- B. Manage stakeholder collaboration
- C. Confirm elicitation results
- D. Conduct elicitation

Answer: C

NEW QUESTION # 155

Which of the following tasks is part of the business analysis planning and monitoring knowledge area?

- A. Plan stakeholder engagement
- B. Trace requirements
- C. Assess solution limitations
- D. Analyze current state

Answer: A

NEW QUESTION # 156

Which of the following are criteria used to determine quality requirements relationships?

- A. Necessary, consistent, correct
- B. Penalty, benefit, cost
- C. Necessity, validate, derive
- D. Complexity, stability, status

Answer: A

Explanation:

Quality requirements relationships are determined by criteria that ensure the requirements are fundamentally sound. These criteria include:

* Necessary : The requirement must be essential to meet the business need or opportunity.

* Consistent : The requirement must not conflict with other requirements.

* Correct : The requirement must accurately describe the functionality that will meet the business need or opportunity.

These criteria help in ensuring that the quality requirements are aligned with the business objectives and can be effectively implemented and managed.

The criteria for determining quality requirements relationships are aligned with the best practices in business analysis as described in the BABOK Guide and other learning resources provided by the International Institute of Business Analysis (IIBA) 1 2 .
