Cisco DevNet Associate Exam Sample Questions (Q148-Q153):

NEW QUESTION # 148

What is the difference between YAML and JSON data structure?

- A. YAML uses spaces; JSON uses parentheses
- B. YAML uses parentheses; JSON uses spaces
- C. YAML uses indentation; JSON uses brackets and braces
- D. YAML uses brackets and braces; JSON uses indentation

Answer: A

NEW QUESTION # 149

What is a capability of model-driven programmability for infrastructure automation?

- A. generic APIs that are compatible with multiple platforms
- B. automatic version control
- C. compatibility with any networking device
- **D. a single data model across the network**

Answer: D

Explanation:

Model-driven programmability refers to the use of a consistent data model to manage and automate network devices. Key capabilities include:

* Single Data Model Across the Network: Ensures uniformity and consistency in how data is represented and managed across different network devices and platforms.

* Automation and Scalability: Facilitates automated network configurations and operations, enabling scalability.

* Interoperability: Using standardized models (like YANG) allows for interoperability between different network devices and management tools.

* Abstracted API Interfaces: Provides abstracted and consistent APIs that can be used across multiple devices, reducing the complexity of network automation scripts.

* Cisco Model-Driven Programmability

NEW QUESTION # 150

An engineer must configure Cisco Nexus devices and wants to automate this workflow. The engineer enables the Cisco NX-OS REST API to configure the devices by using an Ansible playbook. Before running the code, which resource must be used to verify that the code works correctly?

- A. Cisco Code Exchange
- B. Cisco Learning Labs
- C. Cisco NX-OS SDK
- **D. Cisco Modeling Labs**

Answer: D

Explanation:

Cisco Modeling Labs is an on-premise network simulation tool that runs on workstations and servers. With Cisco Modeling Labs, you can quickly and easily simulate Cisco and non-Cisco networks, using real Cisco images.

NEW QUESTION # 151

Refer to the exhibit.

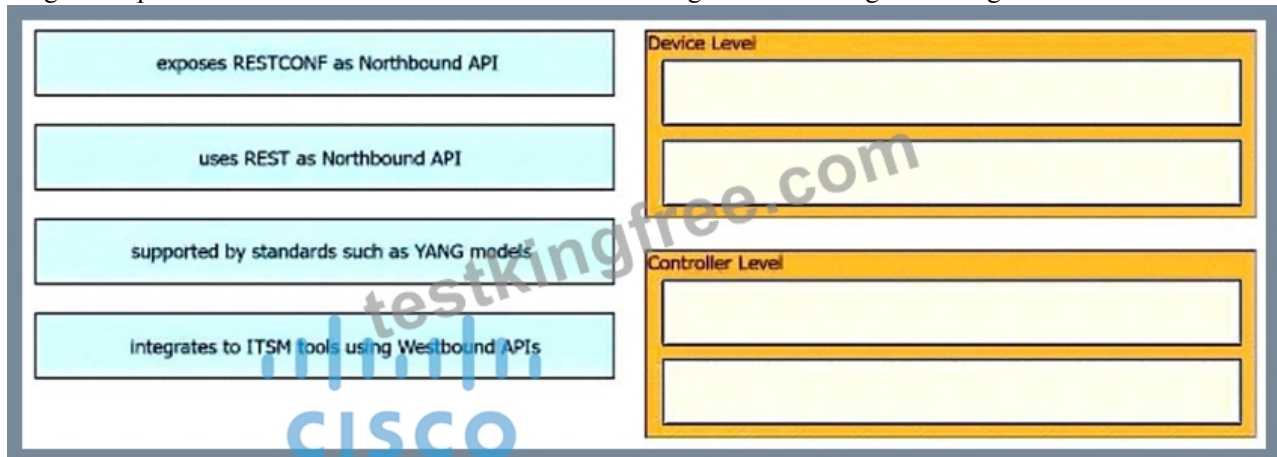

What is the action of the Bash script that is shown?

- A. The script waits until input is entered, then it goes into the directory entered and creates a new directory with the same name.
- B. The script waits until input is entered. If the directory exists, the script goes into it until there is no directory with the same name, then it creates a new directory.
- **C. For all directories in the current folder, the script goes into the directory and makes a new directory.**
- D. The script goes into the directory called "\$ndir" and makes a new directory called "\$ndir".

Answer: C

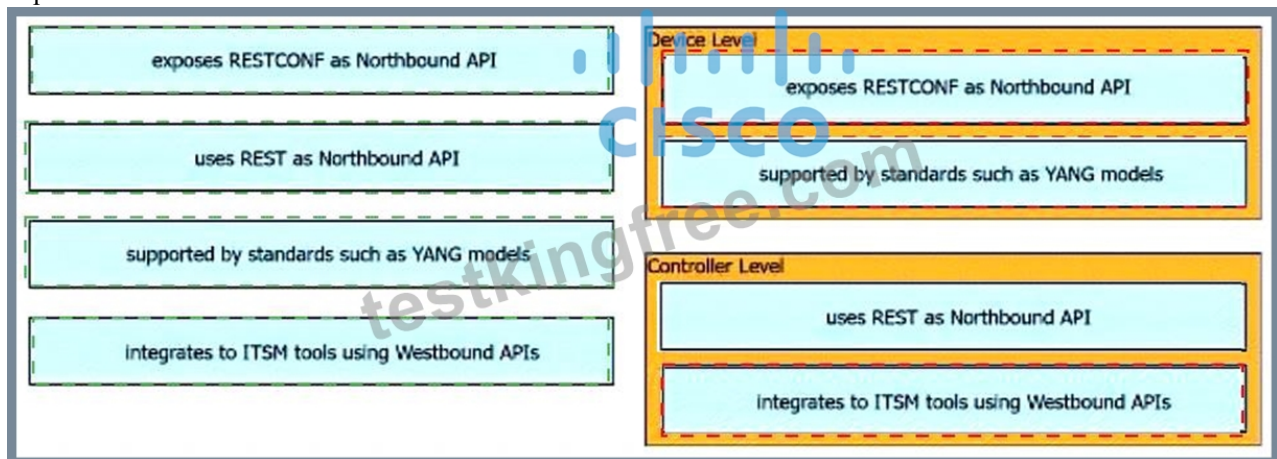

NEW QUESTION # 152

Drag and drop characteristics from the left onto the infrastructure management methodologies on the right.

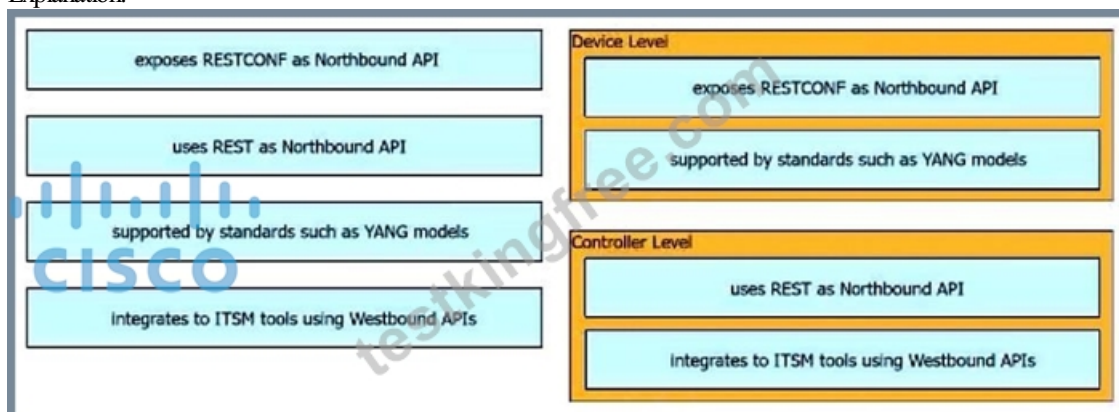

Answer:

Explanation:

Explanation:

NEW QUESTION # 153

.....

If you buy our 200-901 exam questions, then you will find that Our 200-901 actual exam has covered all the knowledge that must be mastered in the exam. You just should take the time to study 200-901 preparation materials seriously, no need to refer to other materials, which can fully save your precious time. To keep up with the changes of the exam syllabus, our 200-901 Practice Engine are continually updated to ensure that they can serve you continuously.
