Latest Released Salesforce Identity-and-Access-Management-Architect Cert Guide - Salesforce Certified Identity and Access Management Architect Reliable Exam Registration

Salesforce Certified Identity and Access Management Architect Identity-and-Access-Management-Architect certification exam offers a quick way to validate skills in the market. By doing this they can upgrade their skill set and knowledge and become a certified member of the Salesforce Certified Identity and Access Management Architect Identity-and-Access-Management-Architect exam. There are several benefits of Identity-and-Access-Management-Architect Certification that can enjoy a successful candidate for the rest of their life. Identity-and-Access-Management-Architect also offers valid dumps book and valid dumps free download, with 365 days free updates.

Salesforce Certified Identity and Access Management Architect Sample Questions (Q114-Q119):

NEW QUESTION # 114

Northern Trail Outfitters (NTO) utilizes a third-party cloud solution for an employee portal. NTO also owns Salesforce Service Cloud and would like employees to be able to login to Salesforce with their third-party portal credentials for a seamless experience. The third-party employee portal only supports OAuth.

What should an identity architect recommend to enable single sign-on (SSO) between the portal and Salesforce?

- A. Configure SSO to use the third party portal as an identity provider.
- B. Add the third-party portal as a connected app.
- C. Create a custom external authentication provider.
- D. Configure Salesforce for Delegated Authentication.

Answer: A

NEW QUESTION # 115

Universal Containers (UC) would like its community users to be able to register and log in with Linkedin or Facebook Credentials. UC wants users to clearly see Facebook &Linkedin Icons when they register and login.
What are the two recommended actions UC can take to achieve this Functionality? Choose 2 answers

- A. Create custom Registration Handlers to link Linkedin and facebook accounts to user records.
- B. Enable Facebook and Linkedin as Login options in the login section of the Community configuration.
- C. Store the Linkedin or Facebook user IDs in the Federation ID field on the Salesforce User record.
- D. Create custom buttons for Facebook and inkedin using JAVAscript/CSS on a custom Visualforce page.

Answer: A,B

NEW QUESTION # 116

Universal containers(UC) wants to integrate a third-party reward calculation system with salesforce to calculate rewards. Rewards will be calculated on a schedule basis and update back into salesforce. The integration between Salesforce and the reward calculation system needs to be secure. Which are the recommended best practices for using Oauth flows in this scenario? Choose 2 answers

- A. Oauthjwt bearer token flow
- B. Oauth Username-password flow
- C. Oauth refresh token flow
- D. Oauth SAML bearer assertion flow

Answer: A,C

Explanation:
OAuth refresh token flow and OAuth JWT bearer token flow are the recommended best practices for using OAuth flows inthis scenario. These flows are suitable for server-to-server integration scenarios where the client application needs to access Salesforce resources on behalf of a user. The OAuth refresh token flow allows the client application to obtain a long-lived refresh token that can be used to request new access tokens without requiring user interaction. The OAuth JWT bearer token flow allows the client application to use a JSON Web Token (JWT) to assert its identity and request an access token. Both flows providea secure and efficient way to integrate with Salesforce and the reward calculation system. OAuth SAML bearer assertion flow is not a recommended best practice for using OAuth flows in this scenario because it requires the client application to obtain a SAML assertion from an identity provider, which adds an extra layer of complexity and dependency. OAuth username-password flow is not a recommended best practice for using OAuth flows in this scenario because it requires the client application to store the user's credentials, which poses a security risk and does not support two-factor authentication. NEW QUESTION # 117

Universal Containers (UC) has an existing Salesforce org configured for SP-Initiated SAML SSO with their Idp. A second Salesforce org is being introduced into the environment and the IT team would like to ensure they can use the same Idp for new org. What action should the IT team take while implementing the second org?

- A. Use a different Entity ID than the first org.

- B. Use the same request bindings as the first org.
- C. Use the same SAML Identity location as the first org.
- D. Use the Salesforce Username as the SAML Identity Type.

Answer: A

NEW QUESTION # 118
Which three types of attacks would a 2-Factor Authentication solution help garden against?

- A. Man-in-the-middle attacks
- B. Dictionary attacks
- C. Phishing attacks
- D. Network perimeter attacks
- E. Key logging attacks

Answer: B,D,E

NEW QUESTION # 119
......

As candidates who will attend the exam, some may be anxious about the coming exam, maybe both in the Identity-and-Access-Management-Architect practice material and the mental state. We will provide you the Identity-and-Access-Management-Architect practice material with high quality as well as the comfort in your mental.
