

Pass Guaranteed Quiz 2026 High Pass-Rate JN0-460: Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Review Guide

2026 Latest Easy4Engine JN0-460 PDF Dumps and JN0-460 Exam Engine Free Share: <https://drive.google.com/open?id=1RgJjQ8C1k0mR-sST-AU0NXIv6JA66t-p>

Now is not the time to be afraid to take any more difficult JN0-460 certification exams. Our JN0-460 learning quiz can relieve you of the issue within limited time. Our website provides excellent JN0-460 learning guidance, practical questions and answers, and questions for your choice which are your real strength. You can take the JN0-460 Training Materials and pass it without any difficulty.

Juniper JN0-460 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Campus Fabric Architecture: This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.
Topic 2	<ul style="list-style-type: none"> • Wired Assurance Management or Operations: This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.
Topic 3	<ul style="list-style-type: none"> • Wired Assurance Fundamentals: This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.
Topic 4	<ul style="list-style-type: none"> • Campus EVPN-VXLAN: This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.

Topic 5	<ul style="list-style-type: none"> • Wired Assurance Provisioning or Deployment: This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.

JN0-460 Preparation, JN0-460 Exam Revision Plan

There are three effect versions of the date available for candidates who want to pass the JN0-460 exam. PDF, APP and Software, each version has its advantage, and each version is the most effect way. You can choose the most suitable version to learn. Of course, if you want to, you can choose more than one version to prepare your JN0-460 exam. Our exam materials allow you to prepare for the Real JN0-460 Exam and will help you with the self-assessment. If you like use paper to learn, you can print in PDF; if you like learn with electronic equipment, you can use our APP online version offline. Our Juniper practice test software will give you a real exam environment with multiple learning tools that allow you to do a selective study and will help you to get the job that you are looking for.

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q70-Q75):

NEW QUESTION # 70

The management of switches using MistAI Wired Assurance includes which of the following features?

- A. Manual-only switch discovery
- B. Reduced data security
- **C. AI-driven insights for switch health**
- D. Increased network congestion

Answer: C

NEW QUESTION # 71

When deploying wired assurance, which of the following deployment options is best suited for a dynamic environment with frequent configuration changes?

- **A. Template-based provisioning**
- B. Fixed network architecture
- C. Manual switch configuration
- D. Static IP assignment

Answer: A

NEW QUESTION # 72

Whichtwo statementsare correct about using theManaged optionas yourJuniper Mist Wired Assurance solution?(Choose two.)

- A. No subscription is required.
- B. All information in the Mist AI for supported wired devices is read-only.
- **C. All supported wired devices are fully managed by the Mist AI.**
- **D. A subscription is required.**

Answer: C,D

Explanation:

When deployingJuniper Mist Wired AssuranceinManaged mode, switches are fully integrated with Mist Cloud for configuration, monitoring, and AI-driven operations. Managed mode providescomplete cloud-based management, meaning Mist AI handles

configuration, templates, telemetry, and SLE tracking.

"In Managed mode, the switch configuration is fully managed by Mist Cloud. Administrators configure switches, templates, and policies directly through the Mist dashboard. A valid Wired Assurance subscription is required for Managed mode operation."

Option A: Incorrect - the "Monitor Only" mode is read-only, not Managed.

Option B: Correct - Managed mode requires a Wired Assurance subscription.

Option C: Incorrect - subscriptions are mandatory for Mist-managed devices.

Option D: Correct - in Managed mode, all supported EX switches are fully managed by Mist AI, including configuration and telemetry.

NEW QUESTION # 73

What is the primary benefit of using switch configuration templates?

- A. They improve the performance of switches.
- **B. They provide a consistent configuration for all switches in an organization.**
- C. They reduce Junos OS upgrade times.
- D. They make it easier to make switch-specific configuration changes.

Answer: B

Explanation:

In Juniper Mist AI for Wired, configuration templates are a foundational part of switch onboarding and management. The primary purpose of these templates is to ensure configuration consistency across all switches that belong to a specific site or organization. "Switch configuration templates allow administrators to define a standard configuration that is automatically applied to all switches within a site or organization, ensuring consistency and reducing configuration errors." Templates can contain base configuration parameters such as NTP, syslog, VLANs, port profiles, and authentication settings. When new switches are onboarded to the Mist Cloud, they automatically inherit the template's configuration, ensuring uniform behavior across the network fabric.

Option A is incorrect - templates do not directly impact hardware performance.

Option B is incorrect - templates are not related to upgrade times.

Option C is incorrect - templates are used for uniformity, not for switch-specific changes.

Option D correctly describes their main benefit - ensuring consistent configuration across all switches.

NEW QUESTION # 74

Which statement is correct regarding the Mist UI?

- A. The Mist UI is used to distribute routes between your wireless and physical networks.
- **B. The Mist UI is used to manage network devices.**
- C. The Mist UI is used by cloud providers to provision VMs.
- D. The Mist UI is used by clients to connect to wireless networks.

Answer: B

Explanation:

The Mist UI (User Interface) is Juniper's cloud-based management platform used to manage both wired and wireless devices, including EX, QFX, and SRX platforms.

It provides centralized visibility, configuration, analytics, and AI-driven insights for the entire enterprise network infrastructure.

Within Wired Assurance, the Mist UI enables device claiming, switch templates, configuration management, and SLE monitoring.
