

# Free PDF DASCA - Trustable SDS Valid Exam Dumps

DOWNLOAD the newest BraindumpStudy SDS PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1XV0\\_gFKg7jpWQZld3PiI-74hv9igxpT](https://drive.google.com/open?id=1XV0_gFKg7jpWQZld3PiI-74hv9igxpT)

When you are visiting our website, you will find that we have three different versions of the SDS study guide for you to choose. And every version can apply in different conditions so that you can use your piecemeal time to learn, and every minute will have a good effect. In order for you to really absorb the content of SDS Exam Questions, we will tailor a learning plan for you. This study plan may also have a great impact on your work and life. With our SDS preparation materials, you can have a brighter future.

Fortunately, there's no need to worry anymore. Now you can access and analyze your SDS exam dumps by using the resourceful and well-researched Senior Data Scientist exam questions that is available only on BraindumpStudy. This easy-to-use SDS practice material encompasses the whole syllabus and its users find it very competitive as its Real SDS Questions are specially BraindumpStudy in this field. Each candidate has a different style of learning and preparation. They find it beneficial to pursue their desired study pattern for improved results.

>> SDS Valid Exam Dumps <<

## DASCA SDS Valid Exam Dumps: Senior Data Scientist - BraindumpStudy Help you Prepare Efficiently

The Senior Data Scientist SDS exam questions are the real SDS Exam Questions that will surely repeat in the upcoming SDS exam and you can easily pass the challenging Senior Data Scientist SDS certification exam. The SDS dumps are designed and verified by experienced and qualified Senior Data Scientist SDS certification exam trainers. They strive hard and utilize all their expertise to make sure the top standard of SDS Exam Practice test questions all the time. So you rest assured that with SDS exam real questions

you can not only ace your entire Senior Data Scientist SDS exam preparation process but also feel confident to pass the Senior Data Scientist SDS exam easily.

## DASCA Senior Data Scientist Sample Questions (Q10-Q15):

### NEW QUESTION # 10

Self-driving car is an example of:

- A. Reinforcement learning
- B. All of the above
- C. Unsupervised learning
- D. Supervised learning

**Answer: A**

Explanation:

Self-driving cars (autonomous vehicles) are an application of Reinforcement Learning (RL) in machine learning:

In RL, an agent (car) interacts with an environment (roads, obstacles, traffic) and learns to maximize rewards (e.g., safe driving, efficient navigation).

The system improves performance through trial-and-error learning, guided by reward signals such as staying in a lane or avoiding collisions.

Supervised learning (A): Used in some supporting tasks like image recognition (e.g., identifying stop signs), but not the core paradigm for self-driving.

Unsupervised learning (B): Useful for clustering sensor data, but again not the main paradigm.

Reinforcement learning (C): Correct, since self-driving fundamentally depends on RL decision-making.

Thus, the correct answer is Option C (Reinforcement Learning).

### NEW QUESTION # 11

Spark is written in:

- A. C
- B. C++
- C. Java
- D. Python
- E. Scala

**Answer: E**

Explanation:

Apache Spark is an open-source distributed computing framework widely used for big data processing and machine learning pipelines.

The core implementation of Spark is written in Scala (Option A), which runs on the JVM (Java Virtual Machine).

Spark also provides APIs for Java, Python (PySpark), R, and SQL, but its native language is Scala.

Options C (C) and D (C++) are incorrect; Spark is not written in these languages.

Python (Option E) is a supported API, but Spark itself is not written in Python.

Thus, the correct answer is Scala (Option A).

DASCA Data Scientist Knowledge Framework (DSKF) - Programming Tools for Big Data & Distributed Computing.

### NEW QUESTION # 12

Maximum Likelihood Estimation (MLE) is a way to frame:

- A. Large class of problems in HDFS
- B. Small class of problems in HDFS
- C. Both A and C
- D. Small class of problems in Data Science

- E. Large class of problems in Data Science

**Answer: E**

Explanation:

Maximum Likelihood Estimation (MLE) is a statistical method used to estimate the parameters of a model by maximizing the likelihood function - i.e., finding the parameters that make the observed data most probable.

Option A: Correct. MLE provides a framework for a large class of problems in data science, including regression, classification, generative models, and probabilistic inference.

Option B: Incorrect - it applies to many problems, not just a small subset.

Option C & D: Incorrect. HDFS (Hadoop Distributed File System) is a storage technology, unrelated to MLE.

Option E: Incorrect because C is invalid.

Thus, the correct answer is Option A (Large class of problems in Data Science).

### NEW QUESTION # 13

Which of the following is TRUE for "By" analysis?

- A. All of the above
- B. "By" analysis is used to create a collaborative technique to drive alignment between the business users and the data scientists to identify and brainstorm variables and metrics that might be better predictors of business performance.
- C. Both B and C
- D. The "By" analysis technique reinforces the process of "thinking like a data scientist."
- E. "By" analysis is a technique by which business subject matter experts (SMEs) and the Data Science team could collaborate to uncover new variables and metrics that might be better predictors of business performance.

**Answer: A**

Explanation:

"By" analysis is one of the foundational approaches recommended in the DASCA Data Scientist Knowledge Framework for structuring problem-solving in data science. The purpose of "By" analysis is to enable data scientists and business stakeholders to think beyond obvious data correlations and uncover deeper drivers of business outcomes.

At its core, the technique reinforces the discipline of thinking like a data scientist (Option A). This involves reframing business questions into analytical structures and asking "What drives this metric by which factors?" For example, customer churn might be analyzed by demographics, purchase behavior, or service usage. This structured mindset is critical for ensuring scientific rigor in business problem analysis.

In addition, "By" analysis emphasizes collaboration between Subject Matter Experts (SMEs) and Data Science teams (Option B).

SMEs bring contextual domain knowledge, while data scientists bring analytical and statistical expertise. Together, they brainstorm possible explanatory variables or metrics that could become strong predictors of business performance.

Furthermore, the process provides a collaborative bridge between business and technical stakeholders (Option C). It ensures that the exploration of data is not isolated in silos but is grounded in both domain insights and advanced analytical methods. This alignment is crucial for building models that are not only technically sound but also relevant and actionable in real-world business contexts.

Since Options A, B, and C are correct and complementary, the best choice is Option E: All of the above.

### NEW QUESTION # 14

Which of the following is NOT an example of the applications of neural networks?

- A. Image compression
- B. None of the above
- C. Character recognition
- D. Traveling salesman's problem
- E. Stock market prediction

**Answer: D**

Explanation:

Neural networks have been widely applied in various domains:

Option A (Character recognition): Correct application - neural networks are highly effective for OCR (Optical Character Recognition).

Option B (Stock market prediction): Correct application - neural networks are used to model time-series and nonlinear patterns in finance.

Option D (Image compression): Correct application - neural nets (autoencoders) are used for dimensionality reduction and compression.

Option C (Traveling salesman's problem): NOT a typical neural network application. This is a combinatorial optimization problem usually solved with heuristics, dynamic programming, or optimization algorithms (not standard neural networks).

Thus, the correct answer is Option C (Traveling salesman's problem).

## NEW QUESTION # 15

.....

The BraindumpStudy is on a mission to support its users by providing all the related and updated Senior Data Scientist (SDS) exam questions to enable them to hold the Senior Data Scientist (SDS) certificate with prestige and distinction. What adds to the dominance of the BraindumpStudy market is its promise to give its customers the latest SDS Practice Exams. The hardworking and strenuous support team is always looking to refine the SDS prep material and bring it to the level of excellence. It materializes this goal by taking responses from above 90,000 competitive professionals.

**SDS Exam Registration:** [https://www.braindumpstudy.com/SDS\\_braindumps.html](https://www.braindumpstudy.com/SDS_braindumps.html)

DASCA SDS Valid Exam Dumps We have developed an app which has magical functions; you can download after you have bought, DASCA SDS Valid Exam Dumps We take our customer as god, DASCA SDS Valid Exam Dumps Life is the art of drawing without an eraser, DASCA SDS Valid Exam Dumps No other vendors can challenge our data in this market, Now you can free download part of practice questions and answers of DASCA certification SDS exam on BraindumpStudy.

Approximately most of the questions were in the exam, so study hard SDS Valid Test Pdf and you'll pass with ease, This is the top pages metric, literally a listing of pages with the most pageviews, in descending order.

## DASCA SDS Dumps PDF To Gain Brilliant Result

We have developed an app which has magical functions; you SDS can download after you have bought, We take our customer as god, Life is the art of drawing without an eraser.

No other vendors can challenge our data in this market, Now you can free download part of practice questions and answers of DASCA certification SDS exam on BraindumpStudy.
