The web-based practice test is upheld by every one of the working frameworks and programs which will be useful for CompTIA A+ Certification Exam: Core 1 (220-1101) exam preparation.

CompTIA A+ Certification Exam: Core 1 Sample Questions (Q492-Q497):

NEW QUESTION # 492

A user uploads a file to a storage location that is accessible via a web browser and a client application. The user's coworkers can access the file as well. The service that the file is stored with is provided by a third party for a monthly fee. The third party's service is available to any business or consumer who would like to use the service. Which of the following BEST describes the type of service that is in use?

- A. Private cloud
- B. Infrastructure as a service
- C. Public cloud
- D. Hybrid cloud

Answer: C

Explanation:

A public cloud is a cloud computing model that provides services and resources to anyone over the internet.

The service that the user uploads a file to is an example of a public cloud service, as it is accessible via a web browser and a client application, allows multiple users to access the file, and is provided by a third party for a monthly fee. A hybrid cloud is a combination of public and private cloud services that share data and resources. Infrastructure as a service is a cloud computing model that provides servers, storage, networking, and software over the internet. Private cloud is a cloud computing model that provides services and resources to a specific organization or group over a private network.

NEW QUESTION # 493

Which of the following frequency bands do 802.11b and 802.11g operate in?

- A. 1GHz
- B. 6GHz
- C. 5GHz
- D. 2.4GHz

Answer: D

Explanation:

The frequency bands that 802.11b and 802.11g operate in are 2.4GHz bands, which allow for longer range but lower speed than higher frequency bands such as 5GHz or 6GHz bands used by newer standards such as 802.11a/n/ac/ax.

NEW QUESTION # 494

In which of the following cloud models is the customer not responsible for hardware and OS layers but is responsible for the data and the application?

- A. CaaS
- B. SaaS
- C. IaaS
- D. PaaS

Answer: D

Explanation:

In Platform as a Service (PaaS), the cloud provider manages the hardware, operating system, and middleware, while the customer is responsible for managing data and applications.

* Why Not B (SaaS): In SaaS, the provider manages all layers, including applications and data, leaving no responsibility for the customer.

* Why Not C (IaaS): In IaaS, the customer manages the OS, data, and applications, while the provider only handles the hardware.

* Why Not D (CaaS): CaaS (Container as a Service) is not a primary cloud model described in the CompTIA objectives and is less commonly referenced.

CompTIA A+ Exam Reference: Core 1 (220-1101), Section 4.1, cloud computing models.

NEW QUESTION # 495

A technician is upgrading a legacy wireless router for a home user. After installing the new router and configuring the SSID to be the same, none of the devices will connect to the network. Which of the following should the technician check NEXT?

- A. DNS servers
- B. Wireless protocol settings
- C. DHCP pool configuration
- **D. MAC filtering list**

Answer: D

NEW QUESTION # 496

A technician is working on a desktop PC and wants to verify its NIC is functional. Which of the following should the technician use?

- **A. Loopback Plug**
- B. Network tap
- C. Cable tester
- D. Toner probe

Answer: A

NEW QUESTION # 497

.....
