UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q80-Q85):

NEW QUESTION # 80
By what step at most should the analysis of input and its future standardization be decided upon?

- A. During To-Be process documentation
- B. During process analysis
- C. During talks with the SME and Business Owner

- D. During As-ls process documentation

Answer: B

Explanation:
The analysis of input and its future standardization should ideally be decided upon during the process analysis phase. This phase involves a detailed review of the current process inputs and outputs, identifying variations, and establishing standardization requirements. During process analysis, a thorough examination of all elements related to the workflow is conducted, which enables the identification of areas where standardization can lead to greater efficiency and consistency. Deciding on standardization at this stage helps ensure that the designed automation will be robust, scalable, and aligned with the organization's goals.

NEW QUESTION # 81
Which types of changes can occur post-implementation in an automation project?

- A. Changes include new initiatives, or future changes on the process that have been approved for automation.
- B. Changes include new reports or dashboards, changes to existing reports and new logs.
- C. Changes include requests that result from increasing the percentage of automation, improvements to the existing automation, bug fixing, or gaps in the documentation, discovered after Go-Live.
- D. Changes include adding new steps, removing existing steps, modifying existing steps or changing the order of executing steps.

Answer: C

Explanation:
Post-implementation, automation projects often undergo iterative refinements. These include requests to expand the automation coverage, optimize the process, fix issues, or fill documentation gaps.
"After Go-Live, it's common to have change requests for enhancements, bug fixes, and updates that improve the stability and performance of the automation." These are part of the continuous improvement cycle in automation programs.

NEW QUESTION # 82
Which subfield of Artificial Intelligence does UiPath Communications Mining leverage?

- A. Speech Processing
- B. Document Understanding
- C. Computer Vision
- D. Natural Language Processing

Answer: D

Explanation:
UiPath Communications Mining Overview:
UiPath Communications Mining utilizes Natural Language Processing (NLP) to understand and process unstructured communications data, such as emails and chat logs.
Why Option D is Correct:
NLP helps identify intents, themes, and concepts in text data, enabling structured data extraction for automation.
Why Other Options Are Incorrect:
Option A: Document Understanding focuses on structured or semi-structured document analysis.
Option B: Speech Processing deals with audio data, not text.
Option C: Computer Vision relates to image or visual data analysis.

NEW QUESTION # 83
What is the purpose of human in the loop?

- A. Human in the loop allows the human to pause a running process.

- B. Human in the loop enables human validation in the middle of the process.
- C. Human in the loop allows the human to stop a running process.
- D. Human in the loop enables human execution flows.

Answer: B

Explanation:
"Human in the loop" is a core concept in UiPath automation solutions, where automation might require human input or decisions to complete a task. Specifically, UiPath defines it as:
"Human-in-the-loop (HITL) involves incorporating human validation steps within an automated workflow to manage exceptions, validate data, or make decisions that require human judgment." This concept is a fundamental part of processes that require human expertise or compliance checks, typically seen in document processing, data extraction, and exception handling.

NEW QUESTION # 84
UiPath Process Mining provides TemplateOne application that offers different generic dashboards containing information, KPIs, and analysis functionality focused on a specific process area What are the 3 standard KPIs part of the Automation Dashboard within the TemplateOne application?

- A. Automation Rate, Total Manual event cost. Intercompany case value
- B. Automation Rate, Total Manual Processing time Supplier Avg. Time
- C. Automation Rate, Material Group Count. Avg. throughput time
- D. Automation Rate, Total Manual Processing time. Total Manual event cost

Answer: D

Explanation:
In the TemplateOne application provided by UiPath Process Mining, the Automation Dashboard includes the following three standard KPIs: Automation Rate, Total Manual Processing Time, and Total Manual Event Cost. These KPIs help in assessing the efficiency and cost-effectiveness of manual vs automated processes within an organization.
