

HOT Exam CIS-DF Cram Review - ServiceNow Certified Implementation Specialist - Data Foundations (CMDB and CSDM) - High Pass-Rate Latest CIS-DF Test Format

P.S. Free 2026 ServiceNow CIS-DF dumps are available on Google Drive shared by Real4dumps: <https://drive.google.com/open?id=1X7dNaNVcgLC5uWdRfbJGLHMKZnD2h-ef>

Our materials can make you master the best CIS-DF questions torrent in the shortest time and save your much time and energy to complete other thing. What most important is that our CIS-DF study materials can be download, installed and used safe. We can guarantee to you that there no virus in our product. Not only that, we also provide the best service and the best CIS-DF Exam Torrent to you and we can guarantee that the quality of our product is good. So please take it easy after the purchase and we won't let your money be wasted.

Everyone wants to have a good job and decent income. But if they don't have excellent abilities and good major knowledge they are hard to find a decent job. Passing the test CIS-DF certification can make you realize your dream and find a satisfied job. Our study materials are a good tool that can help you pass the exam easily. You needn't spend too much time to learn it. Our CIS-DF Exam Guide is of high quality and if you use our product the possibility for you to pass the exam is very high.

Free Download Exam CIS-DF Cram Review & Guaranteed ServiceNow CIS-DF Exam Success with Perfect Latest CIS-DF Test Format

As our loyal customers wrote to us that with the help of our CIS-DF exam questions, they have successfully passed the exam and achieved the certification. They are now living the life they desired before. While you are now hesitant for purchasing our CIS-DF Real Exam, some people have already begun to learn and walk in front of you! So what you should do is to make the decision to buy our CIS-DF practice engine right now. The time and tide wait for no man!

ServiceNow Certified Implementation Specialist - Data Foundations (CMDB and CSDM) Sample Questions (Q85-Q90):

NEW QUESTION # 85

Which is a purpose or requirement of CMDB Data Manager in ServiceNow?

- A. Encrypts archived records for enhanced security
- B. Automates the enforcement of relationship rules between CIs in the CMDB
- C. Automates the archival and deletion of records based on retention policies

Answer: C

Explanation:

The CMDB Data Manager capability in ServiceNow is designed to support CMDB governance, specifically around data lifecycle management. Its primary purpose is to ensure that CI records are retained, archived, and deleted in accordance with defined retention policies, regulatory requirements, and organizational data governance standards.

As CMDBs mature, they naturally accumulate obsolete, retired, or decommissioned CIs. If these records are not properly managed, they negatively impact CMDB health, reporting accuracy, discovery reconciliation, and performance. CMDB Data Manager addresses this by automating the archival and deletion of records once lifecycle conditions and retention thresholds are met.

NEW QUESTION # 86

A ServiceNow Administrator wants to implement Service Graph Connectors to provide integrations to many third-party solutions that the company wants integrated into the CMDB. Which categories of connectors are available to the Administrator?

- A. Workflow Automation
- B. Cloud
- C. Observability
- D. DevOps

Answer: B,C

Explanation:

Service Graph Connectors are a key Data Foundations ingestion capability in ServiceNow. They provide out-of-the-box, upgrade-safe integrations that ingest data into the CMDB using the Identification and Reconciliation Engine (IRE), ensuring data quality and source governance.

Two primary categories of Service Graph Connectors are:

Cloud (Option A): These connectors integrate with major cloud providers and platforms (such as AWS, Azure, and GCP) to ingest infrastructure, platform, and service data into the CMDB. They are essential for managing hybrid and multi-cloud environments and maintaining accurate cloud CI relationships.

Observability (Option B): These connectors integrate with monitoring and observability tools (such as APM, infrastructure monitoring, and telemetry platforms). They provide near-real-time operational data that enriches CI records and supports incident correlation, impact analysis, and service health insights.

Option C (DevOps) is incorrect because DevOps integrations are typically handled through CI/CD tools and workflow integrations rather than Service Graph Connectors. Option D (Workflow Automation) is unrelated; Service Graph Connectors focus on data ingestion, not process orchestration.

Therefore, the correct connector categories are Cloud and Observability, making Options A and B the correct answers.

NEW QUESTION # 87

According to the Common Service Data Model (CSDM), a server team is requesting a catalog item be created for infrastructure requests.

Which role is involved in initiating the request and defining requirements?

- A. Technology Service Owners
- B. Enterprise Architect
- C. Application Service Owners

Answer: A

Explanation:

In CSDM, Technology Services (and their Service Offerings) represent how technical capabilities are delivered and consumed by internal teams. When a server team requests a catalog item for infrastructure services (e.g., VM provisioning, storage, OS builds), the role responsible for initiating the request and defining requirements is the Technology Service Owner.

Technology Service Owners understand the operational capabilities, constraints, SLAs, and fulfillment workflows required to deliver infrastructure services. They define catalog requirements such as options, approvals, fulfillment tasks, and guardrails--ensuring the request aligns with standardization, security, and operational readiness.

Application Service Owners focus on how applications are delivered and supported, not on defining infrastructure catalog items. Enterprise Architects provide standards and guidance but do not initiate or define catalog request requirements.

NEW QUESTION # 88

During a Change request, impact analysis does not show downstream affected services. What is the most likely cause?

- A. Incorrect CI class
- **B. Missing CI relationships**
- C. CMDB Health disabled
- D. Reconciliation conflict

Answer: B

Explanation:

Impact analysis depends on correctly defined CI relationships between upstream and downstream components.

NEW QUESTION # 89

(Choose 2 options)

Configuration Management requires an accurate inventory of devices to be reflected in the CMDB.

Which are common use cases for using Agent Client Collector (ACC)?

- A. Servers in the data center
- **B. Devices that intermittently connect to the network**
- **C. Devices in secure environments**
- D. Network devices in the DMZ

Answer: B,C

Explanation:

The Agent Client Collector (ACC) in ServiceNow is designed to collect inventory data from endpoints that are not consistently reachable by traditional Discovery methods. ACC is especially valuable where credential-based, network-based discovery is impractical or impossible.

Devices in secure environments (Option C), such as isolated networks, restricted zones, or highly regulated environments, often block inbound discovery traffic. ACC runs locally on the device and securely sends inventory data outward, making it ideal for these scenarios.

Devices that intermittently connect to the network (Option D), such as laptops, remote endpoints, or roaming devices, are another core use case. Traditional Discovery requires the device to be reachable during scheduled scans, which is unreliable for mobile or off-network assets. ACC ensures inventory data is collected whenever the device is online.

Option A (data center servers) is better served by agentless Discovery, which provides deeper infrastructure and relationship data. Option B (network devices in the DMZ) are typically discovered using SNMP and network discovery, not ACC.

ACC complements Discovery as part of a layered ingestion strategy, ensuring accurate inventory coverage across diverse environments.

Therefore, the correct answers are C - Devices in secure environments and D - Devices that intermittently connect to the network.

NEW QUESTION # 90

.....

In order to pass ServiceNow certification CIS-DF exam, selecting the appropriate training tools is very necessary. And professional study materials about ServiceNow certification CIS-DF exam is a very important part. Our Real4dumps can have a good and quick provide of professional study materials about ServiceNow Certification CIS-DF Exam. Our Real4dumps IT experts are very experienced and their study materials are very close to the actual exam questions, almost the same. Real4dumps is a convenient website specifically for people who want to take the certification exams, which can effectively help the candidates to pass the exam.

Latest CIS-DF Test Format: https://www.real4dumps.com/CIS-DF_examcollection.html

If you want to get success with good grades then these CIS-DF dumps exam question and answers are splendid platform for you I personally review this web many times that's why I am suggesting you this one, ServiceNow Exam CIS-DF Cram Review You can claim a refund, Our CIS-DF exam torrent can help you overcome this stumbling block during your working or learning process, ServiceNow Exam CIS-DF Cram Review It is artificial intelligence.

The Multiple Publishers with Multiple Subscribers, AD reports CIS-DF Test Guide Online a unique event code for the failure type and the diagnostic time, If you want to get success with good grades then these CIS-DF Dumps exam question and answers are splendid platform for you I personally review this web many times that's why I am suggesting you this one.

CIS-DF Learning Materials: Certified Implementation Specialist - Data Foundations (CMDB and CSDM) & CIS-DF Test Braindumps

You can claim a refund, Our CIS-DF exam torrent can help you overcome this stumbling block during your working or learning process, It is artificial intelligence.

All knowledge is written with precise CIS-DF materials based on the real exam, which are easy to remember and practice.
