According to Nokia 7750 SR OS Router Configuration Guide (Monitoring and Testing Tools, Chapter:

Verifying Static Routing):

"Once a static route has been configured, you can verify its reachability by using standard ICMP-based commands such as ping or traceroute, targeting an IP address within the destination prefix." Here:

The static route was configured for network 10.2.3.0/24.

You want to test connectivity to host 10.2.3.1, which belongs to that network.

The traceroute command automatically uses the router's routing table (RIB/FIB), so you only need to provide the destination IP address.

Thus, the correct command is simply:

traceroute 10.2.3.1
