

最近更新的DP-420測試題庫，幫助妳快速通過DP-420考試

P.S. Fast2test在Google Drive上分享了免費的2026 Microsoft DP-420考試題庫：https://drive.google.com/open?id=1_sHlaeVi8yzLA9g2KUZGjVdXC5lnG9L

Fast2test始終致力於為客戶提供高品質的學習資料，來提高考生一次性通過Microsoft DP-420考試的概率，這是考生獲取認證最佳捷徑。我們的DP-420認證PDF和軟件版本具有最新更新的問題解答，涵蓋了所有考試題目和課題大綱，在線測試引擎測試可以幫助您準備並熟悉實際考試情況。在您決定購買我們產品之前，您可以先免費嘗試Microsoft DP-420 PDF版本的DEMO，此外，我們還提供全天24/7的在線支持，以便為客戶提供最好的便利服務。

Microsoft DP-420考試是IT專業人士展示他們在使用Microsoft Azure Cosmos DB設計和實現雲原生應用程序方面的技能和知識的絕佳機會。隨著對雲原生應用程序的需求不斷增加，通過此考試不僅可以驗證您的專業知識，還可以幫助您在就業市場上保持競爭力。

DP-420認證考試由多個選擇題組成，涵蓋了設計和實施使用Azure Cosmos DB的雲原生應用的各種主題。候選人將被測試他們設計容器和分區的能力、實施數據建模最佳實踐、優化查詢性能以及配置和管理Azure Cosmos DB實例的能力。

Microsoft DP-420考試適合與Azure Cosmos DB一起工作的開發人員、架構師和IT專業人員。通過該考試的考生將對Azure Cosmos DB架構、雲原生應用程序的設計原則以及實施和部署它們的最佳實踐有深入的了解。

有效的考試認證資料Microsoft DP-420測試題庫是由Microsoft公司專業認證培訓師認真研發的

Fast2test是個為Microsoft DP-420 認證考試提供短期的有效培訓的網站，但是Fast2test能保證你的Microsoft DP-420 認證考試及格。如果你不及格，我們會全額退款。在你選擇購買Fast2test的產品之前，你可以在Fast2test的網站上免費下載我們提供的部分關於Microsoft DP-420認證考試的練習題及答案作為嘗試，那樣你會更有信心選擇Fast2test的產品來準備你的Microsoft DP-420 認證考試。

最新的 Azure Cosmos DB Developer Specialty DP-420 免費考試真題 (Q70-Q75):

問題 #70

You have an Azure subscription.

You plan to create an Azure Cosmos DB for NoSQL database named DB1 that will store author and book data for authors that have each published up to ten books. Typical and frequent queries of the data will include:

- * All books written by an individual author
- * The synopsis of individual books

You need to recommend a data model for DB1. The solution must meet the following requirements:

- * Support transactional updates of the author and book data.
- * Minimize read operation costs.

What should you recommend?

- A. Create three containers, one that stores author items, a second that stores book items, and a third that stores items that represent the relationship between the authors and their books.
- B. Create a single container that stores author items and book items, and then items that represent the relationship between the authors and their books.
- C. Create two containers, one that stores author items and another that stores book items. Embed a list of each author's books in the corresponding author item.
- D. Create a single container that stores author items and book items. Embed a list of each author's books in the

答案： D

問題 #71

You have an Azure Synapse Analytics workspace named workspace1 that contains a server less SQL pool.

You have an Azure Table Storage account that stores operational data.

You need to replace the Table storage account with Azure Cosmos DB for NoSQL. The solution must meet the following requirements:

- * Support Queries from the server less SQL pool.
- * Only pay for analytical compute when running queries.
- * Ensure that analytical processes do

NOTE: affect operational processes.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

□

答案：

解題說明：

□ Explanation

□

問題 #72

You have an Azure Cosmos DB Core (SQL) API account used by an application named App1.

You open the Insights pane for the account and see the following chart.

□ Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

□

答案：

解題說明：

□ Explanation

□

Box 1: incorrect connection URLs

400 Bad Request: Returned when there is an error in the request URI, headers, or body. The response body will contain an error message explaining what the specific problem is.

The HyperText Transfer Protocol (HTTP) 400 Bad Request response status code indicates that the server cannot or will not process the request due to something that is perceived to be a client error (for example, malformed request syntax, invalid request message framing, or deceptive request routing).

Box 2: 6 thousand

201 Created: Success on PUT or POST. Object created or updated successfully.

Note:

200 OK: Success on GET, PUT, or POST. Returned for a successful response.

404 Not Found: Returned when a resource does not exist on the server. If you are managing or querying an index, check the syntax and verify the index name is specified correctly.

Reference: <https://docs.microsoft.com/en-us/rest/api/searchservice/http-status-codes>

問題 #73

You are implementing an Azure Data Factory data flow that will use an Azure Cosmos DB (SQL API) sink to write a dataset. The data flow will use 2,000 Apache Spark partitions.

You need to ensure that the ingestion from each Spark partition is balanced to optimize throughput.

Which sink setting should you configure?

- A. Write throughput budget
- B. Throughput
- C. Batch size
- D. Collection action

答案：C

解題說明：

Batch size: An integer that represents how many objects are being written to Cosmos DB collection in each batch. Usually, starting with the default batch size is sufficient. To further tune this value, note:

Cosmos DB limits single request's size to 2MB. The formula is "Request Size = Single Document Size * Batch Size". If you hit error saying "Request size is too large", reduce the batch size value.

The larger the batch size, the better throughput the service can achieve, while make sure you allocate enough RUs to empower your workload.

Incorrect Answers:

A: Throughput: Set an optional value for the number of RUs you'd like to apply to your CosmosDB collection for each execution of this data flow. Minimum is 400.

B: Write throughput budget: An integer that represents the RUs you want to allocate for this Data Flow write operation, out of the total throughput allocated to the collection.

D: Collection action: Determines whether to recreate the destination collection prior to writing.

None: No action will be done to the collection.

Recreate: The collection will get dropped and recreated

問題 #74

You need to provide a solution for the Azure Functions notifications following updates to con-product. The solution must meet the business requirements and the product catalog requirements.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Configure the trigger for each function to use a different leaseCollectionName
- B. Configure the trigger for each function to use the same leaseCollectionName
- C. Configure the trigger for each function to use a different leaseCollectionPrefix
- D. Configure the trigger for each function to use the same leaseCollectionPrefix

答案：A,C

解題說明：

leaseCollectionPrefix: when set, the value is added as a prefix to the leases created in the Lease collection for this Function. Using a prefix allows two separate Azure Functions to share the same Lease collection by using different prefixes.

Scenario: Use Azure Functions to send notifications about product updates to different recipients.

Trigger the execution of two Azure functions following every update to any document in the con-product container.
