## Exam ZDTA Duration, ZDTA Valid Dumps Ppt

The first goal of our company is to help all people to pass the ZDTA exam and get the related certification in the shortest time. Through years of concentrated efforts of our excellent experts and professors, our company has compiled the best helpful and useful ZDTA test training materials to meet all people's demands, and in addition, we can assure to everyone that our study materials have a higher quality than other study materials in the global market, at the same time, these people will be easier to be admitted to the human resources supervisor. The ZDTA learn prep from our company has helped thousands of people to pass the exam and get the related certification, and then these people have enjoyed a better job and a better life. It has been generally accepted that the ZDTA study questions are of significance for a lot of people to pass the exam and get the related certification.

## Zscaler Digital Transformation Administrator Sample Questions (Q114-Q119):

### NEW QUESTION # 114

How does a Zscaler administrator troubleshoot a certificate pinned application?

- A. They could reboot the endpoint device.
- B. They could inspect the ZIA Web Policy.
- C. They could look into the SaaS application analytics tab.
- **D. They could look at SSL logs for a failed client handshake.**

**Answer: D**

Explanation:

Certificate pinning prevents SSL interception by validating a server's certificate against known values. When ZIA performs SSL inspection, it substitutes the certificate with one signed by Zscaler's CA. This causes the handshake to fail for pinned applications. To troubleshoot, an administrator should review SSL logs to identify handshake failures, which indicate certificate pinning issues. Logs will show the TLS negotiation details, including any disruptions.

### NEW QUESTION # 115

What are the two types of Probe supported in ZDX?

- A. Application Probes and Network Probes
- **B. Web Probes and Cloud Path Probes**
- C. Page Speed Probes and Connection Speed Probes
- D. SaaS Probes and Router Probes

**Answer: B**

Explanation:

ZDX supports two probe types: Web Probes and Cloud Path Probes. Web Probes actively retrieve web objects to measure application health, while Cloud Path Probes map the end-to-end network path to pinpoint transit issues.

### NEW QUESTION # 116

What ports and protocols are forwarded to the Zero Trust Exchange when Zscaler Client Connector is using Tunnel 2.0?

- A. TCP ports 80, 443 and 8080 only.
- **B. All TCP and UDP ports as well as ICMP traffic.**
- C. Any HTTP/HTTPS traffic as well as DNS.
- D. All Web ports as well as FTP and SSH.

**Answer: B**

Explanation:

Zscaler Client Connector's Tunnel 2.0 uses a packet-filter based tunnel that encapsulates all IP traffic - both TCP and UDP on any port, plus ICMP - to the Zero Trust Exchange

### NEW QUESTION # 117

Which of the following secures all IP unicast traffic?

- A. Secure Shell (SSH)
- B. Tunnel with local proxy
- **C. Z-Tunnel 2.0**
- D. Enforce PAC

**Answer: C**

Explanation:

Z-Tunnel 2.0 is the technology designed to secure all IP unicast traffic. It establishes encrypted tunnels between clients and Zscaler cloud edges, providing secure, transparent forwarding of all IP-based traffic, beyond just HTTP/S, ensuring comprehensive protection of network communications.

#### **NEW QUESTION # 118**

Which is an example of Inline Data Protection?

- A. Preventing the sharing of a sensitive document in OneDrive.
- B. Analyzing a customer's M365 tenant for security best practices.
- C. Preventing the copying of a sensitive document to a USB drive.
- **D. Blocking the attachment of a sensitive document in webmail.**

**Answer: D**

Explanation:

Inline Data Protection is the process of inspecting data as it transits the network in real time, enforcing policies that prevent sensitive data from being leaked or transmitted improperly. Blocking the attachment of a sensitive document in webmail represents inline data protection because it intercepts and controls data transmission at the network level, stopping sensitive content before it leaves the organization.

Preventing copying to a USB drive is endpoint control and does not happen inline in network traffic.

Preventing sharing in OneDrive is cloud access security broker (CASB) activity, often done through API integrations, not inline network control. Analyzing M365 tenant security is an audit or advisory activity, not real-time inline protection.

Therefore, the correct example of inline data protection in Zscaler's cloud security services is blocking the attachment of a sensitive document in webmail.

#### **NEW QUESTION # 119**

.....

Nowadays the test ZDTA certificate is more and more important because if you pass it you will improve your abilities and your stocks of knowledge in some certain area and find a good job with high pay. If you buy our ZDTA exam materials you can pass the exam easily and successfully. Our ZDTA Exam Materials boost high passing rate and if you are unfortunate to fail in exam we can refund you in full at one time immediately. The learning costs you little time and energy and you can commit yourself mainly to your jobs or other important things.
