Peoplecert MSP Practitioner, 5th edition Exam 認定 MSP-Practitioner 試験問題 (Q109-Q114):

質問 #109
Which document is prepared with a purpose to share with stakeholders?

- A. Blueprint
- B. Programme Plan
- C. Business Case
- D. Vision

正解：D

解説：
The Vision document is prepared specifically to share with stakeholders to communicate the desired future state the programme aims to achieve. It is a clear, inspirational statement designed to create alignment, motivation, and understanding among all parties involved.
The MSP Practitioner states: "Vision's purpose is to share the idea of better future planned by programme with all stakeholders." It conveys the strategic intent and overarching goals without delving into technical or detailed delivery plans.
Unlike the Business Case or Blueprint, which are more technical or internal management documents, the Vision serves as a powerful communication tool fostering stakeholder engagement and support from the outset.

正解：D

質問＃112
Which of following is NOT part of delivering the capability?

- A. Start Projects
- B. Align projects with benefits realization
- C. Governance: Manage and control delivery
- D. Gateway reviews

正解：D

質問＃113
Which of following is NOT part of delivering the capability?

- A. Start Projects
- B. Align projects with benefits realization
- C. Governance: Manage and control delivery
- D. Gateway reviews

正解：D

解説：
Gateway reviews are not part of delivering the capability but are governance checkpoints that occur at specific programme milestones, including the beginning of the programme, key decision points, and closure.
The MSP Practitioner explains: "Gateway reviews happen at beginning of programme, Key decision points of programme and closure of programme." These reviews are formal assessments to validate readiness, progress, and compliance with governance before major transitions, tranche approvals, or programme closure.
Delivering the capability primarily involves initiating projects, managing their delivery under governance frameworks, and ensuring alignment between project outputs and benefit realization. Governance during delivery includes managing risks, issues, and quality controls to ensure outputs are produced to specification.
Gateway reviews are designed to provide independent assurance and decision points but are external to the ongoing activities of capability delivery. Recognizing this distinction helps maintain clarity of roles and processes within programme management, ensuring focused effort on delivery while maintaining appropriate oversight.
