ASIS Physical Security Professional Exam Sample Questions (Q50-Q55):

NEW QUESTION # 50
A system in which a badge or pass coded for authorization to enter specific areas is issued to an employee, who keeps it until the authorization id changed or until he or she leaves the company is called:

- A. Contractive pass system
- B. Single pass system
- C. Pass-exchange system
- D. None of the above

Answer: B

Explanation:
A Single Pass System issues a unique, coded pass or badge to an employee, which is retained for continued use during employment. The pass allows access to predefined areas and is typically updated if access rights change or when employment ends.

NEW QUESTION # 51

Businesses have been forced to come to terms with potential consequences of taking security risks and the solution which should be complementary is:

- A. Investment in loss prevention techniques
- B. Both A and B
- C. Neither A nor B
- D. Insurance

Answer: B

NEW QUESTION # 52

A concept that has grown largely in response to the difficulties faced by merchants in protecting their property from shoplifters and the problems and dangers they face when they make an asset, is called:

- A. Confinement
- B. None of the above
- C. Release
- D. Detention

Answer: D

NEW QUESTION # 53

What occurs when the person who committed the act was able to foresee that the action would result in certain damages?

- A. Active resister
- B. Lack of control
- C. None of the above
- D. International tort

Answer: D

Explanation:
An intentional tort occurs when a person deliberately engages in actions that are likely to cause harm or when the person knowingly performs an act that they can reasonably foresee will result in damage. Examples include assault, battery, false imprisonment, and trespassing.
Active resister (A) and Lack of control (B) are not legal terms related to tort liability.
"International tort" is a misspelling; the correct term is "intentional tort." References:

NEW QUESTION # 54

When calculating cost as part of a cost-benefit analysis, the key factors to consider are:

- A. Purchase, life cycle, and inflation
- B. Base cost, inflation, and replacement

- C. Initial, repair, and maintenance
- D. Acquisition, life cycle, and replacement

Answer: D

Explanation:
Comprehensive Detailed Explanation:
In a cost-benefit analysis for physical security systems, the total cost must account for:
Acquisition cost: Initial purchase and installation.
Life cycle cost: Operating, maintenance, support, and energy use over time.
Replacement cost: Cost to replace or upgrade the system at end-of-life.
These factors give a comprehensive view of the true investment required, rather than just the initial purchase.
B and C partially include relevant elements, but only A captures the full scope.
D misses the operational costs involved in life cycle consideration.
