Hot Most PDI Reliable Questions Free PDF | High Pass-Rate PDI Real Exams: Platform Developer I (PDI)

In order to meet the demand of all customers and protect your machines network security, our company can promise that our PDI study materials have adopted technological and other necessary measures to ensure the security of personal information they collect, and prevent information leaks, damage or loss. In addition, the PDI Study Materials system from our company can help all customers ward off network intrusion and attacks prevent information leakage, protect user machines network security.

The PDI exam covers a wide range of topics, including data modeling, user interface customization, automation, testing, and debugging. It also tests the candidate's ability to use Apex, Salesforce's proprietary programming language, to create custom business logic and integrate with external systems. Passing the PDI Exam demonstrates that a developer has a comprehensive understanding of the Salesforce platform and is capable of building complex applications that meet the needs of businesses and organizations.

Salesforce Platform Developer I (PDI) Sample Questions (Q13-Q18):

NEW QUESTION # 13

A custom picklist field, Pool Preference, exists on a custom object. The picklist contains the following options: 'Vegan', 'Kosher', 'No Preference'. The developer must ensure a value is populated every time a record is created or updated.

What is the optimal way to ensure a value is selected every time a record is saved?

- A. Mark the field as Required on the object's page layout.
- **B. Set "Use the first value in the list as the default value" to True.**
- C. Mark the field as Required on the field definition.
- D. Write an Apex trigger to ensure a value is selected,

Answer: B

NEW QUESTION # 14

Which exception type cannot be caught?

- A. Custom Exception
- B. NoAccessException
- C. CalloutException
- **D. LimitException**

Answer: D

NEW QUESTION # 15

A developer deployed a trigger to update the status__c of Assets related to an Account when the Account's status changes and a nightly integration that updates Accounts in bulk has started to fail with limit failures.

What should the developer change about the code to address the failure while still having the code update all of the Assets correctly?

- A. Move all of the logic to a queueable class that queries for and updates the Assets and call it from the trigger.
- B. Add a LIMIT clause to the SOQL query on line 16 to limit the number of Assets queried for an Account.
- **C. Change the getAssecsTspace method to process all Accounts in one call and call it outside of the for loop that starts on line 03.**
- D. Add List<asset> assets = [SELECT Id, Status__c FROM Asset WHERE AccountId = :acctId] to line 14 and iterate over the assets list in the for loop on line 15.

Answer: C

NEW QUESTION # 16

(Full question statement)

Which code displays the contents of a Visualforce page as a PDF?

- **A. <apex:page renderAs="application/pdf">**
- B. <apex:page contentType="pdf">
- C. <apex:page contentType="application/pdf">
- D. <apex:page renderAs="pdf">

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

* A (Correct): The renderAs="application/pdf" attribute in the <apex:page> tag instructs the Visualforce page to render the content as a PDF file when accessed.

Example:

```
<apex:page renderAs="application/pdf">
<h1>Invoice</h1>
</apex:page>
```

Incorrect options:

* B: renderAs="pdf" is incorrect; the correct MIME type is application/pdf.

* C/D: contentType controls headers but doesn't render the content as PDF.

Reference: Visualforce Developer Guide - Generating PDFs

This is part of the User Interface (25%) section of the exam, especially around Visualforce rendering and presentation logic.

NEW QUESTION # 17

A developer needs to prevent the creation of Request__c records when certain conditions exist in the system.

A RequestLogic class exists that checks the conditions.

What is the correct implementation?
