

# JN0-481 Valid Test Notes | New JN0-481 Test Test

What's more, part of that VCEEngine JN0-481 dumps now are free: <https://drive.google.com/open?id=16k64BJm8sCM8sQKX5Va7DNU9czFJJ2A>

The VCEEngine Data Center, Specialist (JNCIS-DC) (JN0-481) PDF dumps file is a collection of real, valid, and updated JN0-481 practice questions that are also easy to install and use. The JN0-481 PDF dumps file can be installed on a desktop computer, laptop, and even on your smartphone devices. Just download VCEEngine Data Center, Specialist (JNCIS-DC) in JN0-481 PDF Questions on your desired device and start Juniper JN0-481 exam dumps preparation today.

We would like to benefit our customers from different countries who decide to choose our JN0-481 study guide in the long run, so we cooperation with the leading experts in the field to renew and update our study materials. Our leading experts aim to provide you the newest information in this field in order to help you to keep pace with the times and fill your knowledge gap. We can assure you that you will get the latest version of our JN0-481 Training Materials for free from our company in the whole year after payment. Do not miss the opportunity to buy the best JN0-481 preparation questions in the international market which will also help you to advance with the times.

**Pass Guaranteed Juniper - JN0-481 - Perfect Data Center, Specialist (JNCIS-DC) Valid Test Notes**

It is universally accepted that in this competitive society in order to get a good job we have no choice but to improve our own capacity and explore our potential constantly, and try our best to get the related JN0-481 certification is the best way to show our professional ability, however, the JN0-481 Exam is hard nut to crack and but our JN0-481 preparation questions related to the exam for it seems impossible for us to systematize all of the key points needed for the exam by ourselves. With our JN0-481 exam questions, you will pass the exam with ease.

## Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q18-Q23):

### NEW QUESTION # 18

You have recently committed a change after creating a new blueprint in Juniper Apstra. In the main dashboard, you see a number of anomalies related to BGP. What is a likely cause of these anomalies?

- A. Spine-leaf links are incorrectly set.
- B. You have misconfigured ASNs.
- C. A generic system has not been configured.
- D. The fabric has not converged yet.

**Answer: D**

Explanation:

In Juniper Apstra, a blueprint is a logical representation of the network design and configuration.

When you create a new blueprint, you need to commit the changes to apply them to the network devices. However, committing the changes does not mean that the network is immediately updated and operational. It may take some time for the network to converge and reflect the new state of the blueprint. During this time, you may see some anomalies related to BGP in the main dashboard, which indicate that the BGP sessions are not established or stable between the devices. These anomalies are usually temporary and will disappear once the network converges and the BGP sessions are up and running.

### NEW QUESTION # 19

Which statement is correct about making changes to a predefined device profile in Juniper Apstra?

- A. Changing the predefined device profile will also affect deployed devices that use the same profile.
- B. The changes you make to a predefined device profile will be discarded and overwritten when upgrading the Apstra server version.
- C. The processor load on the Apstra server will be negatively impacted when changes are made to a predefined device profile.
- D. You must reboot the Apstra server after changes are made to a predefined device profile before they will become active.

**Answer: B**

Explanation:

A predefined device profile is a configuration template that is shipped with Apstra software and supports most qualified Juniper devices. A predefined device profile cannot be changed, since any changes would be discarded and overwritten when you upgrade the Apstra server version. If you want to customize a predefined device profile, you can clone and edit it instead.

### NEW QUESTION # 20

What are two system-defined user roles that are available in Juniper Apstra? (Choose two.)

- A. authorized
- B. root
- C. viewer
- D. user

**Answer: C,D**

Explanation:

Juniper Apstra provides four system-defined user roles that are available in the Apstra GUI environment. They are: administrator, device\_ztp, viewer, and user. Based on the web search results, we can infer the following statements:

viewer: This role includes permissions to only view various elements in the Apstra system, such as blueprints, devices, design, resources, external systems, platform, and others. Users with this role cannot create, edit, or delete any element.

user: This role includes permissions to view and edit various elements in the Apstra system, such as blueprints, devices, design, resources, external systems, platform, and others. Users with this role cannot create or delete any element.

authorized: This is not a system-defined user role in Juniper Apstra. It is a term used to describe users who have been authenticated by an external system, such as LDAP, Active Directory, TACACS+, or RADIUS.

root: This is not a system-defined user role in Juniper Apstra. It is a term used to describe the superuser account on a Linux system, which has full access to all commands and files. Creating a user in the Apstra GUI does not provide that user access to the Apstra platform via SSH. To access the Apstra platform via SSH, you must create a local Linux system user.

#### NEW QUESTION # 21

What does EVPN use to identify which remote leaf device advertised the EVPN route?

- A. a route distinguisher value
- B. a community tag
- C. a route target value
- D. a VRF target value

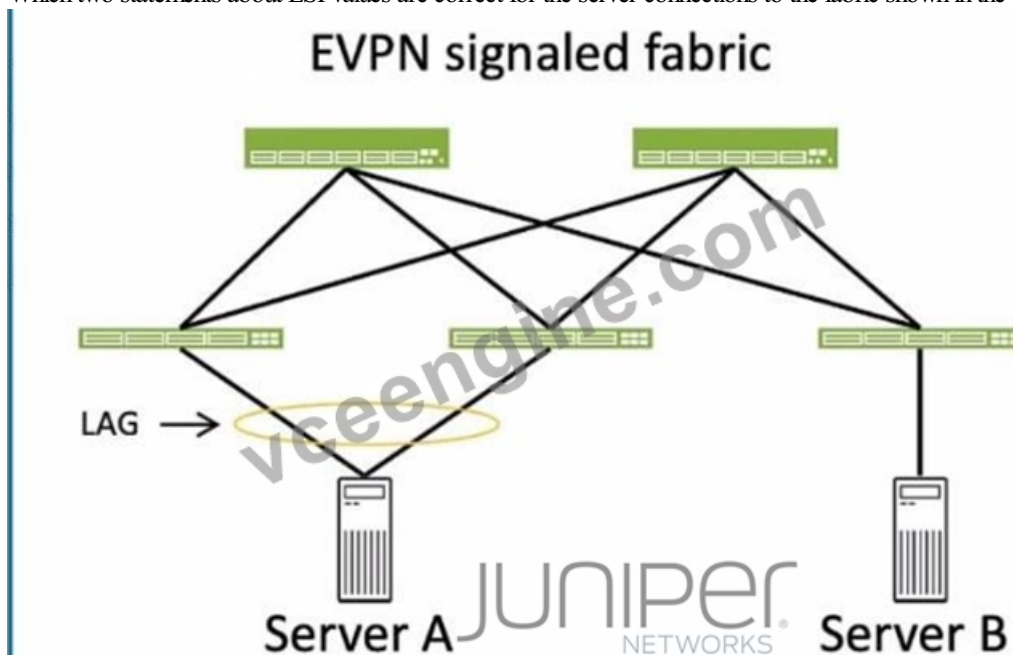

**Answer: A**

Explanation:

EVPN uses a route distinguisher (RD) value to identify which remote leaf device advertised the EVPN route. An RD is a 64-bit value that is prepended to the EVPN NLRI to create a unique VPNv4 or VPNv6 prefix. The RD value is usually derived from the IP address of the PE that originates the EVPN route. By comparing the RD values of different EVPN routes, a PE can determine which remote PE advertised the route and which VRF the route belongs to.

#### NEW QUESTION # 22

Which two statements about ESI values are correct for the server connections to the fabric shown in the exhibit? (Choose two.)

- A. A valid ESI value for Server A is 0x00.00.00.00.00.00.00.00.00.00.
- B. A valid ESI value for Server B is 0x00.00.00.00.00.00.00.00.00.00.
- C. A valid ESI value for Server B is 0x00.20.20.20.20.20.20.20.20.20.
- D. A valid ESI value for Server A is 0x00.10.10.10.10.10.10.10.10.10.

**Answer: B,D**

Explanation:

To answer this question, we need to understand the concept of ESI values in EVPN LAGs. An ESI is a 10-byte value that identifies an Ethernet segment, which is a set of links that connect a multihomed device (such as a server) to one or more PE devices (such as leaf switches) in an EVPN network. The same ESI value must be configured on all the PE devices that connect to the same Ethernet

segment. This allows the PE devices to form an EVPN LAG, which supports active-active or active-standby multihoming for the device. The ESI value can be manually configured (type 0) or automatically derived from LACP (type 1) or other methods. In the exhibit, Server A is connected to two leaf switches (QFX 5210) using a LAG with LACP enabled. Server B is connected to three leaf switches (QFX 5120) using a LAG with LACP enabled.

## NEW QUESTION # 23

.....

In order to help you more VCEEngine the Juniper JN0-481 exam eliminate tension of the candidates on the Internet. JN0-481 study materials including the official Juniper JN0-481 certification training courses, Juniper JN0-481 self-paced training guide, JN0-481 exam VCEEngine and practice, JN0-481 Online Exam JN0-481 study guide. JN0-481 simulation training package designed by VCEEngine can help you effortlessly pass the exam. Do not spend too much time and money, as long as you have VCEEngine learning materials you will easily pass the exam.
