Free PDF Quiz Snowflake - COF-C02 - SnowPro Core Certification Exam High Hit-Rate Mock Exam

The simplified information contained in our COF-C02 training guide is easy to understand without any difficulties. And our COF-C02 practice materials enjoy a high reputation considered as the most topping practice materials in this career for the merit of high-effective. A great number of candidates have already been benefited from them. So what are you waiting for? Come to have a try on our COF-C02 Study Materials and gain your success!

Snowflake SnowPro Core Certification Exam Sample Questions (Q97-Q102):

NEW QUESTION # 97

Which SQL statement will require a virtual warehouse to run?

- A. CREATE OR REPLACE TABLE TBL_EMPLOYEE (
EMP_ID NUMBER,
EMP_NAME VARCHAR(30),
EMP_SALARY NUMBER, DEPT VARCHAR(20)
);
- B. ALTER TABLE TBL_EMPLOYEE ADD COLUMN EMP_REGION VARCHAR(20);
- C. INSERT INTO TBL_EMPLOYEE(EMP_ID, EMP_NAME, EMP_SALARY, DEPT) VALUES(1,'Adam', 20000, 'Finance');
- D. SELECT COUNT(*) FROM TBL_EMPLOYEE;

Answer: C

Explanation:

A virtual warehouse in Snowflake is used to perform data processing tasks that require computational resources, such as queries that modify data or perform significant computation. Of the options provided:

* C. INSERT INTO TBL_EMPLOYEE(EMP_ID, EMP_NAME, EMP_SALARY, DEPT) VALUES (1,'Adam',20000,'Finance'); This SQL statement performs a data modification operation (DML) by inserting a new record into the TBL_EMPLOYEE table, which requires computational resources provided by a virtual warehouse to execute.

NEW QUESTION # 98

At what levels can a resource monitor be configured? (Select TWO).

- A. Virtual warehouse
- B. Database
- C. Organization
- D. Account
- E. Schema

Answer: A,D

Explanation:

Resource monitors in Snowflake can be configured at the account and virtual warehouse levels. They are used to track credit usage and control costs associated with running virtual warehouses. When certain thresholds are reached, resource monitors can trigger actions such as sending alerts or suspending warehouses to prevent excessive credit consumption. Reference: [COF-C02] SnowPro Core Certification Exam Study Guide

NEW QUESTION # 99

A Snowflake account administrator has set the resource monitors as shown in the diagram, with actions defined for each resource monitor as "Notify & Suspend Immediately".

What is the MAXIMUM limit of credits that Warehouse 2 can consume?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:

In the provided exhibit, Warehouse 2 is under Resource Monitor 2, which has a credit quota of 1000 credits.

However, it's important to note that warehouses can also draw from the account-level resource monitor if they consume their dedicated monitor's quota. In this exhibit, Resource Monitor 1 is set for the account with a credit quota of 500 credits.

The exhibit does not clearly show whether Warehouse 2 is also subject to the account-level Resource Monitor

1, but if we assume the typical case where all warehouses can draw from the account-level monitor, the maximum limit of credits Warehouse 2 can consume would be the sum of its dedicated resource monitor (Resource Monitor 2) and the account-level resource monitor (Resource Monitor 1).

Thus, Warehouse 2 can consume:

1000 credits from Resource Monitor 2

500 credits from Resource Monitor 1 (if applicable)

This gives a total of 1500 credits. Therefore, the maximum credit limit that Warehouse 2 can consume, taking into account the possibility of the account-level monitor's contribution, would be 1500 credits.

However, without explicit confirmation that Warehouse 2 can use credits from Resource Monitor 1, one would default to the specific resource monitor assigned to the warehouse, which is 1000 credits.

Given the available options, the closest and most accurate answer is B. 1500, as it represents the sum of credits from both monitors that potentially apply to Warehouse 2.

NEW QUESTION # 100

What happens when a virtual warehouse is resized?

- A. The warehouse will be suspended while the new compute resource is provisioned and will resume automatically once provisioning is complete.
- B. When increasing the size of an active warehouse the compute resource for all running and queued queries on the warehouse are affected
- C. When reducing the size of a warehouse the compute resources are removed only when they are no longer being used to execute any current statements.
- D. Users who are trying to use the warehouse will receive an error message until the resizing is complete

Answer: C

NEW QUESTION # 101

Which of the following are characteristics of security in Snowflake?

- A. Private communication to internal stages is allowed in the Snowflake Enterprise edition and higher.
- B. Account and user authentication is only available with the Snowflake Business Critical edition.
- C. Support for HIPAA and GDPR compliance is available for UI Snowflake editions.
- D. Periodic rekeying of encrypted data is available with the Snowflake Enterprise edition and higher

Answer: D

NEW QUESTION # 102

.....

It can be difficult to prepare for the SnowPro Core Certification Exam (COF-C02) certification test when you're already busy with daily tasks. But, you can successfully prepare for the examination despite your busy schedule if you choose updated and real Snowflake COF-C02 exam questions. We believe that success in the test depends on studying with SnowPro Core Certification Exam (COF-C02) Dumps questions. We have hired a team of professionals who has years of experience in helping test applicants acquire essential knowledge by providing them with Snowflake COF-C02 actual exam questions.
