# Pass Guaranteed Quiz Oracle - High-quality New 1Z0-1195-25 Exam Discount

Our company is a professional certification exam materials provider, we have occupied in this field for more than ten years, and therefore we have rich experience. 1Z0-1195-25 exam braindumps are high quality, because we have a professional team to collect the first-hand information for the exam, we can ensure that you can get the latest information for the exam. In addition, our company is strict with the quality and answers for 1Z0-1195-25 Exam Materials, and therefore you can use them at ease. Our 1Z0-1195-25 exam braindumps are known as instant access to download, you can obtain the downloading link and password within ten minutes.

Do you feel aimless and helpless when the 1Z0-1195-25 exam is coming soon? If your answer is absolutely yes, then we would like to suggest you to try our 1Z0-1195-25 training materials, which are high quality and efficiency test tools. Your success is 100% ensured to pass the 1Z0-1195-25 Exam and acquire the dreaming certification which will enable you to reach for more opportunities to higher incomes or better enterprises.

New Release Oracle 1Z0-1195-25 Exam Questions: Right Preparation Method [2026]

We are quite confident that all these Oracle 1Z0-1195-25 exam dumps feature you will not find anywhere. Just download the Oracle 1Z0-1195-25 and start this journey right now. For the well and quick 1Z0-1195-25 exam dumps preparation, you can get help from Oracle 1Z0-1195-25 which will provide you with everything that you need to learn, prepare and pass the Oracle Data Platform 2025 Foundations Associate (1Z0-1195-25) certification exam.

Oracle 1Z0-1195-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Resiliency: This section tests the knowledge of Database Security Engineers and Disaster Recovery Specialists in implementing Oracle's Maximum Security Architecture and Maximum Availability Architecture to ensure database resiliency and high availability.
Topic 2	• Data Lake, Data Warehouse, and Machine Learning: This section evaluates the expertise of Data Scientists and Big Data Engineers in understanding UCI's Data Lakehouse architecture, Oracle Machine Learning capabilities, and Data Mesh architecture for managing distributed data environments.
Topic 3	• Developing on Oracle Database: This section measures the skills of Application Developers and DevOps Engineers in managing Autonomous Databases using REST APIs, Oracle's data toolset, low-code development with APEX, and CI • CD processes for database tools and APEX applications.

Topic 4	• Exadata and DBCS: This section tests the knowledge of Exadata Specialists and Database Administrators in understanding Exadata deployment options, lifecycle management tasks such as patching and backup, and the features of Oracle Base Database Service (DOracle NoSQL Database ServiceBCS).
Topic 5	• Autonomous Database and Tools: This section evaluates the expertise of Database Administrators and Cloud Engineers in working with Oracle Autonomous Database (ADB). It includes provisioning ADB instances, scaling CPU and storage, starting and stopping databases, and using tools to load data into ADB effectively.
Topic 6	• MySQL and NoSQL: This section measures the skills of Database Developers and Data Engineers in working with Oracle MySQL HeatWave Database Service. It focuses on their features and uses cases for modern application development.

Oracle Data Platform 2025 Foundations Associate Sample Questions (Q16-Q21):

NEW QUESTION # 16
What set of NoSQL-style APIs can be used in Autonomous JSON Database?

- A. OASD (Oracle Application Storage Definition)
- B. OSDA (Oracle Simple Document Access)
- C. DOSA (Document Open Solution Access)
- D. SODA (Simple Oracle Document Access)

Answer: D

Explanation:
The "Autonomous JSON Database" supports NoSQL-style document access through "SODA" (Simple Oracle Document Access) APIs (B). SODA provides a simple, intuitive interface for developers to interact with JSON documents stored in the database using operations like insert, query, and update, without requiring SQL knowledge. Options A ("OASD"), C ("DOSA"), and D ("OSDA") are not recognized API sets in Oracle's documentation. SODA is explicitly documented as the standard NoSQL API for Autonomous JSON Database, aligning with Oracle's converged database strategy to support multiple data models.

NEW QUESTION # 17
Which two are objectives of Oracle's Data Management strategy?

- A. Automate everything for developers, data analysts, DBAs, and data scientists
- B. Provide for the fastest, most scalable converged SQL database
- C. Provide the best platform for warehouse workloads only
- D. Offer multiple integration points for 3rd party databases that work better for mixed and analytic workloads

Answer: A,B

Explanation:
Oracle's Data Management strategy aims to deliver "the fastest, most scalable converged SQL database" (A), exemplified by its Autonomous Database and Exadata systems, which support multiple data types and workloads efficiently. It also seeks to "automate everything for developers, data analysts, DBAs, and data scientists" (B), leveraging self-managing, self-tuning capabilities to reduce manual effort and enhance productivity. Option C ("multiple integration points for 3rd party databases") is not a primary objective, as Oracle focuses on its own ecosystem. Option D ("best platform for warehouse workloads only") is too narrow, as the strategy spans beyond just warehousing to include transactional, analytical, and JSON workloads. Oracle's official data management documentation emphasizes speed, scalability, and automation as core goals.

NEW QUESTION # 18
Which feature allows you to logically group and isolate your Oracle Cloud Infrastructure resources?

- A. Identity and Access Management Groups

- B. Tenancy
- C. Compartments
- D. Availability Domain

Answer: C

Explanation:
"Compartments" (B) in Oracle Cloud Infrastructure (OCI) allow you to logically group and isolate resources for organization, access control, and billing. "Identity and Access Management Groups" (A) organize users, not resources. "Tenancy" (C) is the root container for all resources, not a grouping mechanism, and "Availability Domain" (D) is a physical data center division, not a logical grouping tool. Oracle's OCI documentation identifies Compartments as the primary feature for resource isolation and management.

NEW QUESTION # 19
Which command for the MySQL Data Service will resume OCPU billing?

- A. Start
- B. Stop
- C. Backup
- D. Restart

Answer: A

Explanation:
For the "MySQL Database Service," the "Start" command (A) resumes OCPU billing, as it activates the database instance, incurring compute costs. "Stop" (B) halts billing by suspending the instance, "Restart" (C) is a stop-then-start sequence, and "Backup" (D) affects storage, not OCPU billing. Oracle's MySQL Service documentation ties billing to the Start command.

NEW QUESTION # 20
What are the two main features of APEX's low code platform?

- A. Limited productivity
- B. Focus on business requirements
- C. Use traditional computer programming paradigms
- D. Simplified core-based licensing
- E. Build scalable web apps for MongoDB
- F. Use graphical user interfaces and configuration

Answer: B,F

Explanation:
Full Detailed In-Depth Explanation: Oracle APEX (Application Express) is a leading low-code platform designed to simplify and accelerate application development, particularly within the Oracle ecosystem. The two main features of APEX's low-code platform are "Use graphical user interfaces and configuration" (D) and "Focus on business requirements" (F). Option D reflects APEX's core strength: it provides a browser-based, declarative development environment with drag-and-drop functionality, wizards, and visual UI tools, allowing developers and business users to build applications with minimal coding. This reduces complexity and speeds up development, aligning with the low-code philosophy. Option F highlights APEX's emphasis on enabling users to address business needs directly, rather than getting bogged down in technical intricacies, by offering prebuilt components and templates tailored to solve real-world problems efficiently. "Limited productivity" (A) is incorrect, as APEX enhances productivity significantly. "Build scalable web apps for MongoDB" (B) is false, as APEX is optimized for Oracle Database, not MongoDB. "Simplified core-based licensing" (C) is a licensing aspect, not a development feature, and "Use traditional computer programming paradigms" (E) contradicts APEX's low-code approach, which minimizes hand-coding. Oracle's official APEX documentation emphasizes its graphical, business-focused design as key differentiators.

NEW QUESTION # 21
......

As we all know, if you want to pass the 1Z0-1195-25 exam, you need to have the right method of study, plenty of preparation time, and targeted test materials. However, most people do not have one or all of these. That is why I want to introduce our 1Z0-1195-

25 Original Questions to you. So why not try our Oracle original questions, which will help you maximize your pass rate? Even if you unfortunately fail to pass the exam, we will give you a full refund.
