Besides, to fail while trying hard is no dishonor. We will provide the free update of our UiPath-TAEPv1 study engine until you pass your exam successfully!

UiPath Test Automation Engineer Professional v1.0 Sample Questions (Q101-Q106):

NEW QUESTION # 101

What type of license is used for an Unattended Robot in development and testing mode, enabling it to execute both test cases and RPA processes?

- A. Citizen Developer
- B. RPA Developer
- C. Testing
- D. NonProduction

Answer: D

Explanation:

A NonProduction license is used for an Unattended Robot in development and testing mode, allowing it to execute both test cases and RPA processes. It is ideal for scenarios that simulate production without affecting live environments.

NEW QUESTION # 102

How does the licensing model work for Testing runtimes in UiPath?

- A. It counts the maximum number of Testing robots that are able to execute tests simultaneously, given by the total number of runtimes allocated to all the online machines.
- B. It counts the total number of licenses available and divides them amongst the Testing robots.
- C. It works by allocating a fixed number of licenses per testing robot, regardless of the maximum number that can execute tests simultaneously.
- D. It counts the individual testing robots on a machine and assigns each of them an equal number of licenses.

Answer: A

Explanation:

The licensing model for Testing runtimes in UiPath is based on the maximum number of Testing robots that can execute tests simultaneously, which is determined by the total number of runtimes allocated to all online machines. This ensures efficient utilization of available resources.

NEW QUESTION # 103

What are the mock testing conditions in UiPath?

- A. * There can be only one mock file for a workflow
 - * Nested mocks are available
 - * Mock.json file does not contain configuration settings for mock files
 - * Changes made in the source workflow file are not applied to the mock file when the project is saved
- B. * There can be multiple mock files for a workflow
 - * Nested mocks are available
 - * Mock.json file contains configuration settings for mock files
 - * Changes made in the source workflow file are not applied to the mock file when the project is saved
- C. * There can be only one mock file for a workflow
 - * Nested mocks are not available
 - * Mock.json file contains configuration settings for mock files
 - * Changes made in the source workflow file are applied to the mock file when the project is saved
- D. * There can be multiple mock files for a workflow
 - * Nested mocks are not available
 - * Mock.json file contains configuration settings for mock files
 - * Changes made in the source workflow file are applied to the mock file when the project is saved

Answer: B

Explanation:

In UiPath, mock testing conditions include:

NEW QUESTION # 104

How can the results of a test case be overridden in Test Manager?

- A. Navigate to Test Results, click on Test Manager settings and then select Override test results feature.
- B. Go to Test Results, select a test case and then use the Override tool in the toolbar.
- C. Navigate to Test Results, open a test result, open a test case log and then select Tasks > Override result.
- D. Select the test case from the Results tab and click on Override result.

Answer: C

Explanation:

To override the results of a test case in Test Manager, navigate to Test Results, open a specific test result, then open the related test case log, and select Tasks > Override result. This allows manual correction of results if needed for traceability or reporting accuracy.

NEW QUESTION # 105

A developer needs to design a coded automation that approves or denies a loan application based on the loan rate. How should the Execute() entry point method be declared if it needs to return the value for (IsLoanApproved), based on the loan rate (LoanRate)?

- A. public int Execute (bool IsLoanApproved)
- **B. public bool Execute (bool IsLoanApproved, int loanRate)**
- C. public (bool IsLoanApproved) Execute(int LoanRate)
- D. public (int LoanRate) Execute(bool IsLoanApproved)

Answer: B

Explanation:

The correct method signature for a coded automation in UiPath that needs to process input (loanRate) and return a value (IsLoanApproved) is:

```
**public bool Execute(bool IsLoanApproved, int loanRate)**
```

This follows the standard format where input parameters are passed to the method, and the result is returned via the method's return type.

NEW QUESTION # 106

.....

It was never so easy to make your way to the world's most rewarding professional qualification as it has become now!
