

ISO-IEC-27001-Foundation 최신 업데이트 시험덤프 & ISO-IEC-27001-Foundation 최고 품질 인증 시험기출문제

제일 간단한 방법으로 가장 어려운 문제를 해결해드리는 것이 Fast2test의 취지입니다. APMG-International 인증 ISO-IEC-27001-Foundation 시험은 가장 어려운 문제이고 Fast2test의 APMG-International 인증 ISO-IEC-27001-Foundation 덤프는 어려운 문제를 해결할 수 있는 제일 간단한 공부방법입니다. Fast2test의 APMG-International 인증 ISO-IEC-27001-Foundation 덤프로 시험준비를 하시면 아무리 어려운 APMG-International 인증 ISO-IEC-27001-Foundation 시험도 쉬워집니다.

APMG-International ISO-IEC-27001-Foundation 시험요강:

주제	소개
주제 1	• Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.
주제 2	• Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.
주제 3	• Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.
주제 4	• Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.
주제 5	• Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.

ISO-IEC-27001-Foundation 최신 업데이트 시험덤프 인증시험패스하여 자격증 취득하기

APMG-International 업계에 종사하시는 분들은 ISO-IEC-27001-Foundation 인증시험을 통한 자격증 취득의 중요성을 알고 계실 것입니다. Fast2test에서 제공해드리는 인증시험대비 고품질 덤프자료는 제일 착한 가격으로 여러분께 다가갑니다. Fast2test 덤프는 ISO-IEC-27001-Foundation 인증시험에 대비하여 제작된 것으로서 높은 적중율을 자랑하고 있습니다. 덤프를 구입하시면 일년 무료 업데이트 서비스, 시험불합격시 덤프비용 환불 등 완벽한 서비스도 받을 수 있습니다.

최신 ISO/IEC 27001 ISO-IEC-27001-Foundation 무료 샘플문제 (Q46-Q51):

질문 # 46

What is a requirement for a corrective action made in response to a nonconformity?

- A. They are appropriate to the effects of the nonconformity
- B. They always eliminate the cause of the nonconformity
- C. They do NOT change the organization's information security policies
- D. They are proportionate to the likelihood of the nonconformity recurring

정답: A

설명:

Clause 10.1 (Nonconformity and corrective action) specifies:

"The organization shall react to the nonconformity and, as applicable: take action to control and correct it; deal with the consequences; evaluate the need for action to eliminate the cause(s)...

Corrective actions shall be appropriate to the effects of the nonconformities encountered." This confirms option B. Option A is inaccurate-ISO requires actions appropriate to effects, not probability alone. Option C is false-policies may need updating to correct nonconformities. Option D is incorrect, as not every cause can always be eliminated; residual issues may exist.

Thus, the verified requirement is B.

질문 # 47

To whom does the scope of the Terms and conditions of employment control apply?

- A. Contractors only
- B. Personnel and the organization
- C. Employees only
- D. All employees, contractors and third-party users

정답: D

설명:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.6.1 (Terms and conditions of employment) states:

"The contractual agreements with employees and contractors shall state their and the organization's responsibilities for information security." This means the control applies not just to employees, but also contractors and, where relevant, third-party users who are subject to contractual obligations with the organization. The goal is to ensure that all parties engaged in work under the organization's control understand their security responsibilities before, during, and after employment or contract engagement.

Options A and B are too narrow, excluding key groups. Option C misrepresents the scope by implying a mutual responsibility but not identifying the individuals covered. The explicit scope includes employees, contractors, and third-party users.

Therefore, the correct answer is D.

질문 # 48

Identify the missing word in the following sentence.

The organization shall determine the [?] of interested parties relevant to information security.

- A. number
- B. influence
- C. requirements
- D. structure

정답: C

설명:

Clause 4.2 of ISO/IEC 27001:2022 states:

"The organization shall determine: a) interested parties that are relevant to the information security management system; b) the relevant requirements of these interested parties; c) which of these requirements will be addressed through the ISMS." This confirms that the missing word is requirements. Neither number, structure, nor influence are specified in the standard.

질문 # 49

Identify the missing words in the following sentence.

The organization shall establish, implement, maintain and [?] an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document.

- A. communicate the importance of
- B. continually improve
- C. report on
- D. enforce standards for

정답: B

설명:

Clause 4.4 of ISO/IEC 27001:2022 states:

"The organization shall establish, implement, maintain and continually improve an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document." This requirement highlights that an ISMS is not static; it must evolve continuously to adapt to new risks, technologies, and business changes. Options A, C, and D are not mentioned in the clause. The continual improvement cycle is central to ISO standards, aligning with the Plan-Do-Check-Act (PDCA) model.

Thus, the missing words are "continually improve."

질문 # 50

What is the definition of a threat according to ISO/IEC 27000?

- A. The risk remaining after risk treatment
- B. A weakness of an asset or a control that can be exploited
- C. A potential cause of an unwanted incident which can result in harm to a system or organization
- D. A single or a series of unwanted or unexpected information security events

정답: C

설명:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

According to ISO/IEC 27000:2018, Clause 3.74, a threat is defined as:

"Potential cause of an unwanted incident, which can result in harm to a system or organization." This definition directly matches option A.

* Option B refers to an "information security incident" (ISO/IEC 27000:2018, Clause 3.32).

* Option C describes a "vulnerability" (ISO/IEC 27000:2018, Clause 3.67).

* Option D refers to "residual risk" (ISO/IEC 27000:2018, Clause 3.61).

The standard emphasizes that threats exploit vulnerabilities, causing incidents that can harm information confidentiality, integrity, and availability. Correctly identifying threats is critical for risk assessment (Clause 6.1.2). Thus, the correct definition per ISO/IEC 27000 is A.
