At the same time, there is really no need for you to worry about your personal information if you choose to buy the HPE7-A02 Exam Practice from our company.

HP Aruba Certified Network Security Professional Exam Sample Questions (Q42-Q47):

NEW QUESTION # 42

You have installed an HPE Aruba Networking Network Analytic Engine (NAE) script on an AOS-CX switch to monitor a particular function.

Which additional step must you complete to start the monitoring?

- A. Create an agent from the script.
- B. Reboot the switch.
- C. Edit the script to define monitor parameters.
- D. Enable NAE, which is disabled by default.

Answer: A

Explanation:

After installing an HPE Aruba Networking Network Analytic Engine (NAE) script on an AOS-CX switch, the additional step required to start the monitoring is to create an agent from the script. The agent is responsible for executing the script and collecting the monitoring data as defined by the script parameters.

1. Script Installation: Installing the script provides the logic and parameters for monitoring.
2. Agent Creation: Creating an agent from the script activates the monitoring process, allowing the NAE to begin tracking the specified function.
3. Operational Step: This step ensures that the monitoring logic is applied and the data collection starts as per the script's configuration.

NEW QUESTION # 43

You need to create a rule in an HPE Aruba Networking ClearPass Policy Manager (CPPM) role mapping policy that references a ClearPass Device Insight Tag. Which Type (namespace) should you specify for the rule?

- **A. Endpoint**
- B. Application
- C. TIPS
- D. Device

Answer: A

Explanation:

- * ClearPass Role Mapping Policy:
- * The Endpoint namespace is used to reference attributes and tags related to endpoint devices.
- * Device Insight Tags are part of endpoint profiling information and are stored in the Endpoint Repository.
- * Option Analysis:
- * Option A: Correct. The Endpoint namespace includes Device Insight Tags.
- * Option B: Incorrect. TIPS refers to system attributes and configuration data, not endpoint tags.
- * Option C: Incorrect. Device is not a valid namespace in this context.
- * Option D: Incorrect. Application relates to application-level attributes, not Device Insight Tags.

NEW QUESTION # 44

A company uses HPE Aruba Networking ClearPass Policy Manager (CPPM) as a TACACS+ server to authenticate managers on its AOS-CX switches. You want to assign managers to groups on the AOS-CX switch by name. How do you configure this setting in a CPPM TACACS+ enforcement profile?

- A. Add the Aruba:Common service and set Aruba-Priv-Admin-User to the group name.
- B. Add the Shell service and set autocmd to the group name.
- C. Add the Shell service and set priv-lvl to the group name.
- **D. Add the Aruba:Common service and set Aruba-Admin-Role to the group name.**

Answer: D

Explanation:

To assign managers to groups on the AOS-CX switch by name using HPE Aruba Networking ClearPass Policy Manager (CPPM) as a TACACS+ server, you should add the Aruba service to the TACACS+ enforcement profile and set the Aruba-Admin-Role to the group name. This configuration ensures that the appropriate administrative roles are assigned to managers based on their group membership, allowing for role-based access control on the AOS-CX switches.

NEW QUESTION # 45

You want to examine the applications that a device is using and look for any changes in application usage over several different ranges. In which HPE Aruba Networking solution can you view this information in an easy-to-view format?

- **A. HPE Aruba Networking Central within a device's Live Monitoring page**
- B. HPE Aruba Networking ClearPass OnGuard agent installed on the device
- C. HPE Aruba Networking ClearPass Insight using an Active Endpoint Security report
- D. HPE Aruba Networking ClearPass Device Insight (CPDI) in the device's network activity

Answer: A

Explanation:

- * HPE Aruba Central Live Monitoring:

- * Aruba Central provides real-time Live Monitoring of network devices, including:
- * Application usage statistics.
- * Trends and changes over time for specific devices.
- * This information is presented in a clear and easy-to-read format, making it ideal for examining changes in application usage over different time ranges.
- * Option Analysis:
- * Option A: Incorrect. ClearPass OnGuard monitors endpoint compliance (e.g., antivirus, OS version) but does not analyze application usage.
- * Option B: Correct. Aruba Central's Live Monitoring page is specifically designed for this type of analysis.
- * Option C: Incorrect. ClearPass Insight generates endpoint security reports but does not track application usage.
- * Option D: Incorrect. ClearPass Device Insight (CPDI) focuses on device profiling and identification, not continuous application monitoring.

NEW QUESTION # 46

A company uses HPE Aruba Networking ClearPass Device Insight (CPDI) (the standalone application option). In the details for a generic device cluster, you see a recommendation for "Windows 8/10" with 70% accuracy. What does this mean?

- A. CPDI has used MAC OUI to group these devices together. The average device's MAC address matches 70% of the "Windows 8/10" OUI.
- B. CPDI has matched these devices against several, conflicting system rules. 70% of those rules are for "Windows 8/10" devices.
- C. CPDI has grouped this cluster with similar classified devices. 70% of those classified devices are "Windows 8/10."
- **D. CPDI has detected that these devices match about 70% of the system rule for defining "Windows 8/10" devices.**

Answer: D

Explanation:

When HPE Aruba Networking ClearPass Device Insight (CPDI) shows a recommendation for "Windows 8/10" with 70% accuracy for a generic device cluster, it means that CPDI has detected that these devices match about 70% of the system rule criteria for defining "Windows 8/10" devices. This percentage indicates the confidence level based on the observed characteristics and behavior of the devices, helping administrators understand the likelihood that these devices are indeed running Windows 8 or 10.
