AI-201考古題推薦，AI-201考試題庫

想要通過AI-201認證考試並不是僅僅依靠與考試相關的書籍就可以辦到的。與其盲目地學習考試要求的相關知識，不如做一些有價值的試題。一本高效率的考古題是大家準備考試時必不可少的工具。所以，快點購買VCESoft的AI-201考古題吧。這是一本命中率很高的考古題，比其他任何學習方法都有效。这是可以保证你一次就成功的难得的资料。

最新的 AI Specialist AI-201 免費考試真題 (Q202-Q207):

問題 #202

An AI Specialist is tasked with configuring a generative model to create personalized sales emails using customer data stored in Salesforce. The AI Specialist has already fine-tuned a large language model (LLM) on the OpenAI platform. Security and data privacy are critical concerns for the client. How should the Agentforce Specialist integrate the custom LLM into Salesforce?

- A. Create an application of the custom LLM and embed it in Sales Cloud via iFrame.
- B. Add the fine-tuned LLM in Einstein Studio Model Builder.
- C. Enable model endpoint on OpenAI and make callouts to the model to generate emails.

答案： B

解題說明：

Since security and data privacy are critical, the best option for the Agentforce Specialist is to integrate the fine-tuned LLM (Large Language Model) into Salesforce by adding it to Einstein Studio Model Builder. Einstein Studio allows organizations to bring their own AI models (BYOM), ensuring the model is securely managed within Salesforce's environment, adhering to data privacy standards.

問題 #203

An AgentForce Specialist wants to troubleshoot an agent that is hallucinating weblinks. The agent has an action that uses a prompt template, which is using a knowledge retriever, to generate the output text that the agent will use. Which process is appropriate to find the root cause of the hallucination behavior?

- A. Examine the topic instructions and ensure the word "ALWAYS" is used in the hallucination guardrails.
- **B. Examine the prompt instructions and contents of the chunks shown in the resolved prompt output.**
- C. Examine the topic name and classification description for hallucination guardrails.

答案： B

解題說明：

Comprehensive and Detailed Explanation From Exact Extract of AgentForce Documents:

According to the AgentForce Troubleshooting and Optimization Guide, hallucinations - instances where the agent fabricates details such as weblinks or data - often occur due to issues in prompt construction or retrieved content grounding. The recommended diagnostic process involves inspecting the prompt template instructions and reviewing the resolved prompt output, including the actual retrieved knowledge chunks.

By examining these areas, the AgentForce Specialist can determine whether the hallucinated content originates from ambiguous prompt phrasing, missing grounding variables, or irrelevant retrieval results. This approach ensures an evidence-based investigation directly linked to the agent's reasoning and generation steps.

問題 #204

Based on the user utterance, 'Show me all the customers in New York', which standard Agent action will the planner service use?

- A. Select Records
- **B. Query Records**
- C. Fetch Records

答案： B

解題說明：

Why is Query Records the Correct Answer?

In Agentforce, the Planner Service is responsible for interpreting user requests and selecting the appropriate Copilot Action to fulfill them. When a user issues a command like:

"Show me all the customers in New York", the system must retrieve a list of customers filtered by location.

The Query Records action is designed precisely for this purpose.

Key Features of Query Records in Agentforce:

Retrieves Data Based on Specific Field Values

This action fetches Salesforce records that match a set of criteria, such as customers located in New York.

Uses standard or custom object fields (e.g., BillingState = 'New York').

Works with Large Language Models (LLMs) and Copilot Actions

When a user asks for filtered data, Query Records is the default action assigned by the Planner Service.

Optimized for Structured Data Retrieval

Ensures AI retrieves relevant CRM records quickly and accurately.

問題 #205

Universal Containers (UC) wants to enable its sales reps to explore opportunities that are similar to previously won opportunities by entering the utterance, "Show me other opportunities like this one." How should UC achieve this with Agents?

- A. Create a custom Agent action calling a flow.

- B. Create a custom Agent action calling an Apex class.
- **C. Use the standard Agent action.**

答案： C

解題說明：

Universal Containers can achieve the request to explore similar opportunities by using the standard Copilot action. Agent has built-in actions to handle natural language queries, such as

"Show me other opportunities like this one." The standard action will process the query and return results based on predefined matching criteria like opportunity details and past Closed Won deals.

This approach avoids the need to create custom flows or Apex classes, leveraging out-of-the-box functionality.

問題 #206

Universal Containers (UC) wants to empower its marketing team with AI capabilities that help employees quickly find campaign data, generate creative content, and manage project tasks. The solution should also allow marketers to receive personalized support, surface relevant information, and complete work directly in Salesforce. Which AI solution should UC implement?

- A. Service Agent
- **B. Employee Agent**
- C. Sales Coach Agent

答案： B

解題說明：

According to the AgentForce Solutions Overview and Employee Agent documentation, the Employee Agent is designed to empower internal teams, such as marketing, sales, HR, and operations, by providing AI-driven assistance within Salesforce. The guide explains: "Employee Agents help internal users find information, automate tasks, generate content, and manage projects directly in Salesforce. They surface personalized insights, support productivity, and leverage enterprise knowledge sources." In the given scenario, the marketing team requires capabilities for content creation, data lookup, and task management-all within Salesforce. This exactly matches the described functionality of an Employee Agent.

問題 #207

.....

揮灑如椽之巨筆譜寫生命之絢爛華章，讓心的小舟在波瀾壯闊的汪洋中乘風破浪，直濟滄海。如何才能到達天堂，捷徑只有一個，那就是使用VCESoft Salesforce的AI-201考試培訓資料。這是我們對每位IT考生的忠告，希望他們能抵達夢想的天堂。
