Study Materials 1z0-071 Review & 1z0-071 Valid Test Prep

If you buy the Software or the APP online version of our 1z0-071 study materials, you will find that the timer can aid you control the time. Once it is time to submit your exercises, the system of the 1z0-071 preparation exam will automatically finish your operation. After a several time, you will get used to finish your test on time. If you are satisfied with our 1z0-071 training guide, come to choose and purchase.

Oracle 1z1-071 certification exam, also known as the Oracle Database SQL exam, is designed to test individuals' knowledge and skills in SQL programming, data modeling, and database management. Oracle Database SQL certification is intended for individuals who want to demonstrate their proficiency in working with Oracle databases and SQL programming. 1z0-071 exam is recognized worldwide as a benchmark for Oracle SQL expertise and is highly valued by employers.

Oracle Database SQL exam is a multiple-choice exam consisting of 73 questions that must be completed within 100 minutes. 1z0-071 Exam is available in English and Japanese languages. 1z0-071 exam covers a wide range of topics, including data manipulation, database design, database objects, and more. 1z0-071 exam is designed to test your knowledge of SQL and your ability to apply it to real-world scenarios.

Oracle Database SQL Sample Questions (Q312-Q317):

NEW QUESTION # 312

You must create a SALES table with these column specifications and data types: (Choose the best answer.) SALESID: Number STOREID: Number ITEMID: Number QTY: Number, should be set to 1 when no value is specified SLSDATE: Date, should be set to current date when no value is specified PAYMENT: Characters up to 30 characters, should be set to CASH when no value is specified Which statement would create the table?

- A. CREATE TABLE sales(
salesid NUMBER(4),
storeid NUMBER(4),
itemid NUMBER(4),
qty NUMBER DEFAULT = 1,
slsdate DATE DEFAULT SYSDATE,
payment VARCHAR2(30) DEFAULT = "CASH");
- B. CREATE TABLE sales(
salesid NUMBER(4),
storeid NUMBER(4),
itemid NUMBER(4),
qty NUMBER DEFAULT 1,
slsdate DATE DEFAULT SYSDATE,
payment VARCHAR2(30) DEFAULT 'CASH');
- C. CREATE TABLE sales(
salesid NUMBER(4),
storeid NUMBER(4),
itemid NUMBER(4),
qty NUMBER DEFAULT 1,
slsdate DATE DEFAULT 'SYSDATE',
payment VARCHAR2(30) DEFAULT CASH);
- D. CREATE TABLE sales(
salesid NUMBER(4),
storeid NUMBER(4),
itemid NUMBER(4),
qty NUMBER DEFAULT = 1,
slsdate DATE DEFAULT SYSDATE,
payment VARCHAR2(30) DEFAULT = "CASH");

Answer: B

NEW QUESTION # 313

Examine the structure of the MARKS table:

Name	Null?	Type
STUDENT_ID	NOT NULL	VARCHAR2 (4)
STUDENT_NAME		VARCHAR2 (25)
SUBJECT1		NUMBER (3)
SUBJECT2		NUMBER (3)
SUBJECT3		NUMBER (3)

Which two statements would execute successfully? (Choose two.)

- A. `SELECT SUM(DISTINCT NVL(subject1,0)), MAX(subject1)FROM marksWHERE subject1 > subject2;`
- B. `SELECT student_name,SUM(subject1)FROM marksWHERE student_name LIKE 'R%';`
- C. `SELECT SUM(subject1+subject2+subject3)FROM marksWHERE student_name IS NULL;`
- D. `SELECT student_name subject1FROM marksWHERE subject1 > AVG(subject1);`

Answer: A,C

NEW QUESTION # 314

Examine the description of the EMPLOYEES table:

Name	Null?	Type
EMPLOYEE_ID	NOT NULL	NUMBER (38)
MANAGER_ID	NOT NULL	NUMBER (38)
DEPARTMENT_ID		NUMBER (38)

Which two queries return rows for employees whose manager works in a different department? (Choose two.)

- A.

```
SELECT emp.*
  FROM employees emp
 WHERE manager_id NOT IN (
    SELECT mgr.employee_id
      FROM employees mgr
    WHERE emp.department_id <> mgr.department_id
  );
```
- B.

```
SELECT emp.*
  FROM employees emp
 JOIN employees mgr
    ON emp.manager_id = mgr.employee_id
 AND emp.department_id <> mgr.department_id
```
- C.

```
SELECT emp.*
  FROM employees emp
 LEFT JOIN employees mgr
    ON emp.manager_id = mgr.employee_id
 AND emp.department_id <> mgr.department_id
```
- D.

```
SELECT emp.*
  FROM employees emp
 WHERE NOT EXISTS (
    SELECT NULL
      FROM employees mgr
    WHERE emp.manager_id = mgr.employee_id
    AND emp.department_id <> mgr.department_id
  );
```
- E.

```
SELECT emp.*
  FROM employees emp
 RIGHT JOIN employees mgr
    ON emp.manager_id = mgr.employee_id
 AND emp.department_id <> mgr.department_id
 WHERE emp.employee_id IS NOT NULL;
```

Answer: B,D

NEW QUESTION # 315

You execute this command:

`ALTER TABLE employees SET UNUSED (department_id);`

Which two are true?

- A. A new column with the name DEPARTMENT_ID can be added to the EMPLOYEES table.
- B. The DEPARTMENT_ID column can be recovered from the recycle bin
- C. The storage space occupied by the DEPARTMENT_ID column is released only after a COMMIT is issued.
- D. The DEPARTMENT_ID column is set to null for all rows in the table
- E. A query can display data from the DEPARTMENT_ID column.
- F. No updates can be made to the data in the DEPARTMENT_ID column.

Answer: A,F

Explanation:

D). True, after setting the DEPARTMENT_ID column to UNUSED, you can add a new column with the name DEPARTMENT_ID to the EMPLOYEES table. The UNUSED clause does not delete the column, it only marks it as no longer being used. E. True, once a column is marked as UNUSED, you cannot make updates to it. It becomes inaccessible for DML operations.

A, B, C, and F are not correct because: A. Once a column is set to UNUSED, it is not available for queries. B.

The storage space is not immediately released after issuing a COMMIT; instead, the actual removal and space reclamation happen when you subsequently issue the DROP UNUSED COLUMNS operation. C. The DEPARTMENT_ID column is not set to null; instead, it's marked as UNUSED, which means it is no longer available for use. F. UNUSED columns are not placed into the recycle bin; they are just marked for deletion, and space can be reclaimed with the DROP UNUSED COLUMNS command.

NEW QUESTION # 316

Evaluate the following SQL statement:

```
SELECT product_name || 'it's not available for order'
```

```
FROM product_information
```

```
WHERE product_status = 'obsolete';
```

You received the following error while executing the above query:

ERROR

ORA-01756: quoted string not properly terminated

What would you do to execute the query successfully?

- A. Remove the single quotation marks enclosing the character literal string in the SELECT clause
- B. Use the Oracle (q) operator and delimiter to allow the use of a single quotation mark within the literal character string in the SELECT clause
- C. Use the escape character to negate the single quotation mark within the literal character string in the SELECT clause
- D. Enclose the character literal string in the SELECT clause within double quotation marks

Answer: B
