

Features of Huawei H35-211_V2.5 PDF Dumps Formate

Our H35-211_V2.5 certification has great effect in this field and may affect your career even future. H35-211_V2.5 real questions files are professional and high passing rate so that users can pass exam at the first attempt. High quality and pass rate make us famous and growing faster and faster. Many candidates compliment that H35-211_V2.5 Study Guide materials are best assistant and useful for qualification exams, and only by practicing our H35-211_V2.5 exam braindumps several times before exam, they can pass H35-211_V2.5 exam in short time easily.

It is the right time to advance your professional career. You can do this easily after passing the HCIP-Access V2.5 H35-211_V2.5 certification exam. To pass the Huawei H35-211_V2.5 exam the Huawei H35-211_V2.5 Exam Practice test questions are the right choice. The updated and real Huawei Dumps are ready for download. Just download and start preparation.

Downloadable Huawei H35-211_V2.5 PDF | H35-211_V2.5 Exam Questions Vce

Though there are three different versions of our H35-211_V2.5 practice guide to cater to all needs of our worthy customers: the PDF, Software and APP online. I love the Software version the most. The software version of our H35-211_V2.5 exam questions can be used in the Windows system, which is designed by the experts from our company. The functions of the software version are very special. For example, the software version of our H35-211_V2.5 Learning Engine can simulate the real exam environment.

Huawei HCIP-Access V2.5 Sample Questions (Q17-Q22):

NEW QUESTION # 17

Compared with Type C dual-homing protection, which of the following statements about Type C single-homing protection are correct?

- A. Protects important services such as enterprise and base station private line access services.
- B. If the OLT is faulty, services are interrupted.
- C. The networking is simple, and the OLT and ONU management is simple.
- D. When the OLT or uplink of the OLT is faulty, services can be switched to the other OLT.

Answer: B,C

NEW QUESTION # 18

When the Type C dual-home protection linkage uplink detection is enabled, if the OLT or the OLT uplink fails, the Type C dual-home protection can switch over to another OLT.

- A. False
- B. True

Answer: B

Explanation:

Type C GPON protection uses two different OLTs (dual-home). With uplink status linkage configured, a failure of the active OLT itself or its uplink interface triggers a protection switchover to the standby OLT to maintain service continuity for ONUs homed through the protected ODN.

References: HCIP-Access V2.5 Study Guide (Type C Dual-Home Protection and Uplink Linkage); Huawei OLT Protection Feature Description (Type C Protection Behavior and Switchover Conditions).

NEW QUESTION # 19

After the anti-IP attack function is enabled on an OLT, the OLT cannot be remotely managed through Telnet.

- A. TRUE
- B. FALSE

Answer: B

NEW QUESTION # 20

(Radio) Regarding multicast, the following description is incorrect:

- A. Device-based global configurations of Layer 2 multicast refer to common parameters of protocols (IGMP Proxy, IGMP Snooping) for all.
- B. Add IGMP user under BTV; by default, multicast users can watch 8 programs.
- C. When the IGMP match mode is disabled, you need to configure the multicast program group.
- D. The user-issued IGMP Report is captured in the line board logic and sent to the line board CPU.

Answer: A

Explanation:

A (True): Huawei multicast configuration defaults commonly allow a user to watch up to 8 programs simultaneously unless overridden (e.g., max-program-num default 8 in multicast/VLAN views and controllable multicast profile).

B (True): On Huawei access devices, IGMP Reports from users are processed by the line card (board) logic /CPU as part of IGMP Snooping/controllable multicast handling to build forwarding entries. (See Huawei IGMP Snooping/Proxy architecture descriptions.) C (Incorrect): IGMP Snooping is a Layer 2 function, but IGMP Proxy is a Layer 3 function (runs on a gateway to originate Queries and proxy membership upstream). Grouping them together as "Layer 2 global parameters" is incorrect. Huawei documentation distinguishes IGMP Snooping (L2) from IGMP Proxy (L3).

D (True in practice): When automatic matching is not used, multicast program groups/channels must be configured so that user joins map to provisioned program entries (consistent with Huawei controllable multicast/BTV configuration workflows).

NEW QUESTION # 21

OLT can perform traffic shaping through service-port.

- A. True
- B. False

Answer: B

Explanation:

On Huawei OLTs, the service-port is a binding between the user-side access (ONT/port) and a VLAN/GEM channel, and it supports traffic policing (CAR/rate-limit) by referencing a traffic/queue profile. Traffic shaping (buffer-based smoothing, token bucket with queue drain) is provided on ports/queues or GEM/LLID directions, not on the service-port object itself. Therefore, shaping is not performed via the service-port; applying a traffic profile there enforces policing, not shaping.

References: HCIP-Access V2.5 Study Guide - OLT QoS Concepts (service-port policing vs port/queue shaping); Huawei OLT QoS & Traffic Management Configuration - service-port CAR and port/GEM shaping behavior.

NEW QUESTION # 22

.....

If you don't pass the Selling HCIP-Access V2.5 (H35-211_V2.5) exam, DumpsActual will refund the money. Some terms and conditions related to the refund are given on the guarantee page. You will not find such excellent offers anywhere else. Therefore, don't miss this golden opportunity and HCIP-Access V2.5 (H35-211_V2.5) practice test material today!
