Salesforce Administer, Extend, and Automate Salesforce Sample Questions (Q148-Q153):

NEW QUESTION # 148

Cloud Kicks (CK) has a sneaker of the month product that is sold as an annual subscription at the price of \$1. What type of product scheduling should the CK administrator set up to accurately capture that information?

- A. Revenue Schedule Only
- **B. Quantity and Revenue Schedules.**
- C. Inbound Scheduling

Answer: B

Explanation:

Quantity Schedule Only

NEW QUESTION # 149

Cloud Kicks needs to create 10 separate environments for various projects. A developer sandbox has been created with the necessary configuration and data. The administrator needs to create 10 new environments with the same metadata and data for each user.

What should the administrator do to meet the requirements?

- A. Use the existing sandbox as a sandbox template.
- **B. Use clone a sandbox option from the existing sandbox.**
- C. Use refresh sandbox without Auto Activate.
- D. Use a scratch org definition to copy sandbox.

Answer: B

Explanation:

Cloning a sandbox creates a duplicate copy of an existing sandbox with the same type, name, description, configuration, and license type as the original sandbox. Cloning a sandbox is useful when you need to create multiple sandboxes with the same metadata and data for testing or development purposes. Reference: https://help.salesforce.com/s/articleView?id=sf.data_sandbox_clone.htm&type=5

NEW QUESTION # 150

When an Account has more than five open opportunities over US\$10,000, the sales rep should have an option on the Account page to start the escalation process to allocate additional resources.

Which two configurations should the administrator create?

Choose 2 answers

- A. Dynamic Forms
- B. Formula field
- **C. Roll-Up Summary field**
- **D. Component Visibility filter**

Answer: C,D

NEW QUESTION # 151

The administrator at Ursa Major Solar has set up IT policies for all user passwords to be a minimum length of 3 characters and have an expiration period of 90 days. The security team recently decided that administrators of any system should have a 15-character minimum password with a 30-day expiration period. Where should the administrator make this change?

- A. Password complexity requirements on the permission set
- **B. Password Policies on the System Administrator profile .**
- C. Session Settings on the User record
- D. Organization-wide password policies

Answer: B

NEW QUESTION # 152

An administrator at Universal Containers has been asked to configure product schedules. What should the administrator consider before enabling this feature?

- A. Customizable product schedule page layouts cannot be modified.
- **B. Line Item Schedule is unavailable In Process Builder and Workflow.**
- C. The Product Schedule is unavailable in Process Builder and Flow.
- D. To remove a product schedule completely, remove It from the standard price book.

Answer: B

Explanation:

Product schedules are features that allow administrators to track revenue or quantity over time for products in opportunities or orders. Product schedules can be either revenue schedules or quantity schedules, depending on whether the product is sold by amount or by quantity. Product schedules can be either standard or customizable, depending on whether they use predefined settings or custom settings.

Line item schedules are records that represent each installment of revenue or quantity for a product over time. Line item schedules are created automatically when a product with a product schedule is added to an opportunity line item or an order product.

One limitation of product schedules is that line item schedules are unavailable in Process Builder and Workflow. This means that administrators cannot use these tools to automate actions based on line item schedules, such as sending email alerts, creating tasks, updating fields, or invoking flows.
