To achieve this objective the Exams have hired a team of experienced and qualified International Code Council M2 Exam trainers. They work together and check all International Code Council M2 exam questions step by step and ensure the top standard of International Code Council M2 practice test material all the time.

International Code Council Commercial Mechanical Inspector Sample Questions (Q33-Q38):

NEW QUESTION # 33

When a furnace is installed in a 66-inch-high attic, the maximum distance from the passageway access to the furnace shall be _____ ft., measured along the centerline of the passageway.

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

ICC mechanical access provisions for appliances in attics require the passageway to be not more than 20 feet in length, measured along the centerline of the passageway from the opening to the appliance, where the attic passageway is the standard reduced-height access condition. Since the attic height given is 66 inches, the standard maximum length applies, so Option C is correct. The 50-foot allowance applies only under a different exception where the passageway is unobstructed and at least 6 feet high for its entire length.

NEW QUESTION # 34

Exhibit:

□ CEF-5 is a ceiling exhaust fan manufactured by:

- A. Nutone
- B. Markel
- C. G.E.
- D. Carnes

Answer: A

Explanation:

This is also an exhibit-reading question. From the equipment schedule in the image, CEF-5 is listed as a Nutone unit, so Option D is correct. This falls under reading commercial mechanical drawings and equipment schedules related to exhaust/ventilation components.

NEW QUESTION # 35

All exposed gas piping shall be kept above grade a minimum of _____ inches.

- A. 8.5
- B. 0
- C. 1
- D. 3.5

Answer: D

Explanation:

The IFGC rule for above-ground outdoor piping requires piping installed outdoors to be elevated not less than 3 1/2 inches above ground, and where installed across roof surfaces, not less than 3 1/2 inches above the roof surface. Therefore, the correct answer is A.

NEW QUESTION # 36

Solid-fuel cooking equipment:

- A. shall be vented through a separate hood and exhaust system
- B. is permitted to be installed under Type II canopy-type hoods.
- C. is permitted to be installed under common canopy-type hoods with other cooking equipment.
- D. is permitted to be installed under Type II noncanopy-type hoods.

Answer: A

Explanation:

Solid-fuel cooking equipment requires a separate hood and exhaust system. It is not permitted to share the same hood/exhaust arrangement in the manner suggested by the other choices. This is a standard commercial kitchen exhaust requirement because of the added fire and residue hazards associated with solid-fuel appliances.

NEW QUESTION # 37

Where located on a roof with a 5:12 slope, a level platform shall be provided along the access panel of the furnace at least _____ inches wide.

- A. 0
- B. 1
- C. [option text not fully visible in the material you sent]
- **D. 2**

Answer: D

Explanation:

For appliances on roofs, ICC access provisions require a level platform at the appliance. The platform must be not less than 30 inches in any dimension . For the choices provided, that makes 30 inches the correct answer, which is Option C .

NEW QUESTION # 38

.....

With the development of science and technology the internet in our daily life is playing a more and more important role! IT workers become high-salary people. International Code Council certifications become hot vocational qualification certificate. NewPassLeader offers the best M2 Guide Torrent files to help people clear exams and realize their idea better. We are engaged in this field more than 8 years.
