Real Exam Experience with the Salesforce Salesforce-Communications-Cloud Practice Test

With the rise of internet and the advent of knowledge age, mastering knowledge about computer is of great importance. This Salesforce-Communications-Cloud exam is your excellent chance to master more useful knowledge of it. Up to now, No one has questioned the quality of our Salesforce-Communications-Cloud training materials, for their passing rate has reached up to 98 to 100 percent. If you make up your mind of our Salesforce-Communications-Cloud Exam Questions after browsing the free demos, we will staunchly support your review and give you a comfortable and efficient purchase experience this time.

Salesforce Communications Cloud Accredited Professional (AP) Exam Sample Questions (Q45-Q50):

NEW QUESTION # 45

Universal Connect (UC) offers business TV services to its customer. As part of the offerings, UC requires the business TV's attribute to be changes to gold if account's SLA field value is 'Gold'. What solution does consultant recommend to achieve the requirement?

- A. Advance Rules
- B. Context Rules

- C. Compatibility Rules
- D. Attribute Rules

Answer: A

NEW QUESTION # 46

ABC cloud currently using communication cloud's order management (OM) to orchestrate orders, they also want to start using it for billing activation. ABC cloud's architecture principle is to use an Apigee (Middleware) layer between industries OM and any underlying systems. The billing system interface requires a series of callouts in order to place an order. Which solution should a consultant propose?

- A. Configure a synchronous call out task for each request to the billing system as well as dependencies between those to orchestrate correct sequence
- **B. Configure single synchronous callout task and push the entire payload for Apigee to split into series of calls. The asynchronous callout will accept synchronous response from apigee and asynchronous responses from Apigee about the result of the order submission.**
- C. Configure an Autotask and integration procedure that orchestrate a series of calles to the billing system via Apigee.
- D. Configure single synchronous callout task and push the entire payload for Apigee to split into series of calls. Accept synchronous response from Apigee. Configure a Push Event for asynchronous response from Apigee about the result of the order submission.

Answer: B

NEW QUESTION # 47

A developer has modified the EPC price amount of one mobile device using the product designer from communication cloud. After the price have been changed the developer wants to check the previous EPC price amount to track pricing matrices and get some forecast matrices. How can developer check the previous price amount on the mobile device?

- A. Use price list history checking the changes done after having enabled the track field history on the Price list entry object
- B. Use the versioning feature and comparing the prices for the version product after having enabled the feature
- **C. Use EPC project feature checking the changes done for the defaulted project after having enable the feature**
- D. Creating a new customer field on price list Entry and populating it with the trigger that was created before changing the price

Answer: C

NEW QUESTION # 48

Orbit telecommunication has announced that their B2C mobile business is doing well and there will be high order increase next year well beyond anything they had planned.

What are the two preparatory steps that a consultant should take to ensure the stability in production?

- A. Ensure mule soft is employed for integration to reduce the consumption of salesforce resources
- B. Ensure Enterprise sales management (ESM) is employed to split the large order prior to submission to order management system
- **C. Ensure platform events mode is enabled**
- **D. Ensure that customer have enough Async Apex Callouts and platform events available to cover the load**

Answer: C,D

NEW QUESTION # 49

Universal containers (UC) provides internet service and recently purchased Industries order Management (OM) licenses for their B2B use cases. They have the following requirements:

*Product must be grouped during decomposition in order to send products to the billing system based on location

*After grouping the ordered items based on location, send the respective codes to same billing system for each location Which three steps should a consultant take when designing a solution for these requirement?

- A. Create a decomposition for each service so that it has its own Fulfillment Request and create a Callout task for each of them
- B. Split the order into multiple order and group order items based on the service location
- C. Use the CPQ multisite feature and group the service locations and create orders for each group
- D. After splitting the order create one fulfillment request for each location by creating Orchestration scenarios for each other items

Answer: A,B,D

Explanation:

For UC 's requirement to group products during decomposition based on location and send codes to the billing system, splitting the order into multiple orders based on service location (A), creating a unique decomposition for each service with its own fulfillment request and callout task (B), and creating an orchestration scenario for each grouped order item after splitting the order (D) are recommended steps. This approach ensures that products are grouped and processed according to location, allowing for efficient and accurate billing system integration. References:Salesforce Communications Cloud documentation on order management, decomposition, and orchestration.

NEW QUESTION # 50
