Wenn Sie die Prüfungssoftware der Salesforce Analytics-DA-201 von ExamFragen benutzt hat, wird das Bestehen der Salesforce Analytics-DA-201 nicht mehr ein Zufall für Sie. Die große Menge von Test-Bank kann Ihnen beim völligen Training helfen. Die ausführliche Erklärung können Ihnen helfen, jede Prüfungsaufgabe wirklich zu beherrschen. Die einjährige Aktualisierung nach dem Kauf der Salesforce Analytics-DA-201 garantieren Ihnen, immer die neueste Kenntnis dieser Prüfung zu haben. Mit so garantierten Software können Sie keine Sorge um Salesforce Analytics-DA-201 Prüfung machen!

Salesforce Analytics-DA-201 Prüfungsplan:

Thema	Einzelheiten
Thema 1	ABAP Core Data Services and Data Modeling: This section of the exam measures the skills of the SAP ABAP Cloud Developer and covers the fundamental understanding of core data services (CDS) and how to design data models in the SAP ABAP environment. Candidates are expected to know how to define, consume, and optimize CDS views effectively to support application development in the cloud.
Thema 2	SAP Clean Core Extensibility and ABAP Cloud: This part of the exam targets the SAP S/4HANA Technical Consultant and covers concepts of clean core extensibility using ABAP in the cloud. The focus is on in-app and side-by-side extensibility techniques, ensuring that custom code complies with cloud-readiness principles and does not compromise the upgrade stability of core systems.
Thema 3	Object-Oriented Design: This section of the exam evaluates the SAP ABAP Cloud Developer's understanding of object-oriented principles in the ABAP context. It focuses on class-based programming, inheritance, interfaces, and polymorphism, all crucial for building modular and maintainable ABAP cloud applications.
Thema 4	ABAP SQL and Code Pushdown: This section of the exam measures the competencies of the SAP ABAP Cloud Developer related to performance optimization through ABAP SQL and code pushdown techniques. It ensures that the developer understands how to shift logic to the database layer using efficient SQL scripting to enhance performance in data-intensive applications.

Thema 5	• Core ABAP Programming: This part of the exam assesses the foundational programming skills of the SAP S • 4HANA Technical Consultant. It includes knowledge of syntax, control structures, modularization, and internal tables in ABAP. The section aims to validate the candidate's proficiency in writing clean, efficient ABAP code using best practices.

Salesforce Certified Tableau Data Analyst Analytics-DA-201 Prüfungsfragen mit Lösungen (Q142-Q147):

142. Frage

You have the following dashboard.

Sales across cities

© 2021 Mapbox © OpenStreetMap

When a user selects a city on the map the data on the bar chart must show only the data for the selected city.

The data in the bar chart must change only when the user selects a different city. How should you configure the dashboard action? (Use the dropdowns in the Answers Area to select the correct options.)

Antwort:

Begründung:

Sales across cities

Explanation:

To configure the dashboard action, you should select Filter as the action type, Select as the run action on option, and All Fields as the target filters option. This will ensure that when a user selects a city on the map, the bar chart will show only the data for the selected city based on all fields in common between the two worksheets. The action will run only when the user selects a different city. References: <https://help.tableau.com/current/pro/desktop/en-us/actions.htm> https://help.tableau.com/current/pro/desktop/en-us/actions_filter.htm

143. Frage

You have the Mowing dashboard.

Which two elements are floating? Choose two.

- A. The state filter
- B. The map
- C. The color legend
- D. The Rate of Obesity chart
- E. The title

Antwort: A,D

Begründung:

In Tableau dashboards, floating elements are those that can be freely moved over the dashboard canvas without being snapped into the tiled layout. The floating elements are often indicated by their standalone frames and the ability to overlap with other dashboard items. From the provided image, the state filter and the Rate of Obesity chart can be identified as floating if they can be moved independently of the tiled grid layout that constrains other elements.

144. Frage

You create the following worksheet

The Pick Measure parameter contains the following list of values

Users can select a value from Pick Measure to change the visualization to show either the Sales measure or the Profit measure.

Which formula is used in the Selected Measure calculated field to switch between measures?

- A. Case AVG([Pick Measure])
WHEN [Sales] then 1
WHEN [Profit] then 2
END
- B. Case [Pick Measure]:
WHEN [Sales] then 1
WHEN [Profit] then 2 END
- C. Case STFM([Pick Measure])
WHEN "Sales" then ([Sales])
WHEN "Profit" then ([Profit]) END
- D. Case [Pick Measure]
WHEN 1 then ([Sales])
WHEN 2 then ([Profit])
END

Antwort: D

Begründung:

https://help.tableau.com/current/pro/desktop/en-us/parameters_swap.htm

This formula uses a parameter (Pick Measure) to switch between the Sales and Profit measures. When the user selects '1', it shows Sales, and when '2' is selected, it shows Profit. This dynamic switching is enabled by the Case function.

145. Frage

You want to create the following dashboard.

Sales across Category

Category	Region	2019	2020	2021	2022
Furniture	Central	33K	36K	51K	45K
	East	47K	54K	46K	61K
	South	27K	24K	28K	38K
	West	50K	57K	74K	72K
Office Supplies	Central	37K	25K	46K	59K
	East	36K	43K	62K	65K
	South	26K	31K	29K	40K
	West	53K	38K	48K	82K
Technology	Central	34K	42K	51K	44K
	East	45K	60K	72K	87K
	South	51K	16K	37K	45K
	West	45K	45K	66K	96K

Sales by Sub-Category

The dashboard will contain two sheets that will connect to the same data source. The top sheet will be configured to filter the bottom sheet.

When you click a category on the top sheet, the sheets must resize as shown in the following exhibit.

How should you lay out the objects on the dashboard?

- A. Drag a blank object to the dashboard and add both sheets to the dashboard. Set Fit to Entire view.
- **B. Drag a vertical container to the dashboard and add both sheets to the container. Set Fit to Entire view.**
- C. Add both sheets to the dashboard. Set Fit to Fix width.
- D. Drag a horizontal container to the dashboard and add both sheets to the container. Set the Fit to Standard.

Antwort: B

Begründung:

To create the dashboard as shown in the image, you need to use a vertical layout container that will adjust the height of the sheets according to the window size. You also need to set the Fit to Entire view option for both sheets so that they will resize proportionally when you click a category on the top sheet. This way, you can achieve the desired effect of having the bottom sheet expand to fill the space left by the top sheet when it filters out some categories. References:

146. Frage

You have the following tiled dashboard that has one sheet.

You want to replace the sheet with Sheet2.
What should you do?

- A. Right-click Sheet2 and select Add to Dashboard.
- **B. Drag Sheet2 to the dashboard.**
- C. From the context menu of Sheet3, select Deselect.
- D. From the context menu of Sheet3, select Remove Dashboard Item.
- E. Select Sheet3 and click the Swap Sheet button next to Sheet2.

Antwort: B

Begründung:

In Tableau, to replace a sheet on a dashboard, you can simply drag the desired sheet (Sheet2 in this case) from the sheets list onto the dashboard where the current sheet (Sheet3) is. This will replace the existing visualization with the new one.

147. Frage

.....

Was wissen Sie über die Salesforce Analytics-DA-201 Zertifizierungsprüfungen? Als eine sehr populäre Salesforce Zertifizierungsprüfung ist diese Prüfung sehr wichtig. Aber wenn Sie für die bessere Vorbereitung der Salesforce Analytics-DA-201 Prüfungen die Schulungsunterlagen finden, ist es nicht leicht für Sie eine sehr ausgezeichnetes Nachschlagebuch finden. Und Was können Sie machen? Es macht nichts. Wir ExamFragen Ihre Wünsche kennen und Ihre Bedürfnisse erfüllen bei Angeboten der besten Prüfungsfragen und Antworten zur Salesforce Analytics-DA-201 Zertifizierung.
