Reliable Deep-Security-Professional Test Voucher & Dumps Deep-Security-Professional PDF

In today's technological world, more and more students are taking the Trend Micro Certified Professional for Deep Security (Deep-Security-Professional) exam online. While this can be a convenient way to take an Trend Micro Certified Professional for Deep Security (Deep-Security-Professional) exam dumps, it can also be stressful. Luckily, Dumps4PDF's best Trend Micro Certified Professional for Deep Security (Deep-Security-Professional) exam questions can help you prepare for your Trend Micro Certified Professional for Deep Security (Deep-Security-Professional) certification exam and reduce your stress.

Trend Micro Certified Professional for Deep Security Sample Questions (Q59-Q64):

NEW QUESTION # 59

The Firewall Protection Module is enabled on a server through the computer details. What is default behavior of the Firewall if no rules are yet applied?

- A. All traffic is passed through the Firewall using a Bypass rule
- B. All traffic is permitted through the firewall until either a Deny or Allow rule is assigned.
- C. All traffic is blocked by the firewall until an Allow rule is assigned.
- **D. A collection of default rules will automatically be assigned when the Firewall Protection Module is enabled.**

Answer: D

Explanation:

Deep Security provides a set of Firewall rules that can be applied to policies or directly to a computer. These default rules provide coverage for typical scenarios.

Set up the Deep Security firewall

Explication: Study Guide - page (219)

NEW QUESTION # 60

Based on the configuration setting highlighted in the exhibit, what behavior can be expected during a malware scan?

- A. With the highlighted setting enabled, Deep Security Agents will scan files for known viruses and malware using patterns and any files deemed suspicious will be submitted to a configured Deep Discovery Analyzer for further analysis.
- **B. With the highlighted setting enabled, Deep Security Agents will scan files for known malware as well as newly encountered malware by accessing the Suspicious Objects List.**
- C. With the highlighted setting enabled, Deep Security Agents will scan files for viruses and malware using supplementary aggressive detection pattern files.
- D. With the highlighted setting enabled, Deep Security Agents will scan files for unknown malware using Predictive Machine Learning.

Answer: B

NEW QUESTION # 61

How does Smart Scan vary from conventional pattern-based anti-malware scanning?

- A. Smart Scan improves the capture rate for malware scanning by sending features of suspicious files to a cloud-based server where the features are compared to known malware samples.
- B. Smart Scan identifies files to be scanned based on the content of the file, not the extension.
- **C. Smart Scan shifts much of the malware scanning functionality to an external Smart Protection Server.**
- D. Smart Scan is performed in real time, where conventional scanning must be triggered manually, or run on a schedule.

Answer: C

Explanation:

Advantages of the Smart Scan pattern over the conventional pattern protection in OfficeScan (OSCE)

NEW QUESTION # 62

Policies in Deep Security can include a Context value. Which of the following statements regarding Context is correct?

- A. The Context provides Deep Security Agents with location awareness and are associated with Firewall and Intrusion Prevention Rules.
- B. The Context provides Deep Security Agents with location awareness and are associated with Anti-Malware and Web Reputation Rules.
- C. The Context provides Deep Security Agents with location awareness and are associated with Log Inspection and Integrity Monitoring Rules.
- D. The Context provides Deep Security Agents with location awareness and are associated with Web Reputation Rules only.

Answer: A

Explanation:

Contexts are designed to be associated with Firewall and Intrusion Prevention Rules. If the conditions defined in the Context associated with a rule are met, the rule is applied. To link a security rule to a Context, go to the Options tab in the Properties window for the rule and select the Context from the menu.

Explication: Study Guide - page (165)

NEW QUESTION # 63

What is the role of Apex Central in the Connected Threat Defense infrastructure?

- A. Apex Central stores suspicious files that are awaiting submission to the Deep Discovery Analyzer.
- B. Apex Central compiles the Suspicious Objects List based on the result of file analysis in Deep Discovery Analyzer.
- C. Apex Central submits suspicious files to Deep Discovery Analyzer for further analysis.
- D. Apex Central distributes Deep Security policies to Agents on the protected Servers.

Answer: B

Explanation:

Apex Central receives threat intelligence from Deep Discovery Analyzer, compiles the Suspicious Objects List, and distributes it to integrated security products across the environment, enhancing coordinated defense.
