The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q57-Q62):

NEW QUESTION # 57

Consider the following example value stream:

Which of the following statements is most correct?

- A. The value stream is decomposed into five sequential events.
- B. The value stream is decomposed into five value stream stages
- C. The value stream is mapped to five subsidiary value streams.
- D. The value stream consists of five sequential subprocesses.

Answer: B

Explanation:

According to the TOGAF Series Guide to Value Streams (Version 1), a value stream stage is defined as "a distinct part of a value stream that represents a group of activities contributing to an overall result" 5. A value stream stage can be expressed as a noun phrase that indicates what outcome or state is achieved by completing the stage5. For example, some possible value stream stages are "Product Ordered", "Payment Processed", or

"Customer Satisfied". The example value stream shows how an online retailer creates and delivers value for its customers by performing five value stream stages: "Acquire Retail Product", "Advertise Channels", "Display Products", "Enable Selection", "Process Payment", and "Deliver Product(s)" 5. Therefore, the value stream is decomposed into five value stream stages.

NEW QUESTION # 58

In what TOGAF ADM phase is the organization map linked built out with the detail and relationships to overviews in order to understand the needs of the organization?

- A. Preliminary Phase
- B. Phase E
- C. Phase B
- D. Phase A

Answer: D

Explanation:

Phase A (Architecture Vision) of the TOGAF ADM builds out initial organizational maps to understand high-level organizational needs and link them to architecture goals. This step provides foundational insight that informs subsequent phases, particularly for stakeholder alignment.

Reference:

In TOGAF, Phase A (Architecture Vision) is where the organization map is developed in detail and linked to overviews to understand the organizational needs. This phase focuses on:

Defining the scope of the architecture: This includes identifying the parts of the organization that will be affected by the architecture and the timeframe for the architecture development.

Identifying stakeholders and their concerns: Understanding the needs and expectations of different stakeholders is crucial for developing an architecture that meets their requirements.

Creating a high-level architecture vision: This vision outlines the desired future state of the architecture and how it will support the organization's strategic goals.

NEW QUESTION # 59

What component of the Architecture Repository is an architectural representation of SBBs supporting the Architecture Landscape?

- A. Solutions Landscape
- **B. Solutions Continuum**
- C. Solutions Library
- D. Solutions Repository

Answer: B

Explanation:

In the context of the TOGAF Architecture Repository, the Solutions Continuum represents an architectural representation of Solution Building Blocks (SBBs) supporting the Architecture Landscape. It provides a view of the available and implemented solutions that can be used or adapted for new initiatives.

NEW QUESTION # 60

Which of the following is the element of a value stream stage that describes the state change that triggers the value stream stage?

- A. Baseline state
- B. Starting point
- **C. Gating stage**
- D. Enhance criteria

Answer: C

Explanation:

In the context of value stream stages, a gating stage is the element that describes the specific state change which triggers the next stage of the value stream to begin. It acts as a checkpoint that ensures that certain criteria are met before the process can proceed to the next phase.

NEW QUESTION # 61

Which of the following is a benefit of organization mapping?

- **A. An organization map improves strategic planning.**
- B. An organization map highlights inefficiencies and reduces operational costs.
- C. An organization map can be reused for training and employee development.
- D. An organization map improves the ability to consume, process, and deliver information.

Answer: A

Explanation:

Organization mapping is a technique used to represent the structure and relationships within an organization. Here's a detailed explanation of its benefits, particularly for strategic planning:

Organization Mapping:

Organization maps visually represent the hierarchical structure of an organization, including departments, teams, and reporting relationships. They provide insights into how the organization is structured and how different parts interact.

Benefits for Strategic Planning:

Alignment with Strategy: An organization map helps in aligning organizational structure with strategic goals. By understanding how the organization is structured, leaders can ensure that resources are allocated efficiently and that the organizational design supports the strategic objectives.

Identifying Gaps and Overlaps: Organization maps highlight areas where there might be gaps or overlaps in roles and responsibilities. This information is crucial for making strategic decisions about restructuring or reallocating resources.

Improving Communication: By clearly depicting the organizational structure, these maps improve communication and collaboration within the organization. This is particularly important for strategic planning, as it ensures that all parts of the organization are aligned and working towards the same goals.

TOGAF Reference:

Phase B: Business Architecture: Organization mapping is a key activity in this phase, where the current organizational structure is analyzed to ensure it supports the business strategy and architecture vision.

Strategic Planning: TOGAF emphasizes the importance of aligning the business architecture with strategic planning. Organization maps are tools that facilitate this alignment by providing a clear representation of the organizational structure.

In summary, organization mapping improves strategic planning by providing a clear, visual representation of the organizational structure, helping to align resources and design with strategic goals.

NEW QUESTION # 62

Our OGBA-101 learning guide materials have always been synonymous with excellence. Our OGBA-101 practice guide can help users achieve their goals easily, regardless of whether you want to pass various qualifying examination, our products can provide you with the learning materials you want. Of course, our OGBA-101 Real Questions can give users not only valuable experience about the exam, but also the latest information about the exam. Our OGBA-101 practical material is a learning tool that produces a higher yield than the other. If you make up your mind, choose us!
