

Free PDF DevOps-Foundation - PeopleCert DevOps Foundationv3.6Exam Unparalleled Practice Test Online

BTW, DOWNLOAD part of ITdumpsfree DevOps-Foundation dumps from Cloud Storage: <https://drive.google.com/open?id=1dgW7cEhvk7utbo67ZPldlWcLn8ypGiPM>

Our DevOps-Foundation test materials boost three versions and they include the PDF version, PC version and the APP online version. The clients can use any electronic equipment on it. If only the users' equipment can link with the internet they can use their equipment to learn our DevOps-Foundation qualification test guide. They can use their cellphones, laptops and tablet computers to learn our DevOps-Foundation Study Materials. The language is also refined to simplify the large amount of information. So the learners have no obstacles to learn our DevOps-Foundation certification guide.

If you lack confidence for your exam, you can strengthen your confidence for your exam through using DevOps-Foundation exam torrent of us. DevOps-Foundation Soft test engine can simulate the real exam environment, so that you can know the procedure for the exam, and your confidence for the exam can also be built up. What's more, DevOps-Foundation Exam Braindumps are famous for instant access to download, and you can receive downloading link and password within ten minutes, so you start the training right now. You can enjoy free update for 365 days for DevOps-Foundation test materials after payment, and the update version will be sent to you automatically.

DevOps-Foundation Official Practice Test | Test DevOps-Foundation Dumps Free

If you prefer to practice DevOps-Foundation exam dumps on paper, then our exam dumps is your best choice. DevOps-Foundation PDF version is printable, and you can print them into hard one if you like, and you can also take some notes on them and practice them anytime and anyplace. Moreover, DevOps-Foundation training materials cover most of knowledge points for the exam, and you can have a good command of the major knowledge points as well as improve your professional ability in the process of practicing. We offer you free update for 365 days for DevOps-Foundation Exam Materials after purchasing. Our system will send the update version to you automatically.

Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Business and Technology Frameworks: This section of the exam measures the skills of IT operations specialists and covers various supporting frameworks that intersect with DevOps. These include Agile and Lean, IT Service Management, Value Stream Management, Site Reliability Engineering, Safety Culture, Learning Organisations, and Continuous Funding models that enable long-term adaptability.
Topic 2	<ul style="list-style-type: none"> • Automation, Architecting DevOps Toolchains: This section of the exam measures the skills of IT operations specialists and covers key automation principles within the DevOps toolchain. It focuses on CI • CD pipelines, Infrastructure as Code, containerisation, cloud-native architecture, platform engineering, and emerging technologies like Machine Learning and Generative AI in DevOps contexts.
Topic 3	<ul style="list-style-type: none"> • Sharing, Shadowing and Evolving: This section of the exam measures the skills of IT operations specialists and covers the collaborative and adaptive elements of DevOps in enterprise settings. It explores leadership, typical barriers and risks, and outlines how organisations can evolve their DevOps practices through continuous learning, peer shadowing, and experience-based transformation.
Topic 4	<ul style="list-style-type: none"> • Exploring DevOps: This section of the exam measures the skills of DevOps engineers and covers the foundations of DevOps, including its emergence as a critical discipline in the digital era. It introduces learners to the basic purpose, evolution, and significance of DevOps in modern software and infrastructure environments.
Topic 5	<ul style="list-style-type: none"> • Core DevOps Principles: This section of the exam measures the skills of IT operations specialists and covers essential DevOps principles such as the Three Ways, the Theory of Constraints, and Chaos Engineering. It also introduces the concept of learning organisations, showing how systemic thinking supports continuous improvement.
Topic 6	<ul style="list-style-type: none"> • Key DevOps Practices: This section of the exam measures the skills of DevOps engineers and covers core DevOps practices including Continuous Integration, Continuous Testing, Continuous Delivery, and Continuous Deployment. It explores concepts such as Site Reliability Engineering, DevSecOps, Value Stream Management, Platform Engineering, and modern practices like ChatOps and observability.
Topic 7	<ul style="list-style-type: none"> • Culture, Behaviours, Operating Models: This section of the exam measures the skills of DevOps engineers and covers how to assess and evolve organisational culture in relation to DevOps transformation. It includes concepts such as Cultural Debt, Behavioural Models, and Organisational Maturity, helping professionals understand team dynamics and readiness for change.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q63-Q68):

NEW QUESTION # 63

Firmly entrenched silos and a combative relationship between Dev and Ops is an example of:

- A. Low trust
- B. Change fatigue
- **C. Cultural debt**
- D. Poor leadership

Answer: C

Explanation:

Cultural debt-not just low trust or poor leadership-best describes the scenario of entrenched silos and combative Dev/Ops relations.
* Cultural debt leads to resistance to new ways of working, lack of cooperation, and a focus on individual rather than collective success.

Why not the others?

* Low trust and poor leadership are symptoms of cultural debt.

* Change fatigue occurs after repeated failed initiatives; here, the core issue is cultural stasis.

Reference/Extract:

"DevOps transformation often fails without addressing cultural debt. Breaking down silos, building shared understanding, and changing incentives are essential for sustainable change."

NEW QUESTION # 64

Which of the following could encourage the sharing of tools, knowledge, discoveries and lessons learned between development and operational teams?

- A. Common workspaces
- B. Simulations
- C. All of the above
- D. Hackathons

Answer: C

Explanation:

PeopleCert outlines multiple methods to encourage sharing and collaboration:

* A: Common workspaces promote informal communication and rapid problem-solving.

* B: Hackathons provide an engaging environment for innovation, cross-functional teamwork, and sharing solutions.

* C: Simulations (e.g., Game Days) allow teams to practice scenarios, learn from each other, and share insights in a low-risk setting. Each of these fosters trust, transparency, and mutual learning. Using them together can amplify cultural change and skill growth.

Thus, D-All of the above-is correct.

NEW QUESTION # 65

Which of the following is NOT an example of a feedback loop?

- A. Peer review of changes
- B. Product
- C. Monitoring/event data
- D. Dashboards

Answer: B

Explanation:

Feedback loops are mechanisms that provide information to earlier stages in the process, enabling adjustments and improvements.

* A: Dashboards provide real-time visibility into system health, deployment status, and other key metrics, allowing quick corrective action.

* B: Monitoring and event data supply operational insights (latency, errors, resource utilization) that inform both Dev and Ops.

* C: Peer review of changes allows early detection of issues before integration, improving code quality and reducing defects.

D-Product-is not a feedback mechanism. The product is the outcome of development and delivery; while customer feedback on a product can be part of a loop, the "product" itself is not the mechanism delivering actionable information upstream.

Thus, D is the correct choice for "NOT" a feedback loop.

NEW QUESTION # 66

Which of the following would enable an IT organization to consolidate gains from a DevOps pilot?

- A. Hiring new people to expand the DevOps program
- B. Introducing more advanced tools and techniques
- C. Sharing lessons learned
- D. Rewarding the people who participated in the pilot

Answer: C

Explanation:

After a DevOps pilot, consolidating gains requires capturing and sharing lessons learned so that other teams can benefit from successes and avoid repeating mistakes.

This practice supports scaling DevOps practices across the organization by creating a shared knowledge base and promoting continuous improvement.

A (rewards) can motivate but doesn't spread the learning. B (hiring) may expand resources but doesn't ensure knowledge transfer. D (advanced tools) may enhance capability but should come after understanding what worked in the pilot.

Thus, C is the most effective action for consolidating pilot gains.

NEW QUESTION # 67

IT Operations have created a set of centralized platforms and tooling services that any dev team can use to be more productive using guidance from The DevOps Handbook.

Which of the following key characteristics does it have?

- A. A deployment pipeline that automatically runs code quality and security scanning tools
- **B. All of the above**
- C. Deploys applications into known good environments with production monitoring
- D. A shared version control repository with pre-blessed security libraries

Answer: B

Explanation:

A centralized platform in DevOps provides standardized, reusable services to development teams, improving productivity and reducing duplication. Characteristics include:

* A: Centralized version control with approved security libraries promotes consistent and secure coding practices.

* B: Automated pipelines that include quality and security scans ensure compliance and quality are built-in, not bolted on.

* C: Deployment to validated environments with monitoring enables quick detection and resolution of issues.

Since all three characteristics (A, B, C) are described in PeopleCert and The DevOps Handbook as best practices, D-All of the above-is correct.
