SAP environments. Candidates are expected to understand how LLMs can be applied to automate tasks, enhance decision-making, and improve user interaction within SAP systems. The exam evaluates knowledge of handling model selection, fine-tuning, and adapting LLMs to specific business cases.</li></ul>

## C-AIG-2412 Question Explanations - C-AIG-2412 Study Dumps

You choosing Dumpleader to help you pass SAP certification C-AIG-2412 exam is a wise choice. You can first online free download Dumpleader's trial version of exercises and answers about SAP Certification C-AIG-2412 Exam as a try, then you will be more confident to choose Dumpleader's product to prepare for SAP certification C-AIG-2412 exam. If you fail the exam, we will give you a full refund.

### SAP Certified Associate - SAP Generative AI Developer Sample Questions (Q40-Q45):

#### NEW QUESTION # 40

What is the purpose of splitting documents into smaller overlapping chunks in a RAG system?

- A. To improve the efficiency of encoding queries into vector representations
- B. To simplify the process of training the embedding model
- **C. To enable the matching of different relevant passages to user queries**
- D. To reduce the storage space required for the vector database

**Answer: C**

Explanation:

In Retrieval-Augmented Generation (RAG) systems, splitting documents into smaller overlapping chunks is a crucial preprocessing step that enhances the system's ability to match relevant passages to user queries.

1. Purpose of Splitting Documents into Smaller Overlapping Chunks:

\* Improved Retrieval Accuracy: Dividing documents into smaller, manageable segments allows the system to retrieve the most relevant chunks in response to a user query, thereby improving the precision of the information provided.

\* Context Preservation: Overlapping chunks ensure that contextual information is maintained across segments, which is essential for understanding the meaning and relevance of each chunk in relation to the query.

2. Benefits of This Approach:

\* Enhanced Matching: By having multiple overlapping chunks, the system increases the likelihood that at least one chunk will closely match the user's query, leading to more accurate and relevant responses.

\* Efficient Processing: Smaller chunks are easier to process and analyze, enabling the system to handle large documents more effectively and respond to queries promptly.

#### NEW QUESTION # 41

How can few-shot learning enhance LLM performance?

- A. By reducing overfitting through regularization techniques
- B. By enhancing the model's computational efficiency
- **C. By offering input-output pairs that exemplify the desired behavior**
- D. By providing a large training set to improve generalization

**Answer: C**

#### NEW QUESTION # 42

What defines SAP's approach to LLMs?

- A. Limiting LLM usage to non-business applications only
- **B. Ensuring ethical AI practices and seamless business integration**
- C. Focusing solely on reducing the computational cost of training LLMs
- D. Prioritizing the development of proprietary LLMs with no integration to existing systems

**Answer: B**

Explanation:

SAP's approach to Large Language Models (LLMs) is centered on integrating these powerful AI tools into its enterprise ecosystem while adhering to ethical standards. Unlike option A, SAP does not focus solely on proprietary LLMs without integration; instead, it leverages both proprietary and third-party models (e.g., via partnerships with providers like Azure OpenAI) to enhance business

applications. Option B is incorrect because reducing computational cost is not the sole focus-SAP prioritizes value delivery through integration with business processes. Option D is also inaccurate, as SAP explicitly targets business applications rather than limiting LLMs to non-business use. Option C is correct because SAP emphasizes ethical AI practices (e.g., through its AI Ethics Policy) and seamless integration with tools like SAP S/4HANA and SAP SuccessFactors, ensuring LLMs enhance enterprise workflows responsibly and effectively.

#### NEW QUESTION # 43

What are some benefits of the SAP AI Launchpad? Note: There are 2 correct answers to this question.

- A. Simplified model retraining and performance improvement.
- B. Integration with non-SAP platforms like Azure and AWS.
- C. Direct deployment of AI models to SAP HANA.
- D. Centralized AI lifecycle management for all AI scenarios.

**Answer: A,D**

#### NEW QUESTION # 44

How can Joule improve workforce productivity? Note: There are 2 correct answers to this question.

- A. By maintaining strict adherence to data privacy regulations.
- B. By offering generic task recommendations unrelated to specific roles.
- C. By resolving hardware malfunctions.
- D. By providing context-based role-specific task assistance.

**Answer: A,D**

#### NEW QUESTION # 45

.....

The C-AIG-2412 study materials from our company are compiled by a lot of excellent experts and professors in the field. In order to help all customers pass the exam in a short time, these excellent experts and professors tried their best to design the study version, which is very convenient for a lot of people who are preparing for the C-AIG-2412 Exam. You can find all the study materials about the exam by the study version from our company.
