

# 2026 Exam EX432 Pass4sure: Red Hat Certified Specialist in OpenShift Advanced Cluster Management - High-quality RedHat Study EX432 Test

You will feel convenient if you buy our product not only because our EX432 exam prep is of high pass rate but also our service is also perfect. What's more, our update can provide the latest and most useful EX432 exam guide to you, in order to help you learn more and master more. We provide great customer service before and after the sale and different versions for you to choose, you can download our free demo to check the quality of our EX432 Guide Torrent before you make your purchase. You will never be disappointed for buying our EX432 exam questions.

When you first contacted us with EX432 quiz torrent, you may be confused about our EX432 exam question and would like to learn more about our products to confirm our claims. We have a trial version for you to experience. If you choose to purchase our EX432 quiz torrent, you will have the right to get the update system and the update system is free of charge. We do not charge any additional fees. Once our EX432 Learning Materials are updated, we will automatically send you the latest information about our EX432 exam question. We assure you that our company will provide customers with a sustainable update system.

## Study EX432 Test, Dumps EX432 Questions

We know that your work is very busy, and there are many trivial things in life. There is not much time you can spend on research. But our EX432 exam questions can promise to take the exam 20 to 30 hours after you use our products. The idea of EX432 study materials is to let you learn the most valuable things in the shortest possible time. And it is proved and tested by tens of thousands of our loyal customers. And our EX432 training engine can help you achieve success with 100% guarantee.

## RedHat Red Hat Certified Specialist in OpenShift Advanced Cluster Management Sample Questions (Q13-Q18):

### NEW QUESTION # 13

Set TimeWindow for App (Web Console)

Task information: Add timeWindow to Subscription spec (active window Friday 09:00-17:00)

### Answer:

Explanation:

See the solution below in Explanation.

Explanation:

- \* In ACM console go to Applications .
  - \* Select the application you deployed.
  - \* Open the Editor view (YAML editor) for the Subscription object.
  - \* Under spec, add a timeWindow section similar to what the lab requests:
  - \* windowtype: active
  - \* day: Friday
  - \* hours: 09:00-17:00
  - \* Save/apply the changes.
  - \* Verify the Subscription YAML now contains the time window and observe that deployment actions respect the scheduling window.
- Why this matters:
- \* Time windows let you control when changes roll out (useful for change-management, business hours, and maintenance windows).

#### NEW QUESTION # 14

Create a Governance Policy to ensure a namespace exists on selected clusters

#### Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Policies in ACM require:

- \* a Policy resource
- \* a Placement (which clusters to target)
- \* a PlacementBinding (bind policy # placement)
- \* Create the Policy (in team-dev) enforcing a namespace audit-logs:

```
cat << 'EOF' | oc apply -f -
```

```
apiVersion: policy.open-cluster-management.io/v1
```

```
kind: Policy
```

```
metadata:
```

```
name: policy-ensure-audit-namespace
```

```
namespace: team-dev
```

```
spec:
```

```
remediationAction: enforce
```

```
disabled: false
```

```
policy-templates:
```

```
- objectDefinition:
```

```
apiVersion: policy.open-cluster-management.io/v1
```

```
kind: ConfigurationPolicy
```

```
metadata:
```

```
name: ensure-audit-namespace
```

```
spec:
```

```
remediationAction: enforce
```

```
severity: low
```

```
object-templates:
```

```
- complianceType: musthave
```

```
objectDefinition:
```

```
apiVersion: v1
```

```
kind: Namespace
```

```
metadata:
```

```
name: audit-logs
```

```
EOF
```

- \* Create PlacementBinding to bind it to dev-clusters placement:

```
cat << 'EOF' | oc apply -f -
```

```
apiVersion: policy.open-cluster-management.io/v1
```

```
kind: PlacementBinding
```

```
metadata:
```

```
name: bind-policy-ensure-audit-namespace
```

```
namespace: team-dev
```

```
placementRef:
```

```
apiGroup: cluster.open-cluster-management.io
kind: Placement
name: dev-clusters
subjects:
- apiGroup: policy.open-cluster-management.io
kind: Policy
name: policy-ensure-audit-namespace
EOF
```

\* Verify compliance:

```
oc get policy -n team-dev
```

```
oc describe policy policy-ensure-audit-namespace -n team-dev
```

Why this matters:

This is the core "ACM governance" exam pattern: define desired state and enforce across clusters.

### NEW QUESTION # 15

Create MultiClusterHub (CLI Alternative)

Task information: Apply the MultiClusterHub custom resource if not using Web Console.

#### Answer:

Explanation:

See the solution below in Explanation.

Explanation:

\* Ensure you are logged into the hub cluster:

```
* oc whoami
```

```
* oc project open-cluster-management
```

\* Create/apply the MultiClusterHub CR:

```
* oc apply -f multiclusterhub.yaml
```

\* Verify it was created:

```
* oc get multiclusterhub -A
```

```
* oc describe multiclusterhub -n open-cluster-management
```

\* Watch pods come up (typical namespaces include open-cluster-management, open-cluster-management-hub, etc. depending on ACM version/config):

```
* oc get pods -n open-cluster-management -w
```

Why these steps matter:

\* The MultiClusterHub CR is the "hub installation" object. The operator reconciles it and installs/maintains hub services.

### NEW QUESTION # 16

Create Kustomization File

#### Answer:

Explanation:

See the solution below in Explanation.

Explanation:

\* Create an empty kustomization file:

```
* touch overlays/production/kustomization.yaml
```

\* Validate it exists:

```
* ls -l overlays/production
```

Why this matters:

\* kustomization.yaml is the endpoint file Kustomize uses to build overlays.

### NEW QUESTION # 17

Bind Cluster to ClusterSet

Task information: Add cluster-dev to the development ClusterSet.

## Answer:

Explanation:

See the solution below in Explanation.

Explanation:

- \* Confirm the cluster is present on the hub:
- \* `oc get managedcluster`
- \* Bind cluster-dev to development:
- \* `clusteradm clusterset bind --clusterset development --cluster cluster-dev`
- \* Verify membership (common checks):
- \* `oc get managedclustersetbindings -A`
- \* `oc get managedclusterset development -o yaml`
- \* `oc get managedcluster cluster-dev -o yaml | grep -i clusterset -n`

Why this matters:

- \* ClusterSet binding is what allows RBAC/users/apps/policies scoped to that ClusterSet to target the cluster.

## NEW QUESTION # 18

.....

However, it's not always the same. Cramming is not what shall stay in your mind forever. you can forget the lines anytime making you blank while you are trying to solve your EX432 Exam Questions. So, don't cram even if it takes you a little more time to clear your doubts and get the concept clear. Cramming is not going to stay with you forever.
