

Valid 2V0-17.25 Practice Materials, Valid 2V0-17.25 Exam Simulator

BONUS!!! Download part of VerifiedDumps 2V0-17.25 dumps for free: https://drive.google.com/open?id=1cS1_XN2tF52ZKjrBu4ILdIA-pa5Jdp7x

It would take a lot of serious effort to pass the VMware Cloud Foundation 9.0 Administrator (2V0-17.25) exam, therefore it wouldn't be simple. So, you have to prepare yourself for this. But since we are here to assist you, you need not worry about how you will study for the VMware Cloud Foundation 9.0 Administrator (2V0-17.25) exam dumps. You can get help from us on how to get ready for the VMware Cloud Foundation 9.0 Administrator (2V0-17.25) exam questions. We will accomplish this objective by giving you access to some excellent 2V0-17.25 practice test material that will enable you to get ready for the VMware Cloud Foundation 9.0 Administrator (2V0-17.25) exam dumps.

VMware 2V0-17.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment.

Topic 2	<ul style="list-style-type: none"> • Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation.
Topic 3	<ul style="list-style-type: none"> • Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments.
Topic 4	<ul style="list-style-type: none"> • IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies.

Valid 2V0-17.25 Practice Materials - Realistic 2026 VMware Valid VMware Cloud Foundation 9.0 Administrator Exam Simulator Pass Guaranteed

We should formulate a set of high efficient study plan to make the 2V0-17.25 exam dumps easier to operate. Here our products strive for providing you a comfortable study platform and continuously upgrade 2V0-17.25 test prep to meet every customer's requirements. Under the guidance of our 2V0-17.25 Test Braindumps, 20-30 hours' preparation is enough to help you obtain the VMware certification, which means you can have more time to do your own business as well as keep a balance between a rest and taking exams.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q25-Q30):

NEW QUESTION # 25

What is the primary purpose of configuring a Key Management Server (KMS) in vCenter for VM Encryption?

- A. To provide high availability for virtual machines.
- **B. To manage encryption keys for securing VM data.**
- C. To monitor network traffic for VMs.
- D. To optimize the performance of encrypted VMs.

Answer: B

Explanation:

The primary purpose of configuring a Key Management Server (KMS) in vCenter for VM Encryption is to manage and store the encryption keys that are used to secure virtual machine data. The KMS ensures that encryption keys are handled securely and provides a central management point for encrypting VMs in a VMware environment.

NEW QUESTION # 26

An administrator needs to create a custom role in vCenter Server that is part of VMware Cloud Foundation environment to grant specific privileges to a group of users.

Which two actions should be taken to create this custom role? (Choose two.)

- A. Apply the custom role to the root of the vCenter Server inventory/.
- **B. Choose the privileges required for the custom role.**

- C. Navigate to the Roles section in the vSphere Client.
- D. Clone an existing role in SDDC Manager to create the custom role.
- E. Assign permissions to the custom role before adding privileges.

Answer: B,C

Explanation:

When creating a custom role, it is essential to choose the appropriate privileges that the role will require.

These privileges define what actions the users in the role can perform.

To create and manage roles, you need to navigate to the "Roles" section in the vSphere Client. This is where roles are defined and assigned within the vCenter Server.

NEW QUESTION # 27

An administrator finds that one of the VMs in the vSphere environment cannot reach its default gateway. The VM is configured with a static IP address, and other VMs on the same port group and VLAN are not experiencing any issues.

What should the administrator check to resolve the issue?

- A. Confirm that the DVS port group is configured correctly.
- B. Check the subnet mask configured on the VM.
- C. Check if the VM has the correct DNS server settings.
- D. Ensure that the VM's network adapter is set to DHCP.

Answer: B

Explanation:

If the subnet mask is incorrect, the VM may not recognize the gateway as being on the local network, preventing communication even though the gateway itself is reachable by other correctly configured VMs. Checking and correcting the subnet mask ensures the VM can properly route to its default gateway.

NEW QUESTION # 28

An organization has 3 data center sites and is implementing a solution to achieve a Recovery Point Objective (RPO) of 0 to ensure continuous availability of storage in the event of a single site failure. The sites are connected via a high bandwidth/low latency link.

Which two VMware Cloud Foundation (VCF) components can be used to support this capability?

(Choose two.)

- A. Aria Operations
- B. vSphere Replication
- C. vSphere
- D. vSAN
- E. NSX

Answer: C,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

To achieve an RPO of 0 (zero data loss) with continuous availability of storage across multiple sites, VMware Cloud Foundation leverages two key components:

vSphere (A): vSphere provides the core platform for compute virtualization, including features such as VMware vSphere HA (High Availability) and VMware vSphere Fault Tolerance, both of which are integral to delivering continuous VM availability and supporting cross-site failover.

vSAN (E): vSAN can be configured in a stretched cluster deployment across the three sites. With a stretched vSAN cluster, data is synchronously replicated between sites, ensuring that all writes are committed to more than one location. This synchronous replication provides true continuous availability and a Recovery Point Objective (RPO) of 0 in the event of a single site failure, provided that the network meets high bandwidth and low latency requirements.

Other components such as Aria Operations and NSX do not provide storage-level availability or synchronous data protection.

vSphere Replication only supports asynchronous replication and cannot guarantee RPO of 0.

NEW QUESTION # 29

Which vSphere component is essential for providing persistent storage to Kubernetes workloads deployed on IaaS Control Plane?

- A. Control Plane Storage Policy
- B. vSAN
- **C. Pod Service**
- D. Container Image Virtual Disks

Answer: C

Explanation:

The vSphere Pod Service is essential for providing persistent storage to Kubernetes workloads deployed on IaaS Control Plane (formerly vSphere with Tanzu). It enables the integration of Kubernetes with vSphere, allowing the creation of persistent volumes and the management of storage resources for Kubernetes workloads, ensuring that they can utilize vSphere's storage capabilities like vSAN.

NEW QUESTION # 30

.....

The VMware job market has become so competitive and challenging. To stay competitive in the market as an experienced VMware professional you have to upgrade your skills and knowledge with the VMware Cloud Foundation 9.0 Administrator (2V0-17.25) certification exam. With the VMware 2V0-17.25 exam dumps you can easily prove your skills and upgrade your knowledge. To do this you just need to enroll in the VMware Cloud Foundation 9.0 Administrator (2V0-17.25) certification exam and put all your efforts to pass this challenging 2V0-17.25 exam with good scores. However, you should keep in mind that to get success in the 2V0-17.25 certification exam is not a simple and easy task.
